

**CAREWELL PHARMAPACK  
INTERNATIONAL PVT LTD**

**28 years, from move toward  
maturely immaturely.**

**28 years, section of wills in surmounting  
growth course.**

From 1994 - 2022, for 28 years Carewell Group establishes the development, the strength until now, throughout takes hundred-year enterprise as a goal, insisted that by the high-grade product, the high-quality service and the abundant technical.

We understood deeply that the magnificent history cannot represent the future. 28 years are only the beginnings, turn toward “hundred-year enterprise” the broad prospect, a Carewell Group dashes.

## Introduction

## Quality is a trade, We Navigate

We don't for a moment forget the sanctity of the business we are in: The business of packaging healthcare, and of carrying precious medicines to millions, spreading hope and often, saving lives.

It is our endeavour to ensure that there is no compromise on systems towards ensuring quality of the final product. Quality starts with our choice of neutral glass clear and amber tubings that we source from the world's largest and most reputed manufacturers. Keeping in mind our mission of healthcare, special care is taken right from the inspection of glass tubings till the finished product.

Our in-house testing laboratory checks for all chemical testing, ceramic colours, annealing and snap breaking of ampoules

We have systems and quality norms that fall in line with international ISO and GMP guidelines. No wonder then that our clients see us for what we really our.

We are committed to GMP guidelines to create the healthiest climate for your packaging

## Our promises

- All cutting, glazing, checking, annealing, and packing of the ampoules is done in continuous process.
- Computerized controls and in-built camera ensure close monitoring of the production process and strict adherence to specifications.
- Tailor-made ampoules as per your specifications

## Tubular Vials

## From plain necks to screw necks to lyophilized vials

### Tubular vials:

plain and screw necks

In built checks in the manufacturing process

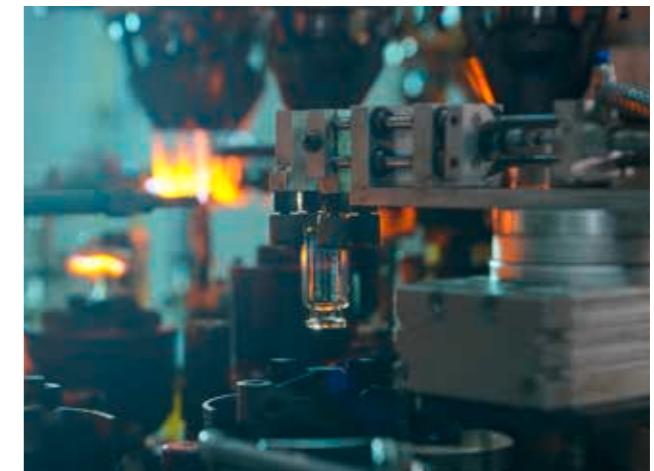

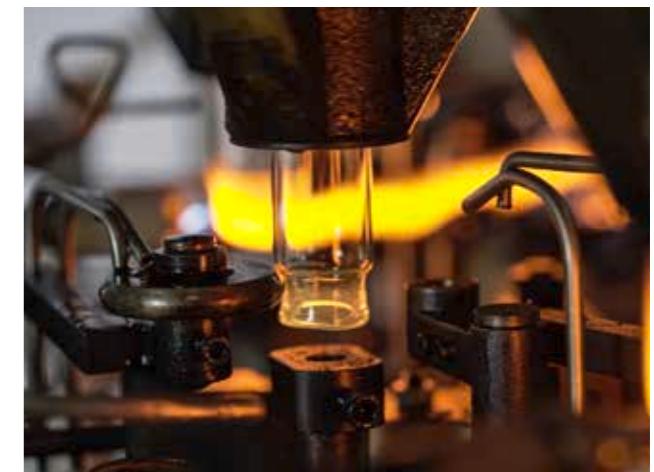

### Stringent checks:

internal and external diameter,  
lip height and length

At Carewell, the whole mindset is geared to-wards producing flawless quality. We live by that old axiom: if you don't look good, we don't look good. This explains why we bring the same quality norms to the manufacture of vials. And why after manufacture, we check and recheck the vials on all counts -from internal and external diameter to lip height and length.

Despite in-built checks in the manufacturing process, we also check the vials manually, in air-conditioner rooms, for optimum efficiency.

Due to our strong focus on quality, we retain a highly skilled workforce dedicated to quality control and inspection.
