

Cortellis Generics Intelligence

Grow your business and stay ahead of the competition

Never miss an opportunity using the most comprehensive intelligence available

Success in the highly competitive generics market requires speed and data-driven decisions to grow your business, defend your market share, stay ahead of competition and identify new markets, products and partners. Have confidence you're making the most informed decisions using Cortellis Generics Intelligence™, the world's only source of market performance, manufacturing, and patent data in a single, integrated solution.*

Pinpoint when a drug will lose exclusivity and investigate patent scenarios across major markets

Assess and select new markets and products in a matter of minutes based on your specific criteria

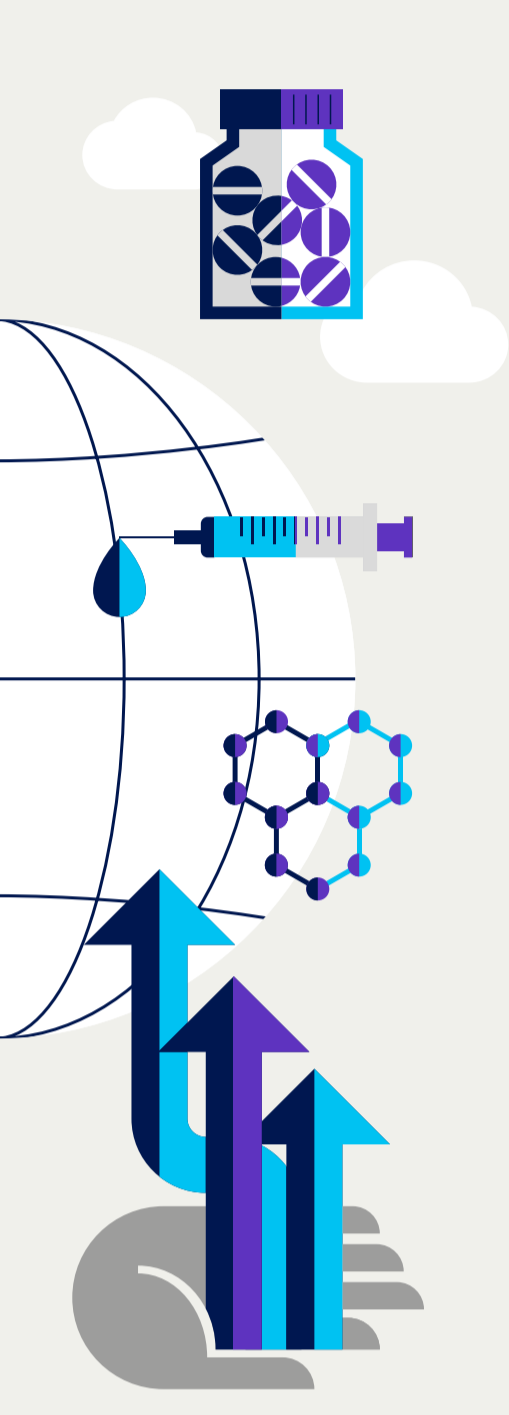

Find and evaluate potential suppliers, partners and customers quickly and confidently

Identify, monitor and stay ahead of your competition — all while predicting their next move

Make data-driven decisions that inform launch strategies, sales forecasts and commercial plans

Nearly 80% of users from small to medium sized companies report that Cortellis Generics Intelligence has helped grow their business.

Robust data

61K+
small molecules & biologics

Global
sales & kg consumption data

72K+
manufacturers & marketers

77
launch countries & pack price data

1.1M+
worldwide patents

62K+
regulatory documents across 25+ countries

Expert team

Editors with nearly 140 cumulative years of hands on experience in the generics industry

Geographically diverse team with global breadth and local depth

Advisory committee roles at leading generics trade associations

“Without [Cortellis Generics Intelligence], we would not have made decisions with such a high level of confidence... It’s an indispensable tool.”

President of Global Business, ZCL Chemicals

Unlock the hidden insights in data

Go beyond sales and patent data with a comprehensive source of all the critical information – market performance, patent, manufacturing and more – needed to make confident IP, sourcing, portfolio, and business development decisions.

Connect the dots

Get the whole picture of market performance, manufacturing, and patent information in a single, trusted solution for fast and informed decision making.

One source, many insights

Research new opportunities using timely and validated patent, sales, pack price, consumption, patent challenges, API, market share, company and launch data.

Enable your teams

Support your sourcing, portfolio, business development and IP teams to make more informed and strategic decisions – all from one trusted single solution.

Intuitive workflow tools

Identify new markets, products or partners in minutes using easy-to-use, comprehensive tools with criteria specific to your needs.

Time-saving analytics

Quickly understand when a drug can go generic using the Constraint Date Forecast based on the exclusivities, patents, and more.

Customizable visualizations

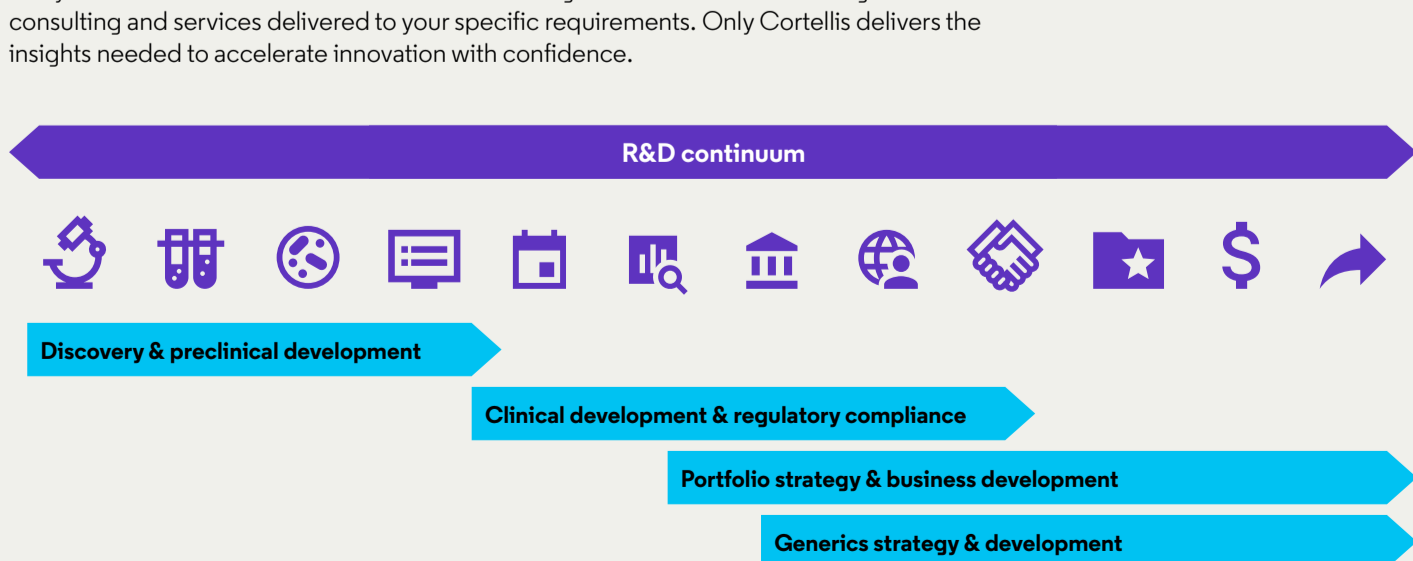

Leverage presentation-ready visuals and analytics to provide fast, accurate, and custom insights on relevant products and companies.

Drive growth and stay ahead of the competition
