

BLUE JET
HEALTHCARE

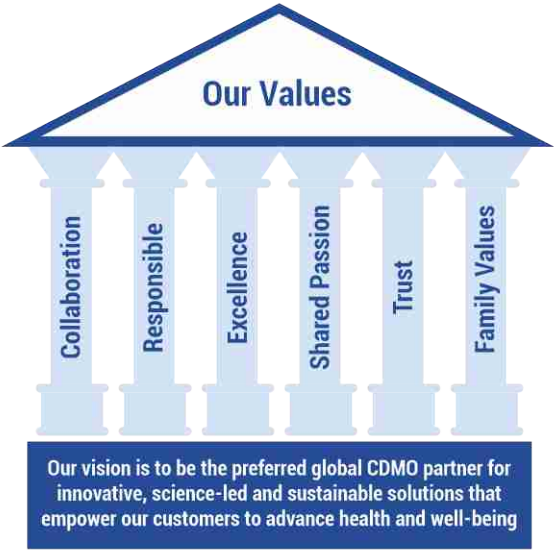

**BLUEJET
PROFILE**

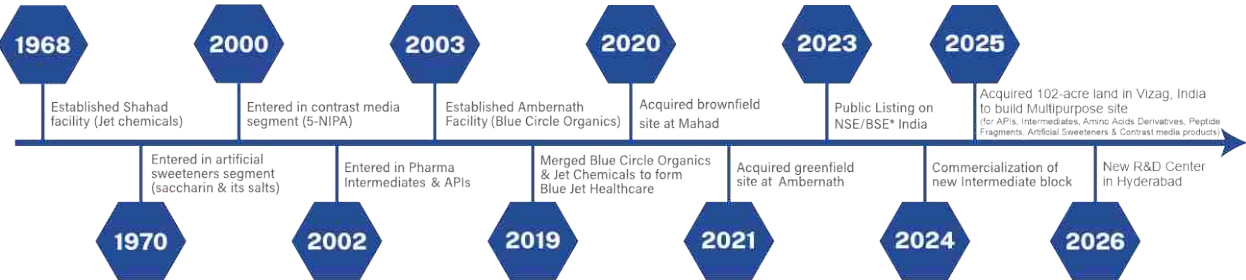

www.bluejethealthcare.com

About Us

Blue Jet is a global, science-driven organization with over 50 years of experience in the pharma and healthcare industry. We are key player in Saccharine and Contrast Media intermediates and also evolved as a strategic partner for CDMO for excipients, niche intermediates, amino acid based derivatives and key building blocks for peptides, APIs, and NCEs. By leveraging our process chemistry expertise, engineering capabilities, and commitment to sustainability, we aim to create lasting value for our partners and advance sustainability.

Our Journey

*National Stock Exchange/Bombay Stock Exchange

Our Business Segments

Blue Jet operates in following business segments thru its portfolio products offering as well as Collaboration, Development and Manufacturing (CDMO) business model

ONE INTEGRATED TRUSTED INTERMEDIATES & APIs

Preferred CDMO Partner

- Scaling from "Grams to Tons"
- Collaboration, Development & Manufacturing

PROTECTED AMINO ACIDS AND IT'S DERIVATIVES

Boundless Opportunities

- L&D Configurations
- FMOC, BOC, CBZ, BZ, Esters
- Unnatural Amino Acids
- Linkers & Excipients
- Solid & Solution Phase Peptide Synthesis

CONTRAST MEDIA INTERMEDIATES

Excellence Powered by Expertise

- Iodinated
- Gadolinium

ARTIFICIAL SWEETENERS

Pioneer in High Intensity Sweeteners

- Saccharin
- Calcium Saccharin
- Sodium Saccharin
- Sucralose

1 USFDA

Approved
Facility

70%

of energy through
renewable sources

Expanding
R&D and
Manufacturing
Capacities

1200+KL

Reaction capacity
across
4 facilities

46

Products
Commercialized

Our Facilities

Development Centre

- 2 R&D center
- In-house analytical support
- Proof of concept, process development to technology transfer to commercialization
- Dedicated labs for Peptides, Enzymatic chemistry, Polymorphism, APIs & Flow Chemistry

Pilot Plant

- Kilo lab
- Small volume pilot plant

Manufacturing

- 5 Manufacturing sites
- 1200+ KL capacities
- 1 site approved by USFDA
- 70% of energy thru renewable sources
- Capacity expansion at 102 acre green field site (Vizag, India)

Expanding Horizons ... Enhancing Capacities

- Building additional capacities in R&D and manufacturing to keep in step with growing demand of our customers.
- New R&D centre in Hyderabad to fasten development.
- A Multipurpose site with dedicated production blocks for :
 - APIs
 - Amino Acids Derivatives
 - Artificial Sweeteners
 - Intermediates
 - KSM/RSM
 - Building Blocks for NCE/GLP-1/Peptides

Our Global Compliance and Accerditations

Saccharine Accreditation

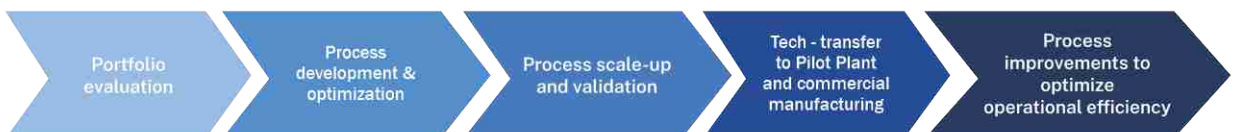

Preferred CDMO Partner

Blue Jet has more than 30 years of CDMO experience partnering with Innovators and generics pharma companies offering our end-to-end solutions from process development to scale up to commercialization with following value propositions:

- Team diversity to support NCE & generic programs
- Strong R&D & Manufacturing capabilities with a focus on sustainability
- Engineering excellence to build green field and brown field projects
- Experienced Leadership team with proven execution capabilities
- Investing in additional capacities to have multi-modular dedicated production blocks to support CDMO projects for :
 - APIs
 - Amino Acids Derivatives
 - Intermediates
 - Building Blocks for NCE/GLP-1/Peptides
 - KSM/RSM

Process Development to Tech-transfer to Commercialization

Protected Amino Acids

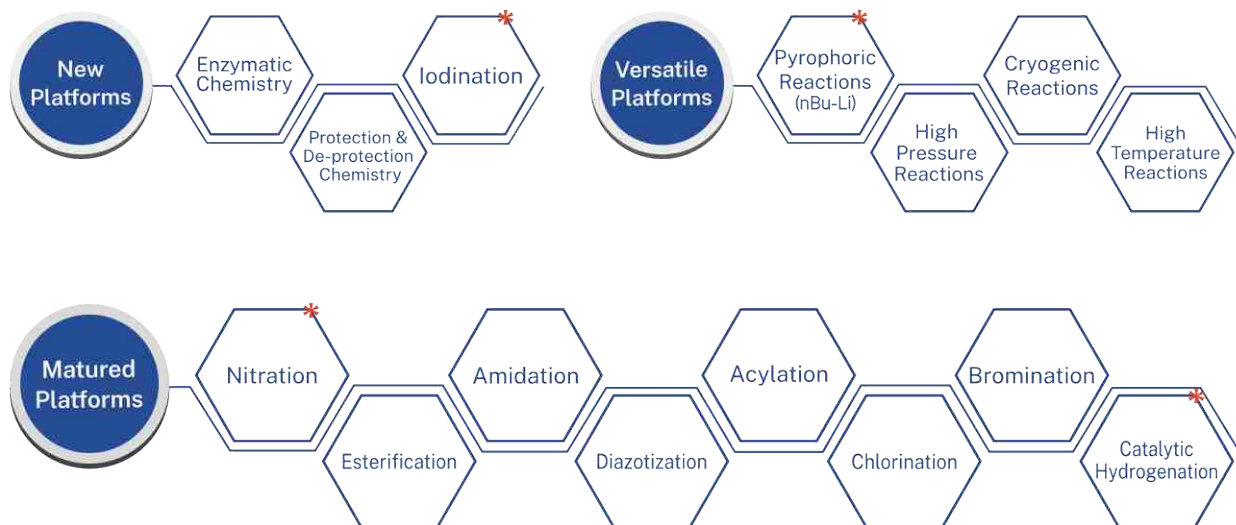

APPLICATIONS

- Pharma
- GLP-1
- Cosmetics
- Food

Solid and solution phase
peptide synthesis

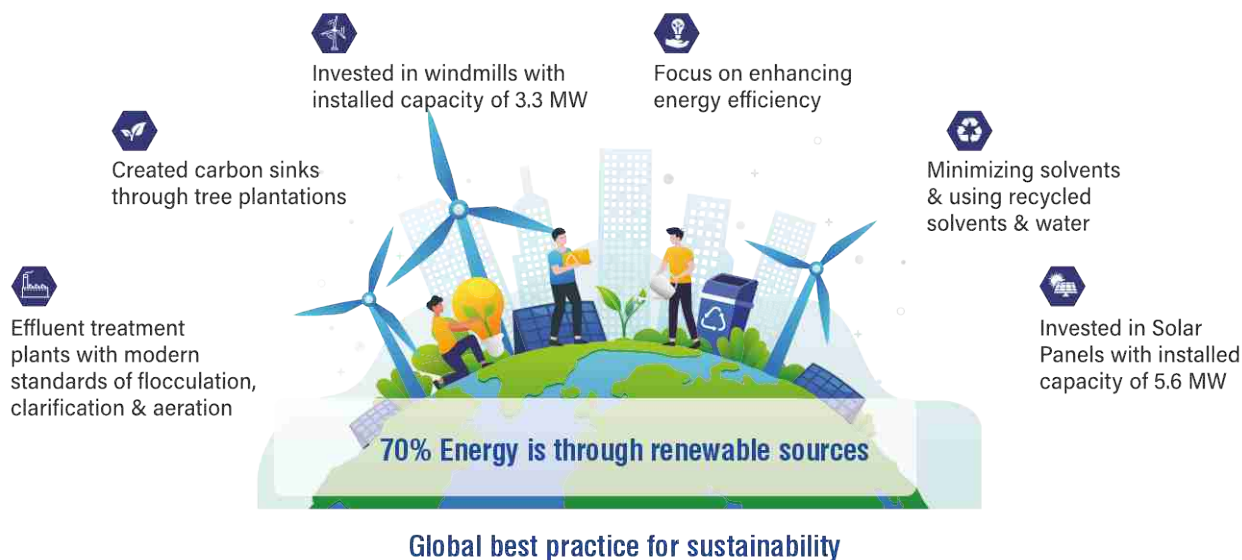

Over the past years, we have expanded our expertise into Amino Acid Derivatives, developing and manufacturing them at a small scale and are in the process of building multi-purpose block to manufacture products under this category. Our growing portfolio includes a diverse range of protected amino acids (FMOC, BOC, CBZ, Esters, Linkers and excipients), each designed to meet the precise requirements of key starting material and/or building blocks for various GLP-1 drugs, other peptide based drug substances as well as used as key starting material for many other small & large molecules.
