Allpresan[®]

Medical foam foot care

MA

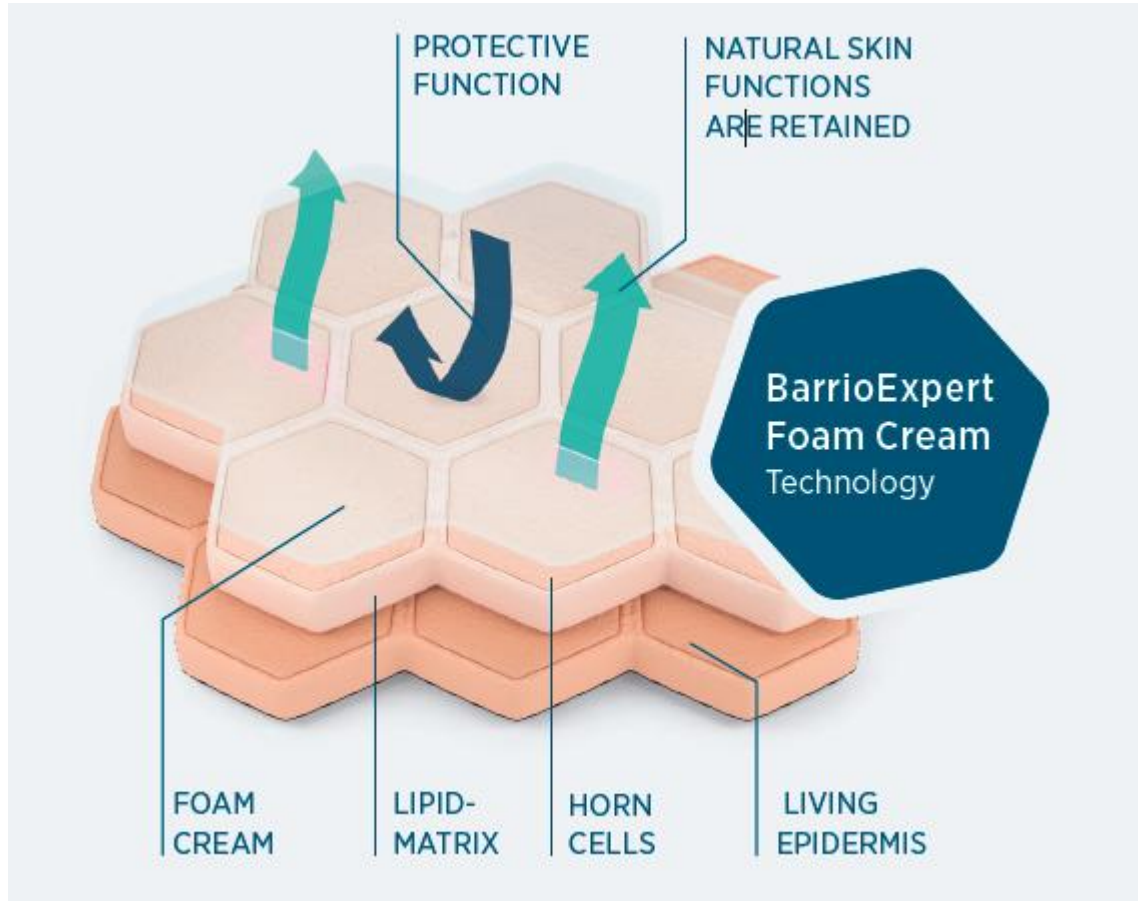

We are specialists of foam creams

MEDICAL FOOT CARE WITH A UNIQUE TECHNOLOGY.

Our product range is focused primarily on
high-quality foam creams.

The patented technology of Barrio Expert

The Barrio Expert Technology

- ✓ Nourishes like a rich emulsion and is more efficient than conventional creams and emulsions
- ✓ Forms a breathable protective network inspired by modern textiles – for optimal skin protection

Allpresan Products provide four Key Benefits.

- **Gentle and Irritant-Free:** Pleasant on the skin, free of irritants, and suitable for sensitive skin.
- **Easy Application:** Spreads evenly, absorbs quickly, and leaves no residue.
- **High Coverage:** Ensures excellent, efficient product distribution.
- **Breathable Protective Mesh:** Creates a breathable barrier that prevents moisture accumulation similar to modern textiles.
- **Supports Skin's Natural Protection:** Strengthens the skin barrier to prevent bacterial and fungal penetration and help maintain healthy skin.
- **Nourishing Ingredients:** Contains valuable ingredients that nourish the skin and address specific skin issues.

The Allpresan Portfolio consists of two Product Worlds.

Allpresan[®]
pedicare

Foot care for
sensitive to very dry
skin and nails.

Allpresan[®]
diabetic

Prophylaxis, treatment
and care for diabetic
foot skin.

fragrance!

Clinical study confirms : Effectiveness after 4 week*.

The Allpresan Foam Cream No 3 causes significant improvements of various skin conditions such as dryness, cornification, distension and itching.

KEY RESULTS

- **Reduction of Skin Dryness:** After 4 weeks, participants experienced a 62% reduction in skin dryness.
- **Reduction of Calluses:** The product contributed to a significant 51% reduction in calluses.
- **Reduction of Itching:** A 71% reduction in itching was reported, showing that the product helps soothe irritated skin and relieve common symptoms such as itching.
- **Reduction of Skin Tightness:** Participants noted a 69% reduction in skin tightness, indicating that the product helps maintain skin elasticity, leaving the skin feeling more comfortable and flexible after regular use.
- **User Satisfaction:** 92% of participants expressed satisfaction with the product, stating they would recommend it.

Medical Foam Creams for diabetics skin

1

Especially formulated
to meet the needs of
diabetic skin

2

Patented technology
