

# R&D platform for plant-based actives

# prediv

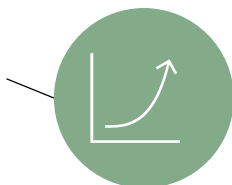

## Our Missions

Support strategic differentiation in ingredient sourcing

Secure Plants of interest supply

Accelerate the optimization of the phytochemical profile

Support the optimization of added-value production sectors

## Our Services

Varietal screening / phenotyping and selection

Optimization of the cultivation path to improve the yield on assets of interest

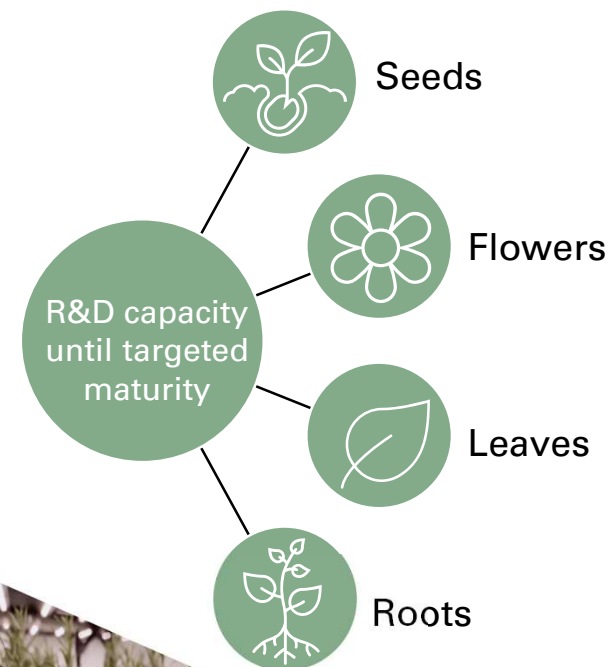

Kinetics of active ingredient production from seed to seed

Climate change prospective study

Evaluation of the effectiveness of innovative agri-inputs and growing media

Optimum spectrum development

## Customised innovation
