CHILD RESISTANT CLOSURES

GENERAL INFORMATION

As a responsible manufacturer & supplier partner to pharmaceutical companies, we take Child resistant Packaging very seriously. That's why our closures are provide maximum Safety to Children and same time, the packaging must meet the need of Senior citizen. Our closures meet these conflicting product requirements in equal measures, safely closed from small children & easy to open for senior citizen.

Our child resistant closures are of two components, screw cap is interlocked with cover cap. The closure can only be twisted off the bottle by pressing and twisting at the same time. Simple and proven a million times over, the design has been tested for reliability in accordance to the guideline of DIN EN ISO 8317:2015 and US Consumer Products Safety Commission (CPSC) 16CFR1700.15 & 16CFR1700.20.

ADVANTAGES

- Internationally familiar: Press + Turn system
- Childproof and senior-friendly
- Manufactured Under GMP & ISO 15378 Compliance plant
- Registered with US-DMF Type III file no. 31635
- Reliable technology
- Realization of your design
- If child safety is absolutely necessary
- Different lid embossings possible (logo, Pictorial, Text)

CONTINUES THREAD (CT) CLOSURE

GENERAL INFORMATION

Yash Packaging manufacture & supply CT closures varies from different sizes & applications like, Solid dosage, liquids, dispensing devises (Nasal spray), etc.

Our CT closure fitted with induction sealing or friction fit wad/liner as per tightly closed container closure system.

ADVANTAGES

- Simple Closure
- Robust sealing
- Manufactured Under GMP & ISO 15378 Compliance plant
- Registered with US-DMF Type III file no. 31635
- Sturdy design
- Perfect grip
- Suitable for sealing machines, Manual processing possible, Easy handling for end users(semi & fully automatic)
- Ideal for all liquids which do not require a child safety
- Large variety of colors

TAMPER
EVIDENT

TAMPER EVIDENT CLOSURES

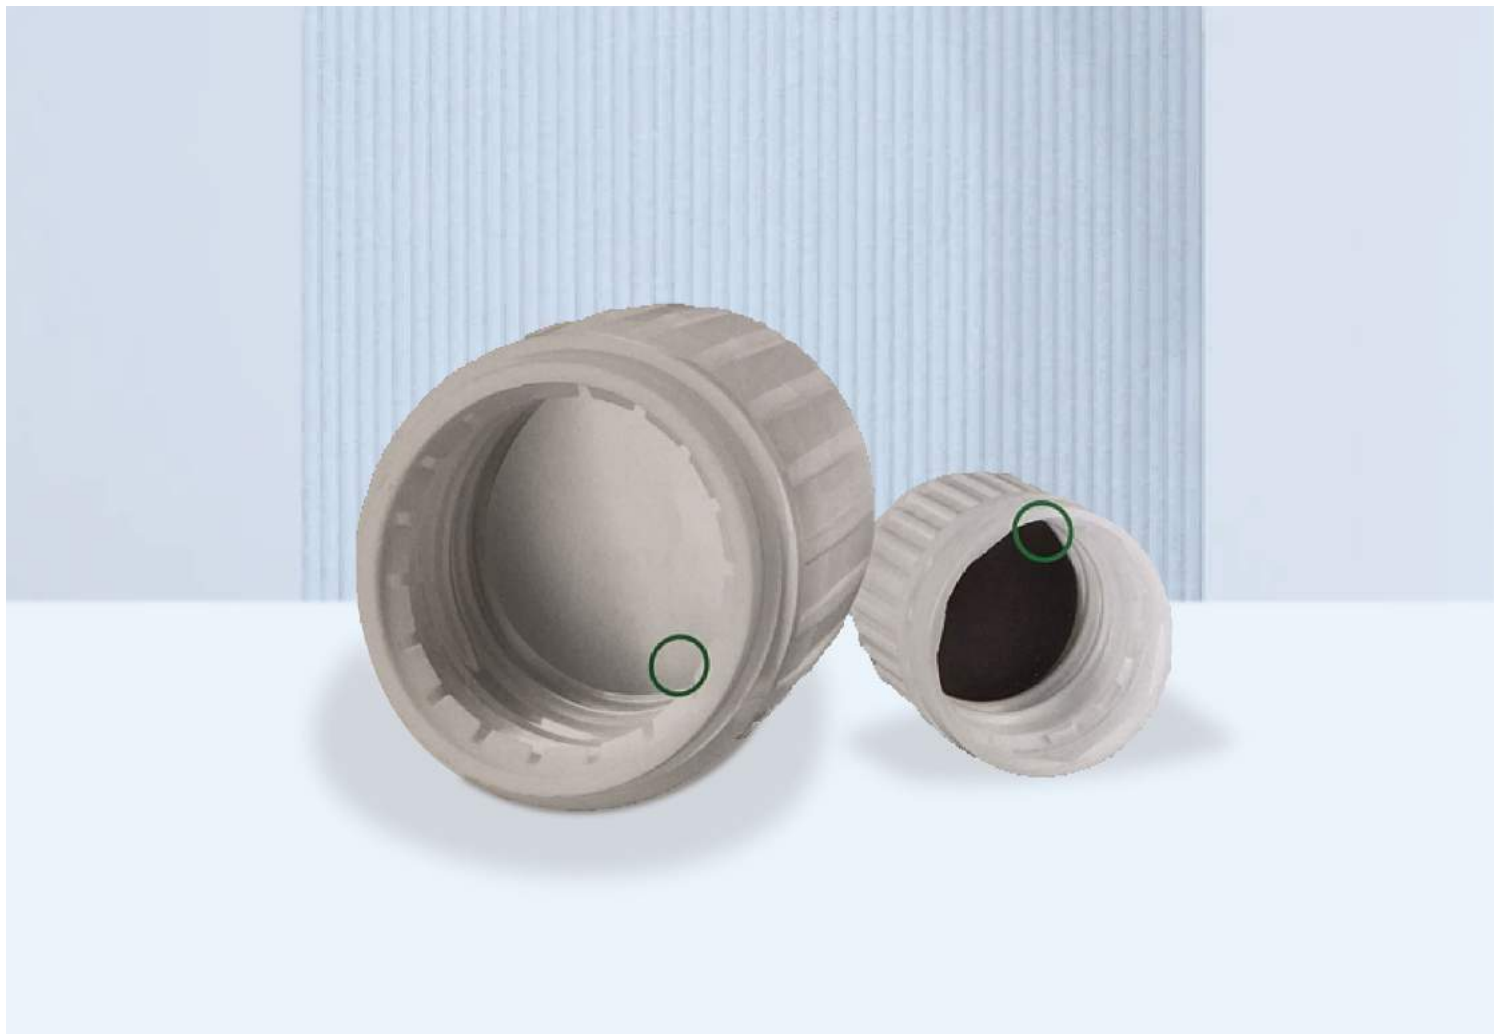

GENERAL INFORMATION

In addition to the ease of handling, the great advantage of our tamper-evident closures is their perfectly visible protection when the product is opened for the first time. We manufacture one-piece, tamper-evident closures as individual components in a single injection-molding process.

The advantage is that the tamper - evident ring of the closure audibly tears off during the initial opening and remains clearly visible on the bottle shoulder during further use. Depending on requirements, manual capping as well as semi-automatic or fully automatic processing on filling and capping lines is possible.

ADVANTAGES

- Absolutely tamper proof
- Sturdy design, with stand all capping machines, semi-or fully automatic
- Manufactured Under GMP & ISO 15378 Compliance plant
- Registered with US-DMF Type III file no. 31635
- Perfect grip
- Ring reliably tears off at the first opening by the end user
- The tamper-evident ring clearly indicates that the cap has already been opened
- Ideal for all liquids that do not require a child safety lock
- Large variety of colours

SEALING INSERT CLOSURES

GENERAL INFORMATION

Depending on the requirements of the various liquids, the optimum sealing of the filling material is achieved with a sealing liner tailored to the intended use. For all products, we can meet your individual requirements and offer a variety of special sealing inserts (liners) made of different raw materials.

Depending on the respective liquid, Teflon or aluminum liners can also be used, among others. In close cooperation with you, we develop solutions tailored to your product so that the corresponding sealing inserts (liners) of the closure meet the requirements of the various liquids.

ADVANTAGES

- Universal use with different viscosities of liquids.
- Perfect tightness
- Wide range of materials
- Exact fit for the selected closure
- Independent of the diameter of the bottle orifice

MEASURING CUPS & MEASURING SPOONS

GENERAL INFORMATION

Dosing aids such as measuring cups made of polypropylene are almost unbreakable and resistant. They are used above all in the food and pharmaceutical industry in the dosing of products where a precisely measured quantity is essential. Yash packaging offers measuring spoons or measuring cups enable precise dosing and oral application of liquids with different viscosity grades.

Our standard measuring spoons are available with scaling of 0.5 ml, 2.5 ml and 5 ml, allowing precise dosing, as it is often required for drug intake.

The measuring cup variants are variably attachable to PP 28 threaded closures and offer a very economical use of space in secondary packaging. All measuring cups and measuring spoons are certified in accordance with 93/42/EWG and bear the CE mark and manufacturer's logo in accordance with the Medical Devices Regulations.

We have in-house printing facility, where we can print measuring cup, as per customer artwork.

ADVANTAGES

- Clear transparency
- Simple and market-proven handling
- Applicability of preparations with different degrees of viscosity
- Stable design
- Measuring cups fit on our PP 28 closures
- Suitable for capping machines (semi- & fully automatic)
- Printed with customized artwork

PHARMA BOTTLES & CONTAINERS

GENERAL INFORMATION

Yash Packaging offers wide range of pharmaceutical packaging bottles, from 10cc to 250cc in High Density Polyethylene & Polypropylene.

We provide all common neck finish shapes and volumes in our range and guarantee the perfect combination of closure, dosing system and bottle.

ADVANTAGES

- Very good barrier against moisture & gases
- Heavy weight also possible for high barrier requirement
- Available in white opaque, amber & translucent colour
- Manufactured Under GMP & ISO 15378 Compliance plant
- Smooth lip & neck finish of bottles, ensure high seal integrity
- Registered with US-DMF Type III file no. 31635
- Suitable for solid dosage, dry powder, Liquid oral & liquid droppers
