

DenaVin 3[®]

DenaVin 3[®] sublingual spray 400 IU vitamin D3
DenaVin 3[®] soft gel capsules – 2000 IU vitamin D3

The power of the sun, all year round

Vitamin D deficiency is very common and may result from various factors:

- Insufficient exposure to sunlight
- Use of sunscreen and protective clothing
- Darker skin tone
- Low dietary intake of vitamin D
- Increased vitamin D requirements, such as during pregnancy, breastfeeding, older age, overweight, or certain medical conditions associated with impaired intestinal absorption

Why is vitamin D important?

- Contributes to the normal absorption and utilisation of calcium and phosphorus
- Helps maintain healthy bones, teeth, and normal muscle function.
- Contributes to the normal function of the immune system.

DenaVin 3[®] sublingual spray 400 IU 400 doses

- The 400 IU dose is suitable for adults and children.
- Helps maintain optimal vitamin D3 levels in individuals at risk of vitamin D deficiency.
- Free from preservatives, flavourings, and sweeteners.

With a simple spray under the tongue ensures rapid absorption of vitamin D into the bloodstream.

DenaVin 3[®] soft gel capsules – 2000 IU 60 capsules

- The 2000 IU dose is suitable for most adults.
- Helps maintain optimal vitamin D3 levels in cases of insufficient sunlight exposure and other conditions that may impair the body's natural vitamin D3 synthesis.

Harness the power of the sun to support bone health and the normal function of the immune system with just one vitamin D3 capsule a day.
