We Specialize In

-  Outserts & Inserts
-  Medication Guides
-  Booklet Labels
-  Printed Leaflet
-  Carton Boxes
-  PET Bottles
-  Labels
-  Regulatory Artwork Design

OUR PRODUCTS

Inserts and Outserts

Inserts provide essential drug details, while outserts are folded leaflets with extensive information in compact packaging.

ECL Labels (Booklet Labels)

ECL (Booklet Label) is a multi-layer label that provides extra space for detailed product information on compact packaging.

PET/HDPE Bottles

Lightweight, strong, and versatile, ideal for pharmaceuticals, cosmetics, and household use. Available in various sizes & shapes.

Single, Two, Three Ply and Reverse-Printed Labels

Multi-ply and reverse-printed labels for efficient branding, compliance, and detailed content.

Twinerts

Twinerts combine two leaflets, often in different languages, to deliver dual information compactly.

Medication Guide and Multi-colour Leaflet

Medication Guides are FDA-required leaflets for safe drug use, while Multi-Colour Leaflets enhance readability and branding.

OUR PRODUCTS

Efluite Box & Mono Cartons

Efluite boxes ensure durable packaging, while mono cartons offer a cost-effective solution for various products.

Temperature Sensitive/ Holographic, Tamper-Evident Labels

Temperature-sensitive labels monitor products, holographic labels prevent counterfeiting, and tamper-evident labels ensure safety.

Seal & In-Mold Labels (IML)

Seal labels secure packaging & prevent unauthorized access, while in-mold labels (IML) provide seamless, durable branding integrated into plastic.

Auto Injector Box

Secure and user-friendly packaging designed for safe storage, with an integrated medication guide for clear instructions.

Alert Cards & Hanger Labels

Alert cards contain critical information and required actions, while hanger labels display product details clearly.

Dosing Cup Packaging and Vial Cartons

Dosing cup packaging securely organizes cups for safe handling and protection, while vial cartons are designed to store and protect vials during transport.

We use the latest and most sophisticated folding system to meet the growing demands of the medical industry.
