LSPedia

Traceability & Supply Chain Solutions for Healthcare

Do you know your DSCSA requirements?

AUTHORIZED TRADING PARTNERS (ATP) Products must be purchased from authorized trading partners with valid licenses.

PRODUCT TRACING & INTEROPERABILITY Pharmacies must be interoperable to receive and maintain serialized EPCIS product information for every prescription drug.

PRODUCT IDENTIFIERS Ensure all products contain the correct product identifiers that allows the product to be traced (serial number, GTIN, lot, expiration).

ENHANCED DRUG DISTRIBUTION SECURITY (EDDS) Match/verify the product identifiers (PI) and the data (EPCIS) upon receiving. Notify suppliers of any errors and discrepancies.

PRODUCT VERIFICATION Verify the authenticity of suspect or illegitimate products with the manufacturer. Promptly notify trading partners of any suspect or illegitimate products.

FDA 3911 Immediately report illegitimate products to the FDA via form 3911.

DATA RETENTION AND REPORTING Keep all tracing documentation for at least six (6) years and provide to authorities within 48 hours of a request.

DSCSA STANDARD OPERATING PROCEDURES (SOPS) Trading partners are required to have DSCSA standard operating procedures (SOPs) to establish and document the processes that ensure compliance.

LSPEDIA ONESCAN PHARMACY PRO
Has You Covered

LSPedia offers unmatched value in your healthcare DSCSA solution

OneScan Pharmacy Pro is the only solution that provides a storefront UI on top of a proven EPCIS system, Verification Router Service, and Exceptions Management.

OneScan's data features make the healthcare workflow easier, simpler, and more efficient, eliminating labor-intensive manual tasks and ensuring that providers can maximize the time they spend helping customers.

Rx RECALL MANAGEMENT

Rx EXPIRY MANAGEMENT

SEAMLESS INTEGRATION

AUTOMATED EXCEPTIONS MANAGEMENT

TRADING PARTNER MANAGEMENT

Rx Recall Management

Recieve on-screen and email recall notifications for any products in your inventory that have been recalled. Through workflows, we take it a step further to manage this process across all locations to ensure the products have been pulled and quarantined within the system.

Rx Expiry Management

Easily generate a full report 30, 60 or 90 days out of expiring products within a location, bypassing the need to review expiration dates one by one.

Seamless Integration

Use the OneScan Pharmacy solution with any pharmacy system and on any device, with all data encrypted and stored in the cloud.

Automated Exceptions Management

Protect your business! Working in the background, our famous "Investigator" system utilizes hundreds of GS1, DSCSA, and business rulesets to validate the inbound data is accurate and complete. Following a guided resolution process, Investigator automatically notifies your trading partners and provides a collaborative portal for them to resolve the issues.

Trading Partner Management

Meet your ATP requirement while removing manual searching and data entry, with a database of more than 34,000 trading partners plus FDA and NABP Pulse integration.

Why LSPedia Leads the Healthcare Space

Experience

LSPedia has 6+ years experience with EPCIS and is the leading processor of serialized EPCIS data in the industry. Our competitors have just started or are still unable to receive EPCIS data.

Verification Router Service (VRS)

The only DSCSA provider in the dispenser space with Verification Router Service (connected with GS1 Network) to instantly verify suspect products.
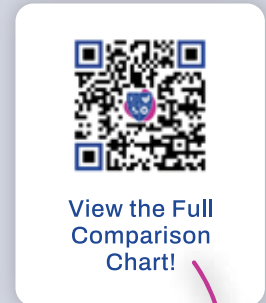

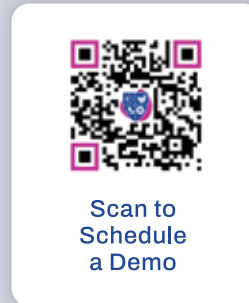

EPCIS Exceptions Management

The only DSCSA provider with a fully automated system (Investigator) to proactively identify EPCIS and supply chain issues. The collaborative platform allows trading partners to efficiently resolve the issues electronically in real-time.

Value Beyond Compliance

Pharmacy Pro offers significant value outside of compliance, with fully automated and integrated features such as Authorized Trading Partner License Management and Validation, Suspect Order Monitoring, Rx Recall Management, Rx Expiration Management, and more, which can save your business valuable time and money.

Security

LSPedia's software is validated and secure. Our platform is ISO27001 certified, ISO9001 certified, and meets U.S. Govt FEDRAMP security requirements.
