

Bacillus clausii

Oral Suspension

Bacillus clausii oral suspension is a probiotic supplement administered for the safe and effective management of antibiotic associated diarrhea in adults and children. Our strain is widely used, well documented, safe and stable spore forming probiotic bacteria which promotes gastrointestinal health

Characteristic of strain:

- High tolerance to acid, sugar & salinity
- Shelf stable & require no refrigeration
- Survive gastric juice and bile salt

Availability

- Live spores suspended in 5ml of water in ampoule
- 2/4 billion CFU per 5ml ampoule (1 pack contains 10 ampoules)

A complete process integration from strain production to end formulation under the same facility ensures quality and reliability to our partner companies

About Sanzyme Biologics

With over five decades of expertise, Sanzyme Biologics stands as a pioneer in probiotics, specializing in the development and manufacturing of probiotic strains and fermentation derived ingredients

As one of India's largest probiotic manufacturers, we are committed to delivering trusted, science-backed solutions that support health and wellness through balanced microbiota management
