

Barbados National Pharmaceutical Sector Strategy

Barbados is building a sovereign, export-oriented pharmaceutical industry designed to strengthen medicine security at home and across the Caribbean. The National Pharmaceutical Sector Strategy sets the roadmap to develop world-class regulation, manufacturing, talent, innovation and investment, while using regional partnerships and procurement pathways to reach CARICOM and wider markets.

By 2031, the ambition is a commercially sustainable sector producing high-quality essential medicines, creating skilled jobs, and reducing the region's dependence on imports. **From importing medicines to producing health security.**
