About the Company

Aptiekas Produkcija is one of the leading Latvian manufacturers with more than 25 years of experience, which offers contract manufacturing and a wide range of food supplements for various market segments in the Baltics, as well as European, Middle Eastern, African and Asian markets.

Our competitive advantages are:

- 🌿 Manufacturing and final product quality, price efficiency, flexibility and reliability
- 🌿 Wide range of finished products and contract manufacturing services to promote the development of your business and personal Brand (Private label)
- 🌿 **ISO 22000, HACCP and GMP certification.**

Our manufacturing plant, which has been designed and constructed by international standards, is located in the metropolis of the Baltic States in Riga, Latvia. The production area reaches 1500 m². In production, we use well-known and modern equipment from BOSCH, IMA, etc., to ensure a well-organized and perfect production process and, as a result, a safe and high-quality product.

Uncompromised quality, cost efficiency, flexibility and reliability are the principles we base our business on. We are committed to the synergy of people, nature, technology and business.

Quality combined with a highly stimulating distributors policy and diversified product range make us one-stop point for your business to start or to expand. Please contact us to receive a detailed product list!

Quality Control

All processes, starting with the assessment of the supplier and ending with the release of the finished product, are implemented in accordance with HACCP and GMP requirements, ensuring full product traceability, high quality and safety. Our production is certified according to ISO 22000, giving customers confidence in the quality. The company has implemented a **quality management system**, the main goals of which are:

- 🕒 Provision of safe and harmless products to consumers
- 🕒 Ensuring a safe and harmless working environment for employees
- 🕒 Quality control of manufactured production

Contract Manufacturing

With increasing competition, pressure on price, product variety, small batches together with attractive packaging design have become the basic keys to the brand's success in the market.

We are able to provide a wide range of services by understanding the needs of our customers and at the same time offering maximum flexibility in production with small batch sizes and cost efficiency. We offer services in developing the visual design of the product for your brand (Private label) based on your business vision, marketing strategy and market segment.

You just have to have an idea to get started!
