

COLORMAN

DEDICATED TO
PERFECTION

Colorman is one of Europe's leading print manufacturing companies. Established in 1959, we have enjoyed significant growth through expansion and investment to become one of the largest and most advanced printing and packaging operations.

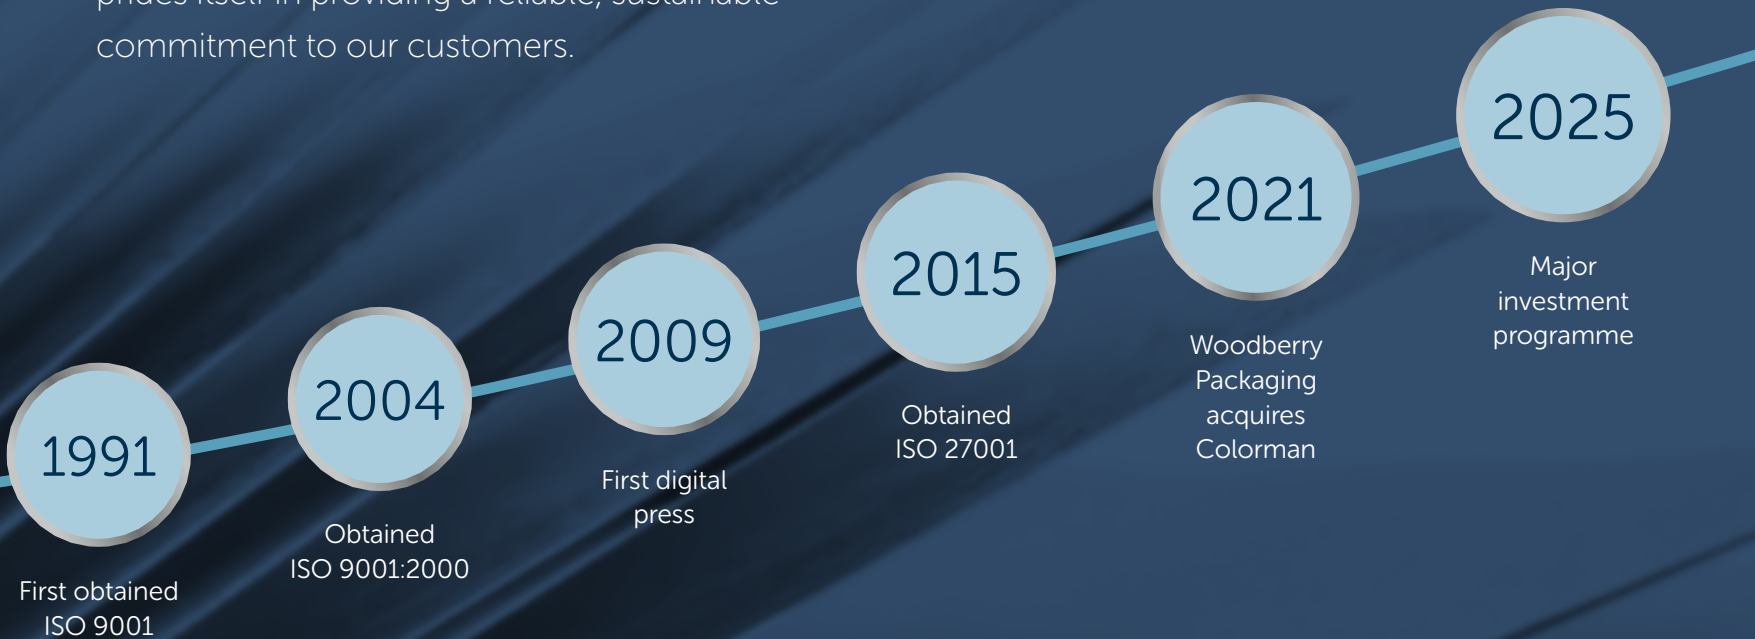

Our story so far...

We work with the biggest brands across a range of sectors including pharmaceutical, medical device manufacturing, IT, retail, finance and government. Providing a complete end-to-end solution from our 210,000 ft² state-of-the-art facility in Dublin.

Our staff have years of experience and Colorman prides itself in providing a reliable, sustainable commitment to our customers.

PRE-PRESS

The Pre-Press Department at Colorman works hand in hand with customers to guarantee artwork meets the highest print standards.

By leveraging management information systems, and advanced computer-to-plate technology, we deliver a streamlined, efficient service that ensures designs are prepared and sent to press quickly and accurately.

Our Pre-Press team specialises in preparing digital files before the actual printing begins, this involves optimising artwork files, correcting errors, managing brand colours, creating a print-ready layout, and manufacturing the physical printing plates that will be used on the printing press. All of these measures ensure the final print job is accurate, error-free, and matches the customer's vision.

PRINTING TECHNOLOGY

At Colorman, we provide a comprehensive range of print solutions, from lithographic to digital print, supported by our ongoing investment in cutting-edge technology.

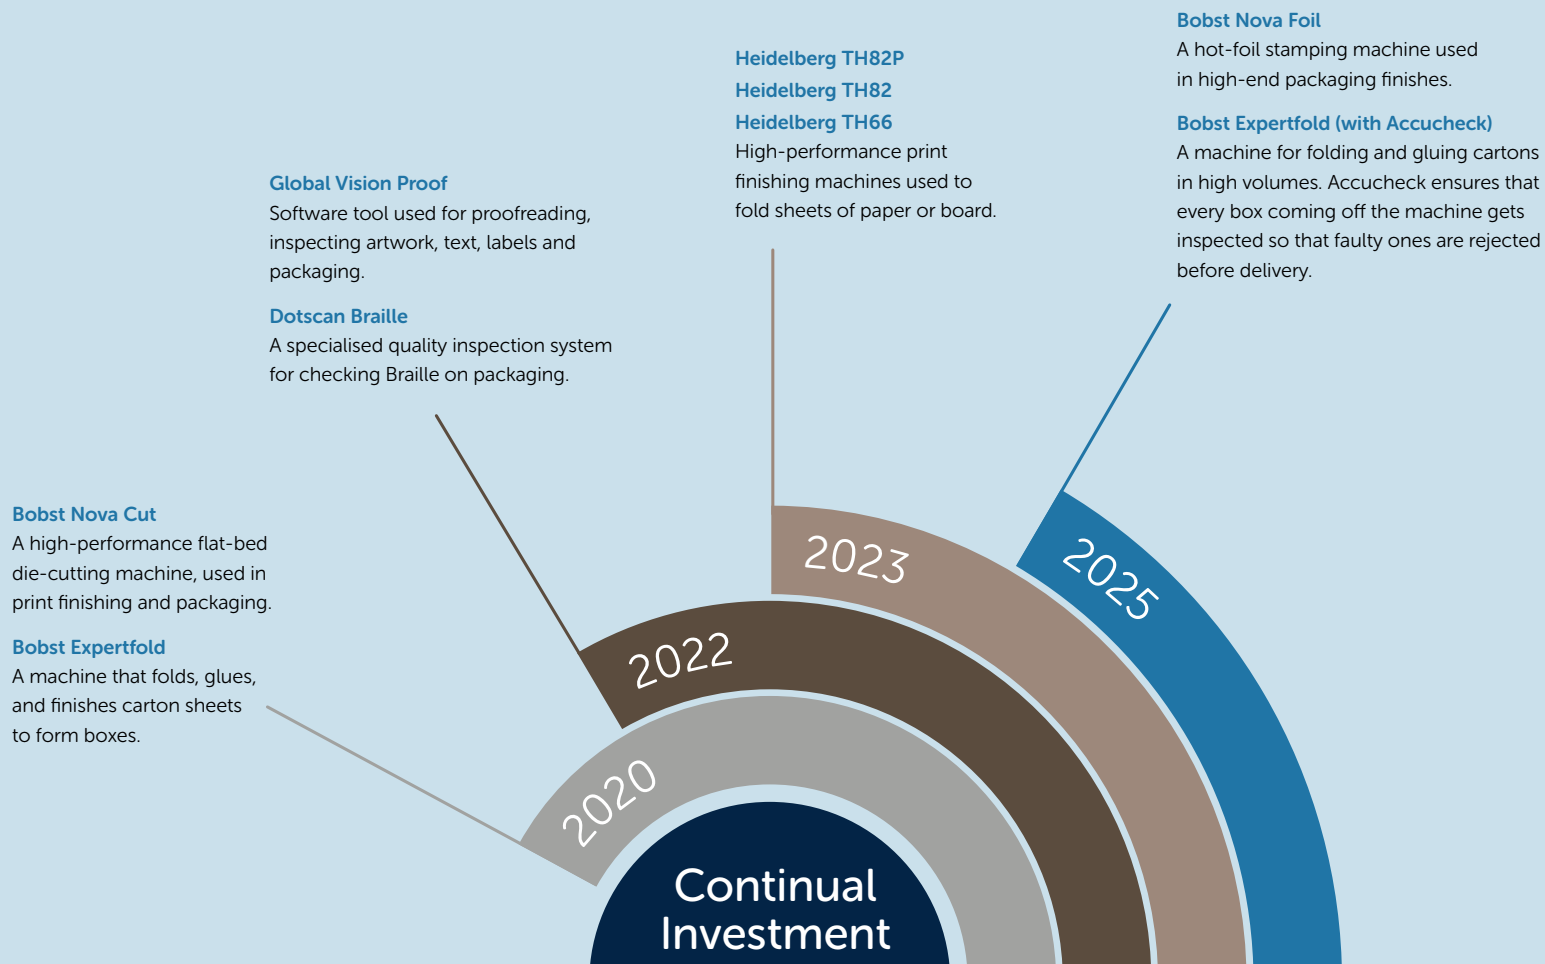

Our advanced machinery and automated processes not only enhance speed and accuracy but also reduce waste, ensuring consistent, high-quality results with every project.

Heidelberg XL Presses

We have a fleet of Heidelberg XL presses in our facility including the XL106 and the XL75. The Heidelberg presses deliver exceptional speed, precision, and reliability, making them one of the advanced printing presses in the industry. Its innovative technology ensures consistent, high-quality output while maximising efficiency for large-volume production.

Our continual investment programme means that Colorman has the latest printing machinery, providing sustainable, quality solutions for businesses across Ireland, UK, Europe and America.

PACKAGING TECHNOLOGY

We have invested in a range of Bobst machines including a state-of-the-art foiler (Novafoil), gluer, die cutter, Accucheck and CartonPack 4.

Accucheck machine

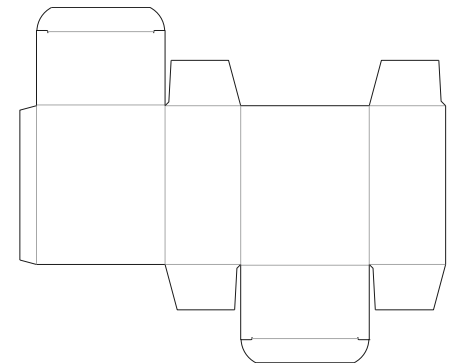

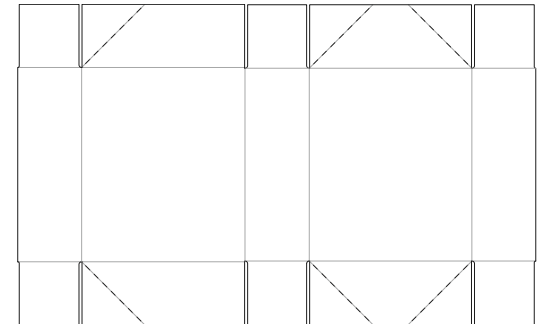

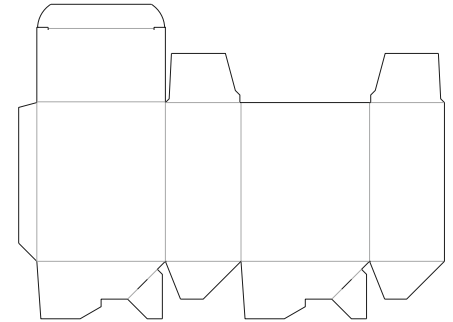

The Accucheck machine is a state-of-the-art quality control system designed to ensure precision and consistency throughout the carton production process. The Accucheck runs in line with our new Bobst CartonPack 4, giving customers the highest quality service. Accucheck uses advanced camera and sensor technology to inspect every printed piece for cosmetic and material defects.

PRINTED PACKAGING

We specialise in high-quality printed packaging, producing cartons, inserts, and booklets tailored to the needs of our clients.

Our extensive product range includes advanced security features – from secure print technologies to tamper-evident designs – providing added protection and reassurance for all customers, especially those in the pharmaceutical and medical sectors.

With flexible production capabilities, we support both small and large-volume runs, offering customised solutions that combine precision, compliance, and reliability, backed by years of proven expertise.

PRINT FINISHES

Our extensive range of in-house finishing equipment allows us to provide high-quality, efficient, and flexible production.

Our print finishes

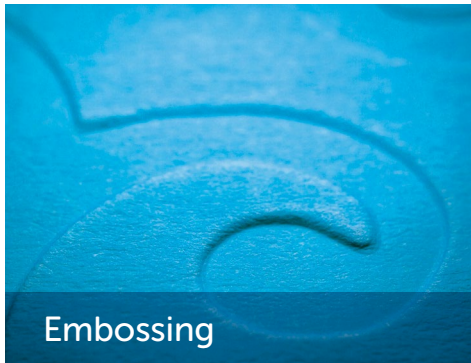

Binding

Saddle Stitching

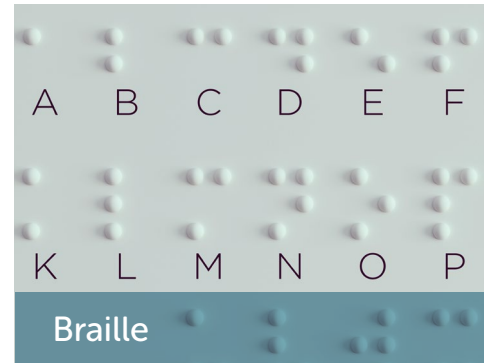

Foiling

Embossing

Debossing

Braille

From high-volume folding and stitching using Heidelberg and Muller Martini lines to advanced binding, laminating, tabbing, and digital finishing, we are equipped to support a wide variety of requirements.

We also offer specialised capabilities, including Mylar tab application, ram punching, paper banding, and the production of one-piece mailers, enabling us to manage complex and bespoke projects effectively.

This comprehensive suite of finishing technology ensures a streamlined workflow, accurate execution, and consistently professional results.

Foiling

We have recently installed the Bobst NovaFoil, allowing us to deliver exceptional quality to our customers. With a redesigned foil feeding system and advanced register accuracy, the Novafoil ensures flawless alignment and consistent results across complex runs, even with intricate designs and fine details.

Braille

Colorman provides Braille options to customers, enhanced with dot scan technology, which is transforming accessibility for people with visual impairments. By embossing Braille directly onto packaging and integrating it with advanced scanning systems, Colorman can ensure accuracy, consistency, and durability of the raised dots.

Bobst Novafoil

The Bobst Novafoil is a hot foil stamping press that's setting new standards for embellishment in the print and packaging.

WAREHOUSING & DISTRIBUTION

Colorman's 30,000 ft² distribution and 10,000 ft² secure warehouse facility supports high-volume, high-security storage with full traceability via barcoding and infrared scanning.

Integrated in real time with our systems and monitored 24/7 by CCTV, we ensure efficient, secure logistics from production to delivery.

Our distribution network has global reach, with current distribution channels across Ireland, Europe, UK and the United States.

CUSTOMER EXPERIENCE

At Colorman, every client is supported by a dedicated account manager who provides responsive guidance and ensures clear communication at every stage of the project.

This personalised approach allows us to anticipate customer needs, address challenges quickly, and recommend smart design solutions — such as reducing packaging size or weight — that deliver both cost savings and sustainability benefits.

“ Colorman is a fantastic partner that consistently exceeds expectations. Their team provides exceptional cartons, labels, and IFUs with an unwavering commitment to quality and customer service that truly stands out as best in class. Beyond delivering reliable, high-quality products, Colorman continually brings fresh ideas and innovative solutions to the table – helping us improve efficiency, sustainability, and overall performance. Their proactive approach, attention to detail, and dedication to excellence make them a trusted and valued partner in every sense. ”

Boston Scientific

QUALITY

Quality and compliance are at the core of our operations. Our production facility is equipped with advanced systems such as Bobst Accucheck and CartonPack4, ensuring precision, consistency, and efficiency in every run.

We maintain the highest industry standards through rigorous audits, strict adherence to SOPs, and continuous oversight by our dedicated Quality Department.

By leveraging high-quality printing solutions from Colorman, manufacturers can ensure that their packaging complies with international standards. This level of precision and consistency in print manufacturing also aids in faster approval processes and smoother regulatory inspections.

SUSTAINABILITY

Sustainability is of utmost importance to us. We are deeply committed to minimising our environmental impact by implementing responsible practices at every stage of our operations.

From using eco-friendly materials and inks to investing in energy-efficient technologies and reducing waste, our goal is to produce high quality print solutions without compromising the health of our planet. Sustainability is not just a policy, it's a core value that guides our decisions and drives us to continually improve and innovate for a greener future.

We are proud to be assessed by EcoVadis, one of the world's most trusted sustainability ratings platforms. We currently hold a Bronze Ecovadis accreditation.

Our EcoVadis certification reflects our commitment to:
