

# GENOVIOR BIOTECH CORP.

---

A Trusted Partner Who Has Been Involved with 68% of the Top Performing Drug Products. End-to-End Services.  
Leverage our scientific expertise with 20+ years experience and products manufactured. 100+API Projects

W W W . G E N O V I O R . C O M . T W

# WELCOME TO OUR COMPANY

Established in 2015 with more than a hundred on-site scientific staff members, capable of scale up performance, commercial API and injectables. GMC, cGMP & PIC/S certified pre-clinical to phase I, II & III, dedicated API, contract development work process, scale-up assessments & formulation. Sterile and non-sterile initial qualification and re-qualification activities, process simulations for vials, ampoules liquid & lyophilized aseptic fillings with Pre-filled Syringes.

Pharmaceutical Projects conceptual design and project implementation  
Process development of peptide, protein biologics & bioprocess solution

# WHAT DO YOU KNOW ABOUT OUR COMPANY?

- 2015 --- Analytical / Formulation /Bio-process development /Synthesis Lab.
- 2016 --- Microbial pilot plant (5L - 300L), Aseptic injection pilot plant, 4000/Batch
- 2017 --- Dedicated Oncology API, lyophilization vial plant, 40,000/Batch.
- 2018 --- Cartridge Pen Injectable Line, 2000 Pen/hr., PFS Line, >10,000/hr.
- 2019 --- Microbial Commercial Plant, 3000(2x), animal cell production pilot & commercial plant ( monoclonal antibody drugs)

# GENOVIOR COMPANY VISION

2023  
Company

## excellence in track record

We bring recognized expertise in both development and manufacturing, with advanced technological capabilities and the innovative approaches and agile business models to overcome development hurdles and speed client's products to market, despite challenges. Our core competencies are broad in many scientific disciplines, working with our clients, whose value and unique selling points lie in invention and innovation. GBC have the ability to take molecule and, irrespective of disease target, develop and progress it towards becoming a treatment. When it comes to complexities of drug development and manufacturing, our clients are relying on GBC more and more to meet deadlines and demand, that's what GBC values and takes pride in focusing our efforts and resources on initiatives that

# GENOVIOR COMPANY MISSION

## Mission 001

The strength of scientific talent lies in the ability to extrapolate experience and expertise to something new -- to harness scientific curiosity for creative problem solving. Our in-house experts are the absolute core to our client's business, GBC's capital investment will be to increase scientific talent, knowledge & creating an environment for career growth in a changing paradigm, which will be key to the success of our client's business.

## Mission 002

To ensure contract work quality and delivery, GBC will continue to implement methods of working that is standardized but agile enough to respond to challenges. GBC knows; no two projects are identical, as a GBC develops and matures, we will need to have a continued focus on simplification, balancing standard ways of working with adapting to any bespoke needs of a project. GBC must be able to provide timely and transparent feedback to clients that can let them make the right go/no-go decisions.

# THE INTEGRAL ROLE OF GBC

GBC is a viable alternative in-house development and manufacturing of pharmaceutical products. Outsourcing manufacturing has become integral to the biopharma business model, providing increasingly successful and necessary to meet demand for therapies.

Oncology	small molecules	recombinant
Peptide	pre-filled syringes	formulation
Biological	parenteral products	lyophilization

### BIOLOGICAL

Denosumab  
Liraglutide  
Ranibizumab

*More Information ...*

### OTHERS

Dexmedetomidine  
Ganciclovir  
Levetiracetam  
Palonosetron  
Valproate

# GENOVIOR CDMO FOCUS

## Client Centered Policy

Genovior's Contract WorkTeams have Client-Centered ethos at the heart of their work. Client's requirement frequently evolve and it is common for objectives to expand after initial preclinical or phase-I projects. Rapid adaptation to changing or additional requirements involve altering key project deliverables and metrics. Employee training in the provision of rapid client is also vital for achieving greater agility in this area
