**A "DREAM" CAN ONLY
COME TRUE IF ONE DAY
WE HAD THE
OPPORTUNITY TO DREAM**

FHC Group "The Future of Health Care"

The FHC Group is one of the most relevant business groups in the pharmaceutical sector in Portugal, present in the entire pharma value chain with recognized valences in the industrial area, distribution in retail and hospital market, export, R&D and also in the pharmaceutical consultancy. The FHC group began its foundation with the creation of the company FHC | Farmacêutica in 1998, dedicated to the international market consolidating its position in the pharmaceutical industrial sector with the acquisition and dynamization of Laboratórios Basi in 2003. The FHC Group is a portuguese private capital multinational present in 4 continents.

MANUFACTURING AGREEMENT

Laboratórios Basi

The two industrial units of Laboratórios Basi enable them to offer manufacturing services in the following pharmaceutical forms:

Small Volume
Injectables

Large Volume
Injectables

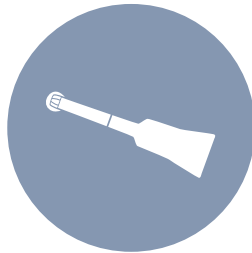

Gel, Creams,
Ointments

Syrups, Oral Solutions
and Oral Suspensions

Cutaneous
Solutions

Enemas

LSM INDUSTRIAL AREA

HIGHLIGHTS

Laboratórios Basi

ENVIRONMENT

Our focus: save energy, conserve water, waste reduction

Factory with ecodesign

Equipment and systems with state-of-the-art technology result in a Factory with with excellent environmental performance, energy efficient and focused on recycling as a catalyst for the circular economy.

Waste reduction

Lighter packaging (-30% of plastic)

75% of the waste produced is recycled

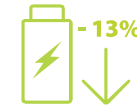

1% plastic waste

ERP system
Production E-Tickets

Recycling

We encourage recycling, waste segregation, collection and training

Energy consumption

- 13%

13% more efficient technology

- 40% of the Energy used to produce Sanitary Hot Water comes from the sun
- 100% LED lighting
- VDF optimisation installed on electric motors
- Steam generator with energy recovery up to 15%

QUALITY CONTROL

Laboratórios Basi

Quality Control is an international reference, equipped with the latest analysis technologies that allow to carry out any type of tests necessary for raw materials, packaging materials and finished product, together with the preparation of related technical documents.

Physical and Chemical Tests

- Degradation and dissolution tests, with fraction collector and spectrophotometer;
- Liquid chromatography (HPLC);
- Gas chromatography with headspace attached;
- UV-VIS and infrared spectroscopy, potentiometry.

Stability Tests

Laboratórios Basi have the capacity to perform raw material and product stability studies, from the conception, definition of the stability protocol, to the completion of tests and evaluation of results, in different climatic conditions, including photostability studies.

Microbiological Tests

The Microbiology Laboratory is equipped with the necessary equipment and resources to perform any type of test on sterile and non-sterile pharmaceutical forms.

RESEARCH AND DEVELOPMENT

Laboratórios Basi

Laboratórios Basi assume Research and Development as a strategic area of the group, with Innovation being a pillar of its activity supporting its values and principles.

They have dedicated their activity to research, product development and **innovative pharmaceutical forms in the health field.**

Research is supported by a research, development and innovation management system sustained by **knowledge and innovation management**, supported by reference guidelines and standards, as well as by stimulating and motivating its employees to participate and collaborate in strategy and generation of new and promising ideas.

Research and development at Laboratórios Basi is committed to **close collaboration** with other research and development companies, as well as with **internationally renowned R&D centers and Universities.**

Currently, Laboratórios Basi have an increasing collaboration **with Universities in several scientific areas**, here they participate in several master's projects, **doctoral in company projects and scientific research projects**, in order to ensure that their clients benefit from the latest scientific developments and techniques.

RESEARCH AND DEVELOPMENT

Laboratórios Basi

The commitment of Laboratórios Basi to Research and Development has been recognised annually by the **National Innovation Agency** in the allocation of incentives to the various ongoing projects.

Associated with its R&D activities, the company performs, intensively and applying concepts of QbD and PAT, the following **medicine development activities for a global market**:

- Pre-formulation studies;
- Formulation development (QbD);
- Development of techniques to improve the manufacturing process;
- Technology transfer and productive scale-up (pilot line);
- Manufacture of experimental medicines
- Performance of in vitro and clinical studies (bioequivalence and Phase I)

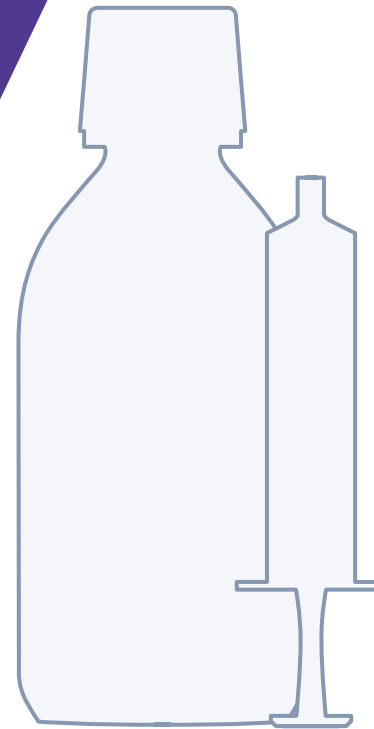

The recognised technical competence in the development of the most varied formulas, based on a maximised use of the available technological means and the efficient installed capacity, make Laboratórios Basi an industrial player of reference, with a great competitive capacity and adaptability, proven by the various international contracts and partnerships.

ADDED VALUE PRODUCTS

Laboratórios Basi

Our R&D endeavoured to optimise all product features, in order to add value to our portfolio and that of our partners!

- **No colourings or preservatives**
Reducing exposure to unnecessary excipients
- **Cover with shutter**
Reduce waste and increase perceived quality
- **Oral syringe**
Increase therapeutic compliance and facilitate intake
- **No sugar**
Enable use by diabetics
- **Child-proof cap**
Increase product security
- **Better impurity profile**
Optimised formula to increase product shelf life
- **Improved flavour**
Improved organoleptic characteristics, for better therapeutic adherence

ADDED VALUE PRODUCTS

Laboratórios Basi

Functional

- High resistance hanger with a capacity of 360°
- Transparent, fully collapsible bottle
- Two-way volume scale on the bottle
- High volume of Headspace for additives
- 2 independent injection points

Eco-Friendly Manufacturing

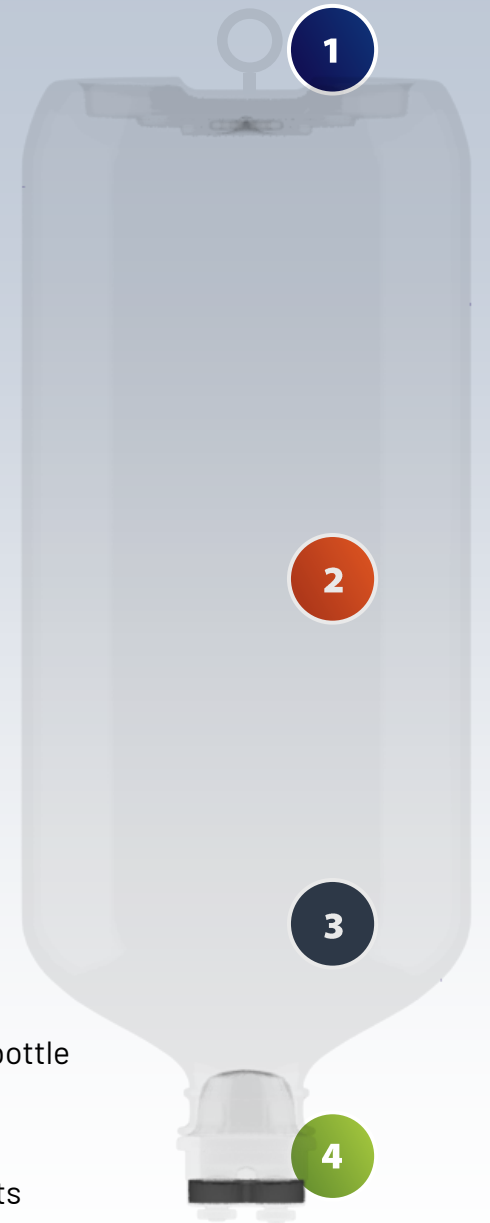

- Reduction of energy consumption (-13%)
- Lighter packaging (-30% of plastic)
- 1% plastic waste

Innovative

The technical advantages of packaging are created in a factory with 4.0 technology

basiflex

- 1 360° hanger
- 2 Transparent and collapsible bottle
- 3 High volume of Headspace
- 4 2 independent injection points

Laphysan[®]

HIGHLIGHTS

Laphysan, S.A.U.

VISION

We want to be accountable for our customer value in quality, service, environment and sustainability.

MISSION

Sharing Added Value with Hospitals, Clinics and Patients. Providing superior solutions at sustainable prices, improving the benefit of all stakeholders.

SOCIETY AND ENVIRONMENT

We want our activity to be part of a more sustainable future.

CUSTOMER AND COMMITMENT

We search for new ways to add value daily by acting before with adapted solutions and prices.

NETWORKING AND DIFFERENTIATION

We will promote a local and global network, betting heavily on consolidating existing relationships and creating new ones. Our products, organization and activity will always be unique, regardless of the market.

INDUSTRY AND MARKETS

We will be on the lookout for signs and changes in our industry.

We will adopt an integrative and collaborative approach with competitors, clients and suppliers.
