

Digital solutions for connected healthcare

SMHS offers innovative healthcare IT solutions that align technologies, businesses and customers. We envision becoming a globally preferred solutions provider and being part of our customers' success. We are proud to be part of Samvardhana Motherson Group, one of the world's leading automotive component solutions providers for OEMs. Believing in the mantra of a "not yet" company, we bring value to business by sharing IT practices of automotive to healthcare. We incorporate emerging technologies into the healthcare sector to benefit patients and accelerate the modernisation of pharmaceutical manufacturing and medical services. Our objective is to enable a data-driven healthcare ecosystem which shall further result in addressing business challenges in an increasingly competitive market.

Digitalisation

Customer Experience

UNLOCKING VALUE OF DIGITAL INNOVATION

Data Analytics

Artificial Intelligence

Cost Optimisation

Connected healthcare.

Innovative digital software solutions simplifying healthcare.

Intelligent Data Acquisition & Control System (iDACS)

An intelligent IoT based ERP/ machine agnostic software solution to improve OEE and real time monitoring of manufacturing operations.

- Industry 4.0 solutions for productivity improvements (OEE & 4Ms).
- Real time monitoring of operations.
- Enabling legacy equipment with IoT without capital investments.

Control & Audit Management System (CAMS)

Reduces financial risks using power of data to equip internal auditors with facts using data science to track complete audit with digital evidence and control.

- Minimise leakages through data and data science.
- Platform to efficiently manage audit life cycles – internal audits/ quality audits.
- Objective KPI monitoring.

ePedigree

Empowering track and trace enabling distribution compliance and restricting counterfeit drugs from the supply chain.

- Serialisation primary, secondary and tertiary functions.

Business Connect

- Connecting with the last mile, capturing actual tasks and efficiencies of field force using mobile-enabled applications.

Digitisation

- Digitally connecting processes – enabling paperless operations.
- Bringing efficiencies and error proofing in complete value chain.
- Cloud services and blockchain solutions.

Cloud Solutions

- Optimise infrastructure.
- Reduce costs.
- Improve performance.
- Accelerates effort to achieve greater agility.

Data Analytics

- Bringing real value to your existing data.
- Analytics and correlations to bring business.

Customer Satisfaction

- Patient engagement technology.
- Scheduling optimisation.
- Clinical workflows.

SAP

- Smart customisations.
- Improving implementation maturity index.
- Connecting to Industry 4.0 solutions.

Cold Chain

- Detaching 'Cold Feet' from the cold chain.
- Ensuring visibility of product throughout supply chain right from origin till final destination using smart sensor technologies.
