

Mayne Pharma Services

Partnering with clients to take pharmaceutical products from concept to commercialisation

- ✓ GMP accredited
- ✓ TGA accredited
- ✓ FDA accredited

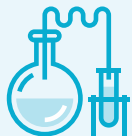

From **concept** to **commercialisation**

We offer individualised services at our GMP-accredited manufacturing facility, with the proven ability to successfully assist you at every stage – from small-scale formulation development and analysis, through to technology transfer and commercial manufacture.

Pharmaceutical Development

We offer comprehensive services to assist with the development of solid, semi-solid, liquid and topical products.

Analytical Development

We use common industry techniques, specialist equipment and extensive scientific knowledge to support all phases of pharmaceutical development.

Commercial Manufacturing & Technical Services

Supporting the upscaling of new formulations into commercial manufacturing and the technology transfer of existing products.

Experience and **service** you can trust

Agile and highly-skilled team

Dedicated project manager

Individualised services

Specialist facilities and world-class expertise
