PRODUCTS CATALOGUE

Central Nervous System

OXIDATIVE STRESS AND CENTRAL NERVOUS SYSTEM
Central Nervous System (CNS) is characterized by features that make it highly sensitive to Oxidative Stress and micronutrient deficiencies. CNS is one of the systems with the highest oxygen consumption, the highest content of PUFA that are highly sensitive to lipoperoxidation. Experimental evidences link aging and cognitive decline to OS damages.

SUPPLEMENTS FOR THE CENTRAL NERVOUS SYSTEM
Cor.Con. International rationally develops products that aim at preserving/restoring proper RedOx status and micronutrient content by enhancing what naturally happens during nutrition.

Our innovative food supplements are patented, tested in clinical studies. The use of specific ingredients promotes nervous system functions, the normal cysteine homocysteine metabolisms and protects cells from oxidative stress.

Food supplement containing Ginkgo biloba, Selenium, Vitamin C, Vitamin E and group B vitamins.
Gluten free. Naturally lactose-free.
10 x 10 ml vials

GLUTEN free
LACTOSE free

COGITON

MADE IN ITALY PATENTED CLINICALLY TESTED

Cogiton is patented and contains Ginkgo Biloba, vitamins, carnosine, coenzyme Q10 and selenium. It is designed to support brain and cognitive functions, protecting from OS damages. It is available in vials with a dosing cap. It is highly bioavailable and effective in short-term.

Food supplement containing Ginkgo biloba, Selenium, Vitamin C, Vitamin E and group B vitamins.
Gluten-free. Naturally lactose-free.
20 x 520 mg capsules

GLUTEN free
LACTOSE free

COGITON LONG TIME

MADE IN ITALY PATENTED CLINICALLY TESTED

Cogiton Long Time is developed to deal with long periods of intake and is available in capsules. It deals with conditions linked to brain OS damages. It is patented and based on Ginkgo Biloba, vitamins, carnosine, coenzyme Q10 and selenium. One capsule per day is recommended.

Food supplement containing Ginkgo Biloba, Carnosine, Selenium and Vitamins
30 x 520 mg capsules

GLUTEN free
LACTOSE free

SPECIAL MENTE

MADE IN ITALY PATENTED CLINICALLY TESTED

Special Mente is patented. Its formula is conceived to support brain and cognitive functions of the elderly. It is based on a unique combination of Ginkgo Biloba, vitamins, carnosine, coenzyme Q10 and selenium. Special Mente is available in capsules and one capsule per day is recommended.

Food supplement containing Turmeric, Hyaluronic Acid and Vitamins
30 x 0.55 g capsules

GLUTEN free
LACTOSE free

SPECIAL VISTA

MADE IN ITALY

Special Vista is based on a specific and harmonized combination of Hyaluronic acid, Astaxanthin, Zinc and vitamins to support the view in the elderly and to protect eyes structures from OS damages. Special Vista is available in capsules, it is recommended to take one capsule per day.

Cardiovascular System

OXIDATIVE STRESS AND CARDIOVASCULAR SYSTEM

Cardiovascular Diseases (CVDs) are a group of disorders involving heart, blood vessels and microcirculation. The WHO has estimated that CVDs are one of the main causes of death globally. Experimental evidences link Oxidative Stress (OS) to CVDs. OS induces, in a "vicious cycle", inflammation, immune cell migration and infiltration, fibrosis and extracellular matrix remodelling, leading to endothelial dysfunction and promoting CVDs exacerbation.

SUPPLEMENTS FOR THE CARDIOVASCULAR SYSTEM

Cor.Con. International develops products that aim at dealing with OS-induced dysfunction and preserving/restoring the proper systemic RedOx status.

Our innovative food supplements are patented, tested in clinical studies. The use of specific ingredients promotes the maintenance of normal blood cholesterol and glucose levels, promotes blood vessels function and protects cells from oxidative stress.

AR₀ **Stenovit**[®]
Food supplement
With sugar and sweetener
10 x 10 ml vials
AR₀ balanced reaction

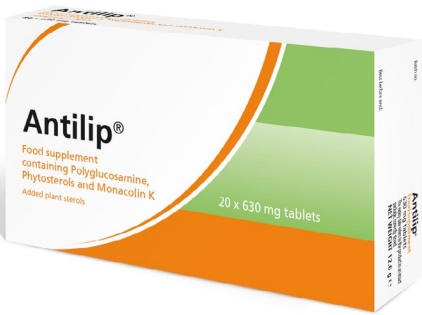

GLUTEN free
LACTOSE free

STENOVIT

MADE IN ITALY CLINICALLY TESTED

Stenovit is based on Selenium, Cysteine, Zinc, coenzyme Q10, Bioflavonoids and vitamins. It is designed to protect the cardiovascular system. It is available in vials with dosing cap. Due to its high bioavailability it is effective in short-term. One vial per day is recommended.

Antilip[®]
Food supplement
containing Polyglucosamine,
Phytosterols and Monacolin K
Added plant sterols
20 x 630 mg tablets

GLUTEN free
LACTOSE free

ANTILIP

MADE IN ITALY PATENTED CLINICALLY TESTED

Antilip is a patented food supplement based on a harmonized combination of polyglucosamine, phytosterols, Monacolin K and vitamin C. It is rationally designed to reduce cholesterol levels. Antilip is available in tablets; it is recommended to take up to two tablets half an hour before dinner.

Antilip[®]
Advance
Food supplement containing
Monacolin K, Chromium
picolinate, Polyglucosamine
and Phytosterols
20 x 1 g tablets

GLUTEN free
LACTOSE free

ANTILIP ADVANCE

MADE IN ITALY PATENTED

Antilip Advance is designed to reduce cholesterol and glucose blood levels. It is patented and it contains chromium picolinate, polyglucosamine, phytosterols, vitamins and Monacolin K. Antilip Advance is available in tablets and two tablets half an hour before dinner is recommended.

COR.CON. INTERNATIONAL
SPECIAL Vitalità
Food supplement
containing Zinc, Selenium,
Bioflavonoids, Astaxanthin,
Spirulina and Vitamins
30 x 1.15 g tablets

GLUTEN free
LACTOSE free

SPECIAL VITALITÀ

MADE IN ITALY

Special Vitalità is based on a combination of Spirulin, Astaxanthin, Selenium, L-Cysteine, Zinc, coenzyme Q10. It is designed to protect the cardiovascular system in the elderly, also providing energy boost. Special Vitalità is available in tablets. One tablet per day is recommended.

Immune Defence

PROPHYLACTIC MODULATION OF THE IMMUNE SYSTEM

The prophylactic modulation of the immune system is a valid support to the classical anti-flu therapeutic strategies (vaccines and drugs). Seasonal flu can infect up to 20% of the global population and this scenario can be worsened in the context of pandemic crises. Prophylactic modulation can be effectively achieved through the use of bovine colostrum (BC), which is a natural substance with immune-boosting effects. The supplementation of BC as whole, rather than of the single components that constitute it (e.g. lactoferrin, antibodies, growth factors) may have relevant advantages, since the BC natural matrix can protect these components from the digestion of the acidic environment of the stomach.

SUPPLEMENTS FOR IMMUNE SYSTEM

Cor.Con. International has rationally developed three different BC-based products able to reproduce the natural protective effect of colostrum in children, adults and elderly people.

Our innovative food supplements are patented, tested in clinical studies. The use of specific ingredients promotes the normal function of the immune system, protects cells from oxidative stress.

COLOSTRUM

MADE IN ITALY PATENTED CLINICALLY TESTED

Colostrum is a patented food supplement based on bovine colostrum, rationally designed to boost the immune system of adults.

Colostrum is available in chewable tablets; it is recommended to take one tablet per day before the main meal.

COLOSTRUM JUNIOR

MADE IN ITALY PATENTED

Colostrum Junior is conceived to support the immune system of children. It is a patented food supplement based on a harmonized combination of bovine colostrum and specific vitamins required to support the immune function of the younger. Colostrum Junior is available in chewable tablets; it is recommended to take one tablet per day.

SPECIAL IMMUNO

MADE IN ITALY

PATENTED

Special Immuno is a patented food supplement based on a harmonized combination of bovine colostrum and specific vitamins required to support the immune system of the elderly. Special Immuno is available in chewable tablets; it is recommended to take one tablet per day before the main meal.

Cosmeceutics

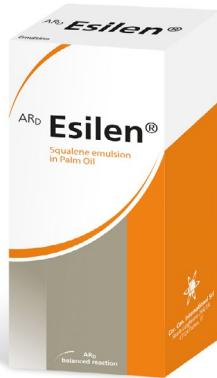

COSMECEUTICS AND SKIN CARE

Cosmeceutics combines the cosmetic and pharmaceutical worlds, delivering products with greater properties than cosmetics. The quest for more effective cosmeceutic products is constantly increasing, since maintaining a good appearance has important effects on how people perceive themselves, on social behaviour and, therefore, on people's quality of life.

PRODUCTS FOR THE SKIN

Cor.Con. International has rationally developed products based on natural substances that aim at revitalizing fragile epidermises poor in sebum, and acting as anti-aging agents thanks to their antioxidant action.

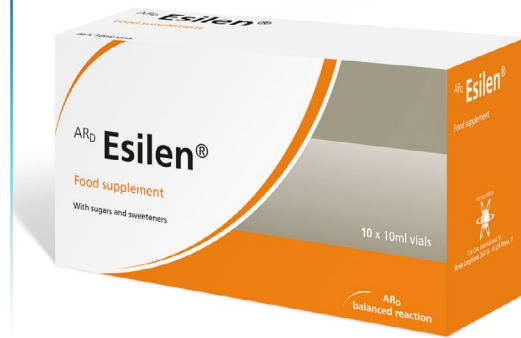

Our innovative cosmeceutic products are tested in clinical studies and proved to be able to specifically address skin aging problems, providing support to the specific needs of the skin with effective actions on epidermis, vessels and cells of dermis.

ESILEN EMULSION

MADE IN ITALY CLINICALLY TESTED

Esilen emulsion is based on a combination of Elaeis Guineensis oil, Simmondsia Chinensis seed oil and Squalene. It is designed for the maintenance of skin structures and functions, having anti-aging action and a strong antioxidant activity. To be applied on face and neck to prevent and treat skin aging.

ESILEN

MADE IN ITALY CLINICALLY TESTED

Esilen is a food supplement conceived to deal with aging processes. It is available in vials with dosing cap. Due to its high bioavailability it is effective in short-term, being recommended for early treatment of skin aging. It contains Olea europaea, Bioflavonoids, Vitamins, Coenzyme Q10, Zinc, Selenium, and Beta-carotene. One vial per day is recommended.

SPECIAL PELLE

MADE IN ITALY

CLINICALLY TESTED

Special Pelle is conceived to specifically support the skin functions of the elderly. It is based on a combination of Simmondsia Chinensis seed oil, Squalen and Elaeis Guineensis, having a strong antioxidant activity on the skin and delaying aging processes.

Metabolic System

OXIDATIVE STRESS AND METABOLIC SYSTEM

Metabolic Syndrome (MS) has a very complex pathophysiology, which is only partially understood from a clinical point of view. Important risk factors are genetics, age and diet. MS already happens when three clinical conditions out of the following five occur together: abdominal obesity, high blood pressure, high blood sugar, high serum triglycerides and low serum HDL. Subjects diagnosed with MS have higher risk of developing cardiovascular diseases (CVD) and diabetes. In the last decades the incidence of MS has significantly increased worldwide, leading to a global epidemic of CVD, obesity and diabetes. MS has a multifactorial pathogenesis and a state of Oxidative Stress (OS) plays crucial roles in exacerbating MS clinical manifestations.

SUPPLEMENTS FOR METABOLIC SYSTEM

Cor.Con. International develops products that aim at dealing with MS-related conditions, such as elevated blood cholesterol and glucose levels, and preserving the proper systemic RedOx status.

Our innovative food supplements are patented, tested in clinical studies. The use of specific ingredients promotes the maintenance of normal blood cholesterol and glucose levels, the normal collagen formation and protects cells from OS.

LIPIBAN®

MADE IN ITALY

PATENTED

CLINICALLY TESTED

Lipiban is a patented food supplement based on a unique combination Polyglucosamine and Vitamin C. It is rationally designed to support metabolic functions and for the management of cholesterol levels.

Lipiban is available in tablets, it is recommended to take up to two tablets half an hour before main meals.

CHITOSAN FOOD®

MADE IN ITALY

PATENTED

CLINICALLY TESTED

Chitosan can be added to food normally consumed in the diet, as it can be blended in pasta, bakery products, fine bakery wares and snacks. There is no difference in terms of nutritional values and organoleptic properties of food with and without chitosan, thus preserving all the properties of the original food, such as taste, smell and texture.

Chitosan may be added to the dough preparation mixture and the final product can be taken as an alternative food option with a specific health claim: "Chitosan contributes to the maintenance of normal blood cholesterol levels", with the health relationship "maintenance of normal blood LDL-cholesterol concentrations". (EFSA Claim). Currently, in Europe, our Novel Food application on food blended with chitosan is in the last step of the risk assessment phase.

Oral Care

OXIDATIVE STRESS AND ORAL CAVITY

The oral cavity is the first tract of the digestive system that is exposed to the external environment, coming into contact with food, with detrimental agents and with pathogens. Several processes take place in the mouth, such as enzymatic reactions in the early stages of digestion and innate immune activities against pathogens, which can induce an overproduction of oxidative species leading to Oxidative Stress (OS) status. OS induces inflammation of the oral cavity structures, alteration of the oral mucosa and periodontitis.

SUPPLEMENTS FOR THE ORAL CAVITY

Cor.Con. International has rationally developed products that aim at preserving and/or restoring the proper RedOx status and provide micronutrient content that support the physiological actions of saliva.

Our innovative products are tested in clinical studies. The use of specific ingredients protects cells from oxidative stress, contributes to normal collagen formation for the normal function of gums and to normal collagen formation for the normal function of teeth.

ODONTOVIS®

MADE IN ITALY

CLINICALLY TESTED

Odontovis is a food supplement based on a specific and harmonized combination of vitamins, beta-carotene, Zinc, Selenium, coenzyme Q10 and L-Cys. It is rationally designed to counteract damages linked to oxidative stress at the oral cavity. Odontovis is available in vials with a dosing cap. Due to its high bioavailability it is effective in short-term.

ODONTOVIS TOOTHPASTE®

MADE IN ITALY

Odontovis toothpaste is the first antioxidant toothpaste based on a unique combination of Punica Granatum fruit extract and limonene. It is rationally designed to restore the antioxidant power of the oral cavity and to counteract damages linked to altered RedOx balance of the mouth.

Odontovis toothpaste is available as 75 ml toothpaste tube.

Gynecology

OXIDATIVE STRESS AND WOMEN HEALTHCARE

Oxidative Stress and Women Healthcare
The use of Oral Contraceptives (OC) with high estrogen concentration or the use of oestrogen-progestin associations significantly increase Oxidative Stress (OS) levels, which have detrimental effects on vessels and microcirculation. Such an effect has to be considered carefully, since the use of OC is associated with an increased risk to develop vein thrombosis, venous thromboembolism and stroke. An increase in OS levels is also observed during the perimenopause period, which is the transition time from the final menstruated period and menopause. During this period of time there are many symptoms which have an impact on women's quality of life.

SUPPLEMENTS FOR WOMEN HEALTHCARE

Cor.Con. International develops products that aim at preserving/restoring the proper systemic RedOx status and providing symptom relief in women undergoing OC therapy or in their perimenopause or menopause periods.

Our innovative food supplements are patented, tested in clinical studies. The use of specific ingredients protects cells from OS, contributes to normal absorption/utilisation of calcium and phosphorus and to the maintenance of normal bones.

AFRAGIL®

MADE IN ITALY CLINICALLY TESTED

Afragil is a food supplement based on a specific and harmonized combination of Calcium, Vit. D3, vitamin C and Lycopene. It is rationally designed to support women wellness in the perimenopause and menopause period of time. Afragil is available in chewable tablets; it is recommended to take one tablet per day.

TEMPLAR®

MADE IN ITALY PATENTED CLINICALLY TESTED

Templar is patented and it is based on a combination of Vit. B6, beta carotene, selenium, alpha-lipoic acid, coenzyme Q10 and catechins. It is designed to counteract oxidative stress condition linked to the use of oral contraceptives. Templar is available in vials with dosing cap. Due to its high bioavailability it is effective in short-term. One vial per day is recommended.
