

vitaxa®  
EFFERVESCENT

Vitaxa effervescent tablets are a reliable supplementation of vitamins, minerals and other beneficial substances.

Vitamins perform a number of irreplaceable functions in the body. They convert food into energy, strengthen and restore the body's immune responses, help reduce fatigue and slow down the degenerative manifestations of aging.

Minerals are also an important and necessary part of our nutrition. They help the proper development and functioning of the organism, activate and control metabolic processes, and participate in the production of enzymes.

The excellent taste of effervescent drink will make delivery of the necessary substances to the body more pleasant.

Vitaxa effervescent tablets are effective throughout the year, in the summer to refresh and replenish vitamins and minerals, and in the winter to strengthen immunity.
