

# Shaping the future of chemical manufacture

Our company was founded on two principles;

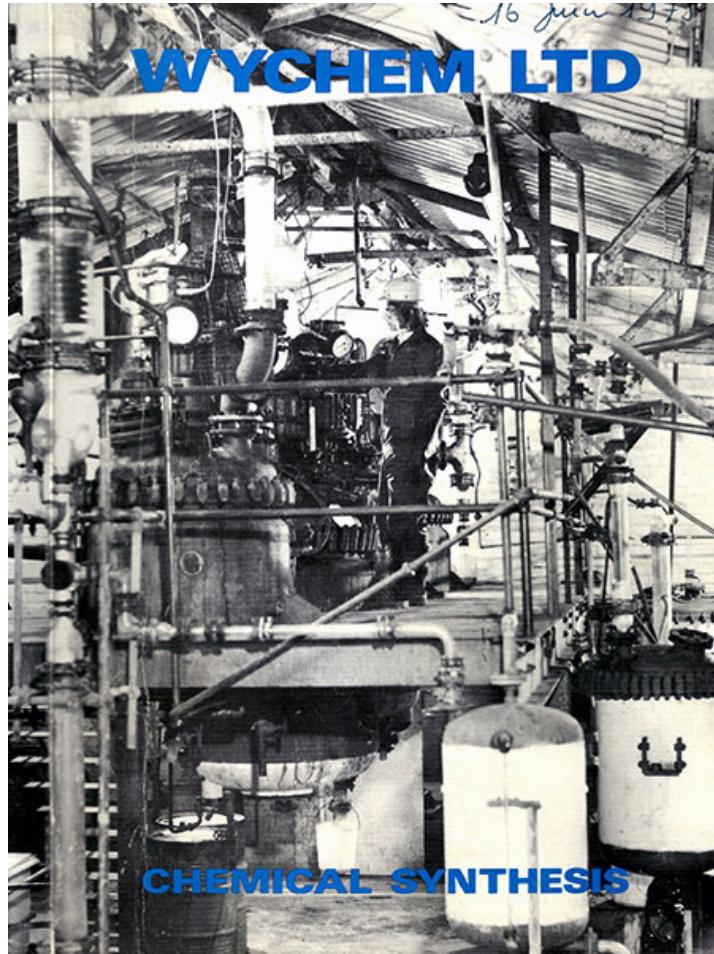

## People and Technology

We combine classical organic chemical synthesis technologies with specialized reaction capabilities based upon our core halogenation competences.

1968  
**50**  
2018

# Half century of history

Company brochure 1975

## 1968

Company founded,  
manufacturing  
specialty chemical  
products

## 1980

Acquired by Vickers  
Plc to bring the  
supply relationship  
between Wychem  
and Howson  
Algraphy (A Vickers  
subsidiary) in-house.

## 1986

Wychem divested to  
Philipp Brothers US  
by Vickers during a  
period of financial  
difficulty

# 2005

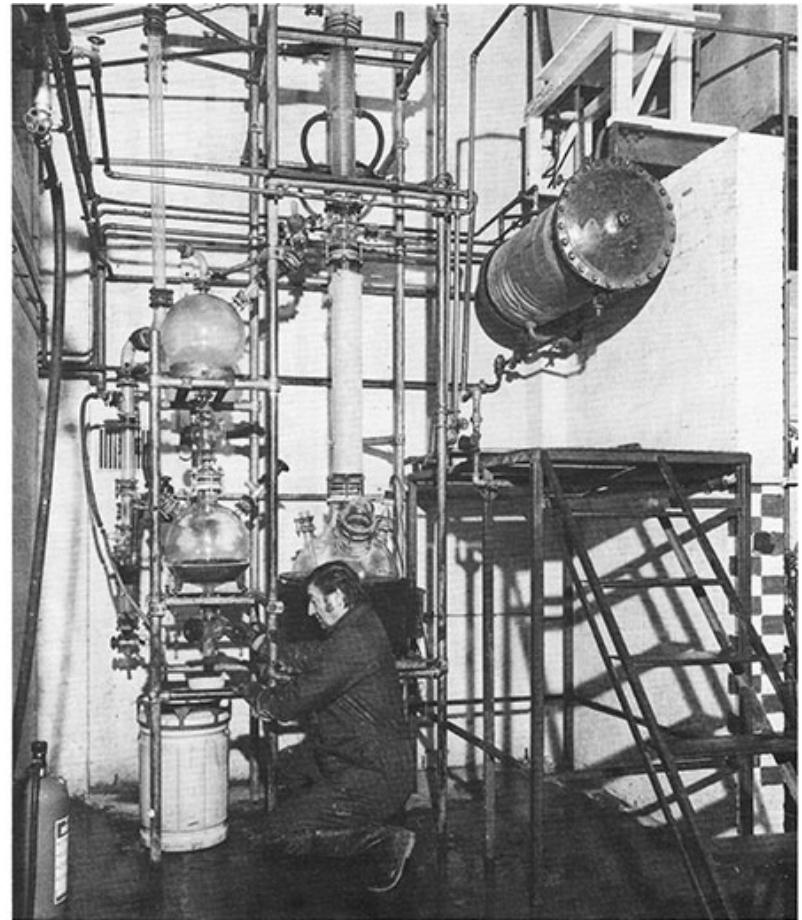

Sold by Philipp Brothers  
to private investors  
during portfolio  
rationalisation

# 2012

Acquired by Isochem SAS

# 2016

Acquired by Aurelius AG

A 50 litre high vacuum fractionation plant. This and a 100 litre unit are available for distillation of customers material. This service would be of particular interest to customers wishing to have high value essential oils purified.

Aurelius is a multi-asset manager with activities across Europe. As an active investor with over 100 functional experts from different fields, we seek out special opportunities, develop successful strategies, and execute them to realise their full potential.

Aurelius has a current portfolio of 24 companies, EUR 3.5bn in sales from range of industries including 3 chemical manufacturing companies in the UK.

# A Fine Chemical Manufacturer

Using our own process technology, we produce starting materials and multi step intermediates for the synthesis of pharmaceutical API's and for use in the electronic applications.

We are able to offer a range of reactions but specialise in the production of aromatic compounds and halogenation.

**Direct Bromination**

**Direct Iodination**

**Diazonium / Sandmeyer reactions**

Wychem offers custom manufacturing of organic intermediates in exclusive conditions on a confidential basis.

# Our markets

Our products are widely used in pharmaceutical, electronics  
and other specialised industrial market applications

## Pharmaceutical

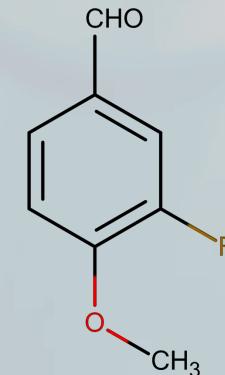

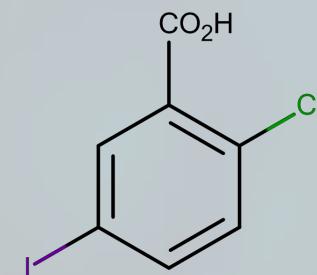

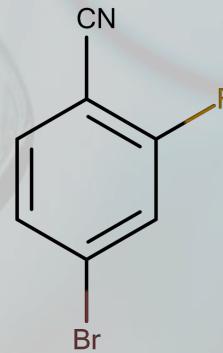

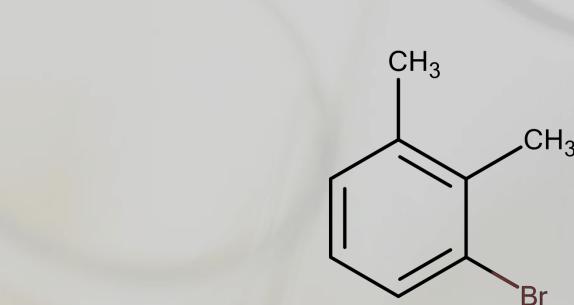

## Electronics

# Our chemicals

A comprehensive range of more than 1000 aromatic compounds.

# Global clients

# Achievements

- ✓ Quality approvals from major pharmaceutical companies
- ✓ Frequently audited by our customers
- ✓ Long term co operation and development agreements
- ✓ Strict quality procedures
- ✓ We operate with discretion and confidentiality

# Our team

We have been manufacturing fine chemical compounds in the UK for more than 50 years.

Our highly skilled team is flexible, responsive and adaptive to customer requirements.

# Our factory

- R&D Laboratory
- Pilot/Small scale kilo laboratory
- 18m<sup>3</sup> of glass lined reactors, ranging from 135-2250L
- Centrifuge and filtration isolation equipment
- Distillation
- Ventilated over drying capacities
- QC laboratory

# Research & Development

- ✓ A modern and fully equipped Research & Development laboratory
- ✓ 5% of revenue reinvested in R&D every year
- ✓ Equipped for solids and liquids
- ✓ Equipment capability from labs, through kilo lab to full scale commercial plant on same site - our offer encompasses grams to tons.

# Quality

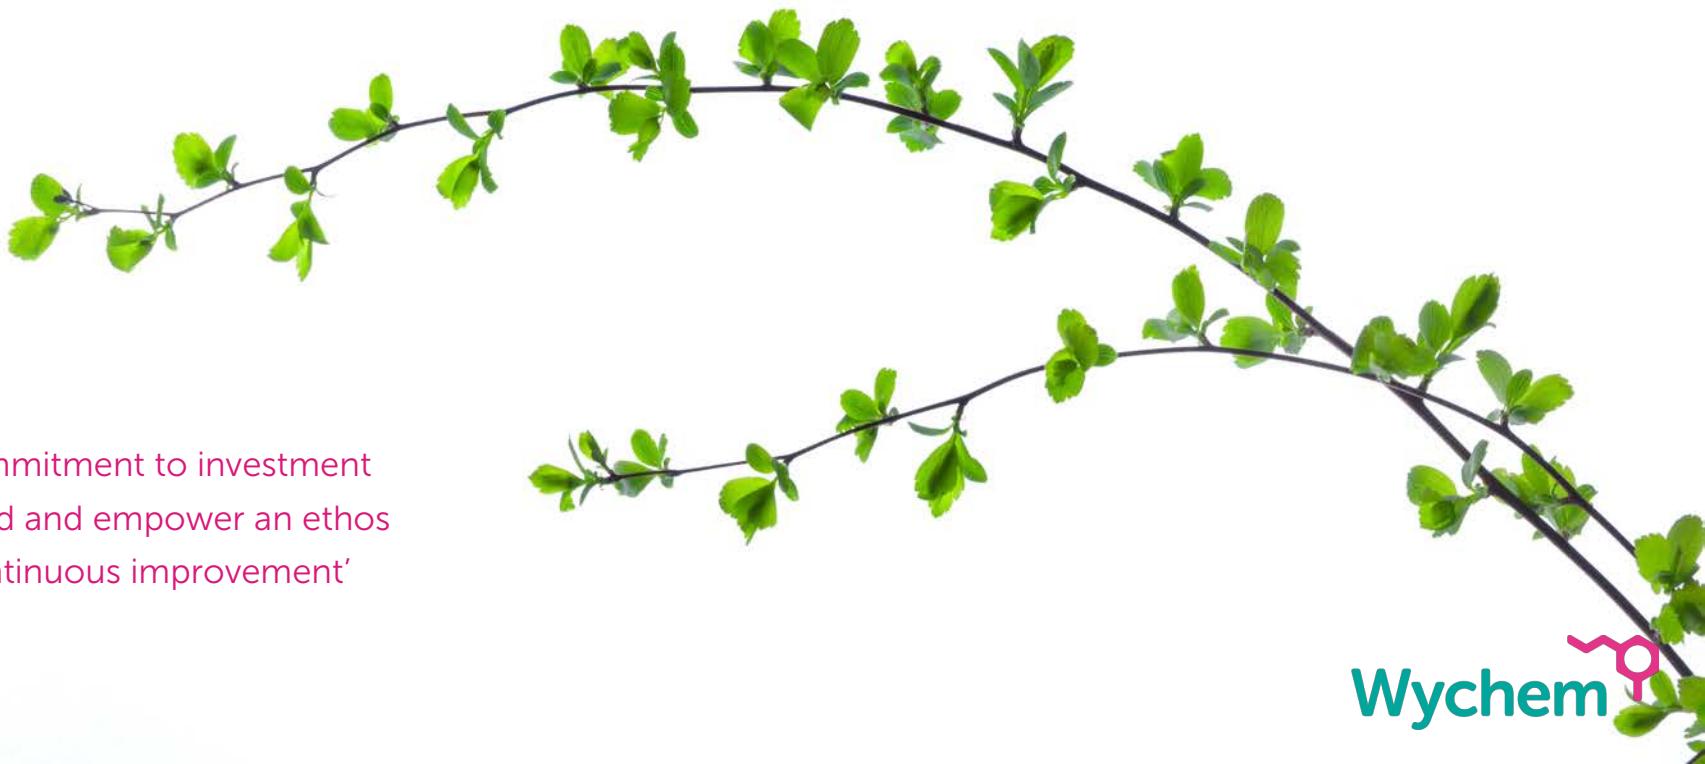

- ✓ ISO9001/2015 Quality Certification
- ✓ Comprehensive ERP system of unique barcoding for every product component enables setting of quality objectives and performance reporting
- ✓ Integrated Quality Management System evidences and supports a qualitative culture
- ✓ Our own dedicated QC laboratory

# Respect for the environment

To achieve sustainable growth, Wychem is committed to providing high quality products and services, a safe and healthy workplace, work and business practices that are in compliance with all statute, legislation and environment regulations in order to exceed the expectations of our customers and workforce alike.

'A commitment to investment  
to fund and empower an ethos  
of continuous improvement'

# Our future

Coming soon...

A new purpose-built modern  
manufacturing site
