

SoftGroup® SaTT AS Surface Camera

Aggregation machine with surface camera

SoftGroup® SaTT AS with a surface camera is an aggregation machine for scanning of bundles or sets of cartons through a semi-automatic process.

The machine scans each printed 2D Data Matrix code printed on the cartons and prints aggregation labels (with SSCCs). Additionally, the aggregation, deaggregation and reaggregation process on case level could be managed through this module.

MAIN FUNCTIONALITIES

- Aggregation of the various size of the cartons without size limits of the cartons
- Scan 1D and 2D Data Matrix barcodes
- Verification of 2D Data Matrix codes according to the EU and CIS requirements as well as GS1 standards
- Print an aggregation label, including 1D barcode
- Reworking station mode – The machine allows a barcode string check and decommissioning of the aggregation number (SSCC) are available

KEY FEATURES

- The highest quality of supplementing equipment
- Large touchscreen display
- User-friendly interface
- Aggregation/Deaggregation/Reaggregation bundles/ cartons and Decommissioning labels at case level
- This module ensures various format flexibility of boxes and cases
- Software and hardware could be adapted according to the requirements and standards for different markets such as Europe, CIS countries, MENA region, North Africa, etc.
