

PRODUCT- AND PATIENT SAFETY WITH INOVALABEL PHARMA

Reliable labelling for pharma industries, clinical trials, medication processes and healthcare

Professional expertise and profound know-how make Inovalabel a reliable supplier for pharmaceutical companies, medical technology, healthcare and for clinical trials. In consistent partnership, Inovalabel develops specific applications customised to individual requirements. Multifunctional pharmaceutical labels offer a lot of space for content, complete security, secure traceability, easy handling and reliable documentation.

Multi-Page Labels

More space for content in a compact and user-friendly setup.

Documentation Labels

Removable vignettes prevent medication errors.

Security Labels

Special labels for a secure supply chain and patient safety.

Multi-Page Labels

More space for content in a compact and user-friendly setup.

- Increased product and patient safety
- Legal regulations in several languages reliably on the product
- Comprehensive descriptions for international clinical trials
- Customised development and constant innovation
- Process optimisation in everyday medical practice
- High cost-effectiveness thanks to reduction of product variety
- Flexible use in international distribution, convenient handling
- Originality and safety features, variable data, braille, opacity, medication control
- Construction and design specifically optimised for the product

Documentation Labels

Removable vignettes prevent medication errors

- Reliable documentation for international clinical trials
- Secure and fast labelling and documentation of medication
- Reliable use in the patient file or vaccination certificate
- Easy handling of customer-specific data directly on the product
