

WELDING GROUP

GLOBAL ACTIVE LIFE SCIENCE SERVICE PROVIDER

WELDING
GROUP

We distribute, develop, design and advise in the core areas of the pharmaceutical, food and feed industry.

For more than sixty years, our portfolio has been based on the production and trade of active pharmaceutical ingredients, generic medicinal products, raw materials for the food industry, feed additives, and veterinary active ingredients. A sense of tradition and a willingness to innovate are the cornerstones of our sustainable success. With our divisions, we offer our customers at home and abroad individual complete solutions for marketing, sourcing, and

distribution of active pharmaceutical ingredients and additives for the food and feed industry. In addition, we take care of the development, approval, and marketing of generic medicinal products for human and veterinary medicine. Honesty, transparency, reliability, responsibility, and integrity are our trademarks for sustainable economic success. This value-oriented corporate culture is the basis for the fulfillment of our corporate goals and the success of our customers - and our compass for our vision.

*With our innovative strength,
we make a valuable contribution
to the common good by building
sustainable synergies with our
customers and business partners.*

Global life science service provider with high quality standards.

Business support services from our Quality Management (QU) and Regulatory Affairs (RA) units are as much a part of our core competence as any patent searches and evaluations for selected molecules and markets as well as for generic formulations.

Regulatory Affairs - Our quality management, supplier qualification and certifications are the basis of good business relationships.

Simplifying complexity for our customers and suppliers. We ensure compliance with all regulatory requirements, providing support in CEP applications, ASMF creation and improvement, change notifications, pre-assessment of regulatory documentation, and offering pre-tested and revised regulatory documentation for APIs. Additionally, we assist with the transfer of ASMF/CEP documents into eCTD format.

Quality Unit - Our competence team with comprehensive expertise in all qualities ensures the global availability of valuable additives.

Experienced and highly qualified, our QU & RA competence team provides comprehensive expertise in quality-related matters. From approving imports to conducting audits and offering eCTD services, we ensure compliance with AMG/AMWHV/TAMG/EU GMP Part II/GDP regulations for API manufacturers, with a focus on CEP and ASMF approval documents.

Identify and test new business potential dynamically and flexibly

WELDING France - best business relations worldwide and an eye for new formulations and dossiers

With a comprehensive service offering of global marketing, procurement and distribution of active pharmaceutical ingredients for veterinary and human medicines as well as ingredients for the food industry, WELDING France is a true pharmaceutical all-rounder.

WELDING India - reliable partnership in one of the world's most important CDMO hubs

Hyderabad, located in the state of Telangana, has emerged as a prominent hub for biotechnology and the pharmaceutical industry. With the establishment of the „Genome Valley,“ it has become a key center for Contract Development & Manufacturing Organizations (CDMOs).
