We will be happy to answer your questions.

**Automatic
machines for
reordering and
assembling
bulk parts**

Since 1950, O.ZA.F Srl has been a reference in industrial automation, in the processes of serving filling, labelling and cartoning lines. Born as an artisan company, today the strength of O.ZA.F is based on a technical and commercial consulting service, operating in Italy and abroad, dedicated to support the customer in the creation of a product designed to his needs in all its components: from mechanical and electronic design, through the assembly and testing, leading to the drafting of standard documentation and product validation. All this is completed by an after-sales service able to respond in a very short time to any request. The company's innovation does not forget the original historical values, based on the attention to the quality of the materials, the manufacturing process of the machine, which represents an excellence of Made in Italy. Targeting sectors of the company include: pharmaceuticals (in the various ISO-classified environments), cosmetics, food & beverage, tobacco, chemicals and mechanics. The core business of this all-Italian reality are customised automated systems, integrated by manufacturers and end users in filling, capping, labelling and packaging lines, consisting of machines for reordering bulk parts and assembling machines for components.

OUR STRENGTHS

The close collaboration with customers during the development phase of the project, combined with the rapid response from our team, together with the ability to solve problems through effective and functional solutions, allowed O.ZA.F to become one of the leading companies in the field of industrial automation.

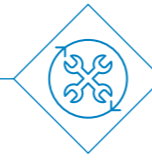

TEST

Assembly, testing and machine validation documentation process are essential phases of our work to provide our customers with the highest quality machines.

VALUES

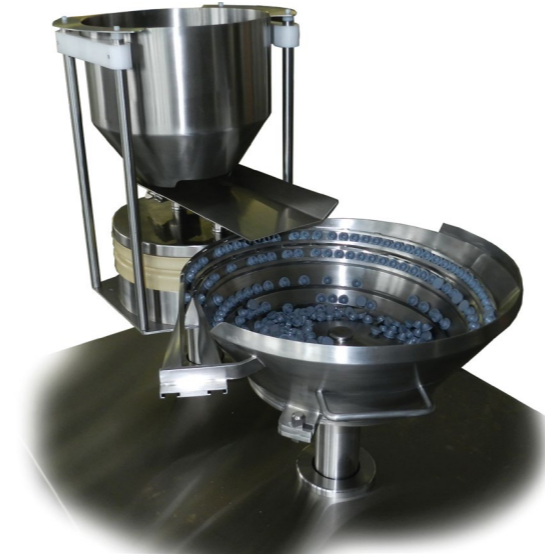

Our choice is focused on maintaining the highest quality standards: this is a guarantee to those who choose O.ZA.F. to count on solutions of absolute reliability.

QUICK ASSISTANCE

Our After-Sales office is able to respond to any need that may arise during the use of the machines. Quick interventions around the world with our specialized staff, with the possibility of requesting on-site inspections. We are also able to intervene through a remote-assistance service.

CUSTOM MADE

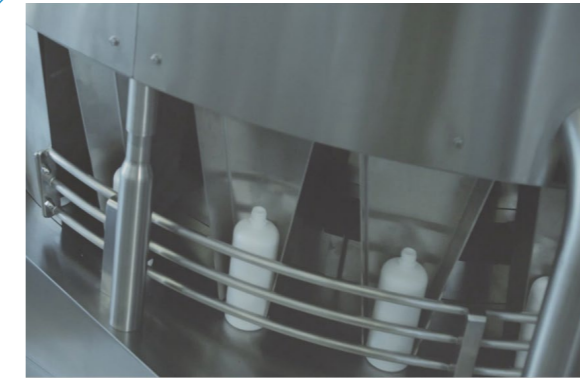

VIBRATION SYSTEMS

Our production of vibration devices allows us to create preload and orientation systems (circular and linear vibrators and vibrating hoppers) for different types of parts: pharmaceuticals (stoppers, rings, plungers, droppers, etc.), cosmetics (dispensers, pumps, nail and eye-liner brushes, etc.), food products, tobacco and mechanical components.

UNSCRAMBLERS

The range of O.ZA.F. machines including unscramblers, centrifugal and mechanical feeders, roller conveyors and special automated systems, allows to orient parts with different shapes. The systems are designed to feed even unstable objects through the use of pucks to ensure balance. Our applications are suitable for many environments: cosmetics, pharmaceuticals (such as O-RABS, C-RABS, ISOLATORS) and food & beverage; each with its own specificity. Our machine range includes accessory equipments like air rinser and orientating devices in case of asymmetrical parts.

ROBOTICS AND ASSEMBLING

The technical experience of O.ZA.F. team allows the design and construction of special and assembling machines, satisfy the specific customers needs. The variety of technical applications is enhanced by the integration of robotic systems that allow flexible, dynamic and high performance solutions.

MADE IN ITALY
