Procare Health

Procare Health is a pharmaceutical company created in 2012, as a result of a spin-off of P&G pharmaceuticals. Focusing on women's health and wellbeing, **Procare Health** is a new pharmaceutical company based in Spain, constituted with 100% private equity.

Procare Health invests 25% of its budget in R&D, from basic research projects to ambitious clinical studies. Both research and development of **Procare Health** products are conducted in Spain.

Basic and clinical investigation, innovation and formulation of products with natural ingredients are the key founding pillars to **Procare Health's** DNA, bringing the most appropriate solutions to nowadays women's aspirations and needs.

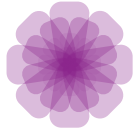

Procare Health's vision is to establish itself as one of the leading laboratories within the field of women's health, basing its development on a strong growth of its portfolio of products and brands.

PAPILOCARE®

1st TREATMENT TO PREVENT AND TREAT HPV-DEPENDENT CERVICAL LESIONS[◇]

THE EFFICACY OF PAPILOCARE® IN THE CLEARANCE OF HIGH RISK-HPV AT 6 MONTHS IS BETWEEN 50% TO 70%²

in the Paloma clinical trial and 3 independent clinical studies carried out by university public hospitals with a total of 400 patients

NORMALIZATION OF HPV-DEPENDENT CERVICAL LESIONS IN

88%**

of High-Risk HPV+ patients at 6 months vs 56% in the control group

FINAL RESULTS
on High-Risk HPV

HPV CLEARANCE IN

63%

of High-Risk HPV+ patients at 6 months vs 40% in the control group

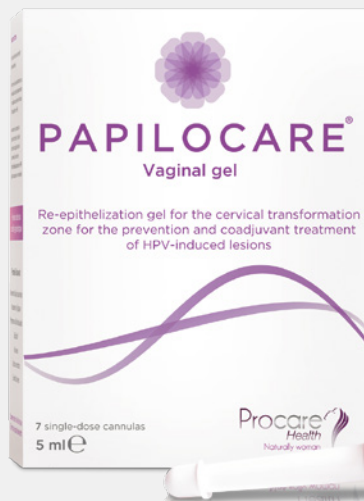

**p=0.0034

ClinicalTrials.gov Identificador: NCT 04002154

RECOMMENDED TREATMENT DURATION: 6 MONTHS

Instructions for use:

Insert a single-dose cannula into the vagina, preferably before bedtime. Start treatment after period. The recommended posology is one single-dose cannula for 21 consecutive days, then one single-dose cannula every other day for the 5 following months (off during the period).

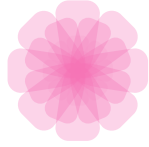

Recommended for:

- Controlling and aiding reepithelization of the cervical transformation zone to prevent the risk of HPV-induced lesions (LSIL)
- Adjuvant treatment of HPV-induced intraepithelial lesions
- Repairing and aiding reepithelization of cervico-vaginal mucosa lesions
- Treatment of dryness of the cervico-vaginal mucosa
- Rebalancing the vaginal microbiota
- Improving vaginal health
- Creating the conditions for a rapid healing of lesions caused by scratching due to stinging or itching
- Forming a protective film that quickly reduces discomfort, creating the proper conditions to favor the natural healing process

◇ Low grade lesions: ASCUS / LSIL

PALOMACARE®

Innovation in vaginal health

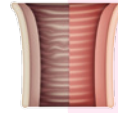

Moisturizing and repairing treatment

For **93%** of both patients & doctors,
Palomacare® is better or much better
than other existing treatments.*

*Santiago, et al. "Evaluation of the Benefits of a Newly Marketed Vaginal Gel (Palomacare®) on Vaginal Health of Peri and Postmenopausal Women (Atravag Survey)". EC Gynaecology 7.3 (2018): 104-106.

Solutions FOR
today's **women**

- Moisturizes and repairs the vulvo-vaginal mucosa.
- Re-balances the vaginal microbiota.
- Improves vaginal health.

Vulvo-vaginal Treatment line

Vaginal gel: moisturizing and repairing the vaginal mucosa

Indicated in these situations:

- Non-specific vaginitis and cervicitis
- Peri and postmenopause
- Episiotomy, postpartum and lactation
- Usage of hormonal contraceptives
- Radio and chemotherapy

Vulvar gel: moisturizes and repairs the vulvo-genital area

Appropriate in situations that produce dryness and/or irritation, itching or discomfort in the vulvo-genital area

- Hormonal changes in childbearing age (Postmenstrual, post-partum...)
- Peri and postmenopause

Improves sexual intercourse. Compatible with condoms.

Female Genitals Hygiene line

- For external daily hygiene in women of all ages
- Relief of irritations and itching of the vulvar and perineal area
- High tolerance formula based on botanical extracts (tea tree oil).
- Enriched with Betaine and emollient agents which soften and calm the intimate zone
- pH slightly acid suitable for external genital area, maintains the balance of the microbiota
- Indicated as a complement of the vaginal gel for hormone imbalance, menstruations, pregnancy, peri and postmenopause

Palomacare® cleansing foam 150 ml bottle

- Moisturizing and emollient action
- Sensitive foam, pleasant texture
- Recommended for frequent washes

Palomacare® travel pack sensitive cleansing foam 50 ml bottle

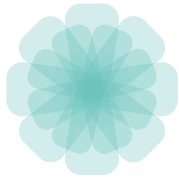

- More convenient at all times (out of home, travelling, working, during menstruations, after sport, before a medical consultation, etc.)

Palomacare® vulvar sensitive gel 150 ml bottle

- Gentle enough to be used daily.
- Smooth gel, pleasant application.

LIBICARE®

Setting butterflies free 

100%
NON HORMONAL
Natural ingredients

UNIQUE DUAL EFFECT
DESIRE & AROUSAL

Food supplement

Promotes sexual desire

FOOD SUPPLEMENT MADE FROM NATURAL INGREDIENTS WHICH HAVE POSITIVE EFFECTS ON IMPROVING THE SEXUAL FUNCTION IN WOMEN WITH LOW SEXUAL DESIRE

LIBICARE®

DOUBLES THE FREQUENCY OF SEXUAL ACTIVITY IN WOMEN¹

INTENSIFIES AROUSAL AND OTHER VARIABLES OF SEXUAL FUNCTION IN WOMEN¹

SIGNIFICANTLY INCREASES THE LEVELS OF FREE TESTOSTERONE, A KEY MEDIATOR IN FEMALE SEXUAL DESIRE^{1,2}

- Clinical results observed from the second month on^{1,3}
- Improves the different parameters of sexual function: desire, arousal, frequency and orgasm^{1,3}
- In population in childbearing and postmenopausal age^{1,4}

TRIGONELLA (*Trigonella foenum-graecum*)

Positive effect on sexual function. Improves desire and arousal, increases free testosterone concentration¹.

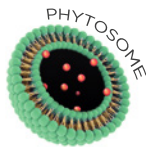

TRIBULUS (*Tribulus terrestris*)

Improves desire in women with female sexual interest/arousal disorder⁴.

PHYTOSOME OF Ginkgo biloba

Facilitates blood flow and has a relaxing effect on smooth muscle, an important process for the sexual response in women⁵.

DAMIANA (*Turnera aphrodisiaca*)

Used as an aphrodisiac, it has an aromatase inhibitor effect which can lead to an increase in free testosterone².
