

Bridging the gap from API to product

Drug product development where every milestone is tailored for you

Expertly solving complex challenges

Our comprehensive R&D formulation capabilities combined with our tightly integrated analytical expertise, allow us to support you in advancing your development. Our services leverage a multidisciplinary approach to design formulations, taking into account factors such as release, bioavailability, stability, and manufacturing scalability.

Analytical insight that drives progress

Comprehensive analytical services covering method development, dissolution profiling, stability testing, excipient analysis and reverse engineering. Designed to deliver precision and control through every stage.

Structured solutions that flex with your needs

Our approach is tailored to each project's needs, creating a clear path forward while minimising risk during development. By balancing structure with flexibility, we give every medicine the best chance to reach the patient.

Straight to the solution

Faster to market

From innovative formulation development through to full-scale commercial production, we use our expertise to streamline development, scale up and manufacturing, and deliver reliable outcomes

Smarter problem solving

Draw on the perfect mix of technical expertise and practical thinking with solutions designed to work in the real world.

Integrated services

Move smoothly from development to production with connected services across the Ofichem Group.

Key highlights

- 25+ years of formulation development and analytical experience
- Expertise across a wide range of dosage forms: tablets, capsules, injectables, oral solutions, gels, sprays
- Controlled-release and fixed-dose combination formulations
- Reverse engineering specialists
- Unique excipient analysis platform
- Seamless transfer to GMP manufacturing

Talk to our team to find out how you could accelerate your next development project — **with us beside you.**
