

API and Controlled Substance Product Guide

Controlled Substances

We have spent over 50 years building an extensive range of controlled substances and opioids. Our heritage includes Macfarlan Smith Ltd, the world's leading manufacturer of opiate alkaloids. Additionally we specialize in other areas such as cannabinoids and synthetic stimulants. Our extensive experience in handling controlled substances gives us significant understanding of the critical issues surrounding these areas, as well as an excellent relationship with the relevant governing agencies such as the US Drug Enforcement Agency.

Our Controlled Substance and API Portfolio is supported by a global network of cGMP facilities: West Deptford, NJ; Devens, MA; North Andover, MA; Edinburgh, UK and Annan, UK.
