

On-demand Bioanalytical Services

Reliable results for your preclinical and
clinical development

On-demand Bioanalytical Services

Mercodia is your preferred bioanalytical service partner from exploratory research to clinical trials. Our longstanding expertise stems from over 30 years of developing premium immunoassay kits, notably within cardiometabolic disorders, comprising an extensive biomarker portfolio. With our superior kits and services, you are guaranteed the highest performance.

Mercodia has extensive experience from developing ligand binding assays (LBAs) and provides high-class bioanalytical services for large molecules and beyond.

As a bioanalytical solution provider with over 200 completed preclinical and clinical projects, Mercodia offers accelerated time to results using reliable and robust fit-for-purpose methods, all at a highly competitive price point.

We are fully compliant with GLP and relevant guidelines from EMA and FDA, and we offer best-in-class regulatory consultancy.

Mercodia “on-demand” services allow easy access to our expert team, offering rapid turnaround times and data you can trust.

Are you seeking improvement of assay performance or understanding the level of validation required for your context of use?

Let us help you direct your bioanalytical strategy!

”Our flexibility enables designing tailored assays or specific runs to suit all needs while maintaining the highest quality standards“

Annika Carlsson
Director Bioanalytical Services

Biomarker analysis

Fit-for-purpose assay development and validation using our high-quality kits, your assay, or outsourced methods.

PK/PD analysis

Sample analysis, assay development, and assay validation compliant with the latest regulatory demands (FDA, EMA, and ICH regulatory guidelines).

Immunogenicity testing

Development and validation of assays for ADAs to investigate the presence of Nabs and Antibody Drug Conjugates (ADC) as well as screening, confirmatory, and bridging assays.

Reagent characterization and control

Characterization of reagents with a wide range of tools and platforms including ELISA, MSD, and surface plasmon resonance (SPR) using Biacore™ technology.

Custom production

Multiple solutions for the life science industry including assay kits, buffers, coated plates, and key components.

A selection of our biomarkers and panels

We continuously expand our portfolio and adapt to meet your needs. If you do not find the marker you are looking for contact us www.mercodia.com/services

Biomarker menu

Metabolic	Kidney	CNS	Cytokine	Inflammatory panels
Oxidized LDL	KIM-1	Ab38	IL-17A	Proinflammatory
Insulin	NGAL	Ab40	IL-17A/F	IL-1b, IL-6, IL-8, TNF-a
Proinsulin	TIMP2	Ab42	IL-17B,C,D	Immune response and regulation
Glucagon	KIM-1	Tau	IL-1a	IL-1RA, IL-3, IL-9, IL-17A/F,
C-peptid	NGAL	P-Tau	IL-1b	IL-17B, IL-17C, IL-17D, TSLP
GLP-1	TIMP2	BDNF	TNFa	Vascular injury
GIP	B-2 microglobulin		TGFb	CRP, ICAM-1, SAA, VCAM-1
Glucose	Alpha 1 microglobulin			
APO-B	Clusterin			
Hepatic lipase	TFF3			
Lipoprotein lipase	IGFBP7			
Lipase activity				
PYY				
Ghrelin
