

Since 2004, Raritan Pharmaceuticals has been first-to-market with many OTC pharmaceutical products, and introduced innovative consumer products to the marketplace.

Raritan Pharmaceuticals develops, manufactures, and markets leading OTC medicines, OTC brands and consumer products in the United States. Our innovative, value-added and cost-effective products provide substantial savings to consumers. Our products are available in leading retail chains in the US and are available for export worldwide.

With an emphasis on research & development and innovative solutions; Raritan Pharmaceuticals has become a trusted partner to the leading brands, retail chains and distributors in the US. Our 400,000 sq. ft. campus of manufacturing and warehousing space is located in East Brunswick, NJ, USA.

# MANUFACTURING INNOVATIVE, HIGH QUALITY, AFFORDABLE, HEALTH CARE PRODUCTS.

Finished Dosage Forms and Nutritional Supplement Manufacturer  
 in a US-Based, US-FDA Audited Facility.

## RESEARCH & DEVELOPMENT

Raritan Pharmaceuticals has assembled a talented and experienced team of pharmaceutical research scientists in a fully-equipped R&D laboratory.

Our team of pharmaceutical scientists possess R&D and scale-up expertise in chewable tablets, caplets, powders, capsules, specialty liquids, gels and effervescent. We also possess extensive development expertise in cosmeceuticals.

## REGULATORY AFFAIRS

All operations are conducted in cGMP compliance and are routinely audited by the US Food and Drug Administration. We have an outstanding regulatory record and are committed to maintaining and continually improving good manufacturing practices. We are also audited annually by leading independent quality assurance firms and quality departments of leading companies and are certified to be cGMP compliant.

## FACILITY

We operate in a modern pharmaceutical facility in New Jersey, USA designed for cGMP processing, manufacturing and packaging operations. Our facility features state-of-the-art manufacturing and packaging equipment. Raritan's ERP system and integrated EDI capabilities are set up to enable real-time data collection.

The R&D and quality assurance laboratories are fully staffed with highly qualified scientists and technicians and are equipped to handle all analytical requirements according to USP and cGMP standards.
