

# How FutureInsite supported a CDMO in making data-driven decisions

## Objectives

Support the CDMO in performing a sanity check of project volume data provided by their partner, enabling more accurate, data-driven decision-making and optimized resource allocation.

## Challenge

The CDMO faced uncertainty in the reliability of the partner's data, risking inefficient resource planning and potential capacity issues.

## Solution

### Integrated & Analyzed Data:

Seamlessly processed and validated over 1.2M data points from the partner's project volumes.

### Provided Actionable Recommendations:

Delivered projected volumes and a comprehensive, visually driven report in 10 business days.

## QUANTIFIED VALUE ADDED

### Time Saved

Reduced validation effort by 40%, saving ≈120 hours of team work.

### Cost Avoided

Prevented misallocation costs ≈€480,000 annually (≈2 weeks capacity free-up, client evaluation).
