

Your Labstore Starts Here

At Calibre Scientific, we offer avant-garde solutions across various product categories to meet the diverse demands of research, observations, studies, and analysis.

Life Science & Diagnostics

Elevate your life science research with our curated selection of high-performance tools. Our product lineup includes advanced lipids, detergents for membrane protein research, sequencing essentials for genomics applications, and specialized cell culture and plant biology media. Adapted for professionals in the life sciences, our range of products offers versatility and reliability, empowering researchers, scientists, and laboratory professionals to achieve accurate and reproducible results. Whether you are working with membrane proteins, performing genomic analysis, or cultivating cells for various applications, our carefully selected offerings are designed to enhance the efficiency and precision of your work.

Revolutionizing clinical diagnostics globally, we've innovatively supplied labs with essential tools for specimen processing, collection, transport, and quality control. High quality reagents and stringent quality control enable your lab to stop interpreting. And empower your process to know results with precise confidence. Join us in elevating your lab with our high-quality diagnostic solutions.

Cell Manipulation Instruments

Embark on a scientific odyssey of precision with our cutting-edge micromanipulation and microinjection solutions. Tailored to a myriad of life science applications, our instruments enable gentle physical manipulation of cells and embryos minimizing damage and maximizing reproducibility. Unlock your next scientific breakthrough with innovative, precise, and dependable answers to your cell manipulation needs and unleash your true potential.

Laboratory Supplies

Discover our selection of General Laboratory Supplies and Consumables dedicated to meet the specific needs of researchers, scientists, and lab professionals. Our portfolio features a wide range of labware, sample handling and storage solutions, and top-notch equipment.

Whether conducting groundbreaking research or routine laboratory tasks, our carefully selected products enable users with essential tools to perform day-to-day experiments and studies.

Analytical & Organic Science

Dive into precision using our advanced sample handling solutions for meticulous control and contamination-free transfers, ensuring reliable, reproducible results. Our analytical and organic science portfolio offers diverse and efficient sample preparation tools for extracting, purifying, and precisely concentrating samples.

Our chromatography and spectroscopy products guarantee both reproducibility and high quality, ensuring consistent and reliable results in your scientific endeavors.

Solvents & Research Chemicals

Explore our Research Chemicals Portfolio, where accuracy and innovation converge. Our comprehensive selection of high-quality solvents and reagents caters to the specific requirements of scientists and researchers across different industries and for various applications.

From routine laboratory work to cutting-edge research, our offerings ensure reliability, purity, and lot-to-lot consistency, which allow you to elevate your analysis and advance your scientific endeavors. Welcome to a space where every experiment is an opportunity for discovery!
