

BETA DRUGS LTD.

(A Division of Adley Group)

Committed to Oncology...

OUR Genesis

An Introduction

The Journey of Beta Drugs Limited (Adley Group) began in early 80's with the ardent efforts of **Late Shri Vijay Batra**. He was a visionary and businessman par excellence. He had foreseen the scope in niche segment like Oncology and laid the foundation of Indian Pharma Multinational in Oncology segment.

From the beginning, he realized that if medicine had to serve their purpose, they first had to be affordable & accessible.

As guided by him, company is focusing on new product development. Comapany is set to launch 23 new products by year 2026 that includes NIB's , NDDS & PARP Inhibitors.

His guiding force behind all the corporate decisions lead Beta Drugs Limited to achieve new heights over the years & became one of the most respected Oncology company in India.

Who we are

You build Hope...

We accelerate it

Because

Every moment of life is precious for cancer patients

Beta drugs limited (Adley group) is the manufacturer of the widest range of anti cancer drugs in India.

We very well understand that every moment of Life is precious especially for cancer patients. Therefore our commitment to act with speed to find innovative solutions that address the unmet needs of cancer patients, and to accelerate access to much-needed medicines at an affordable cost around the world.

Our products are the result of Beta's world class team encompassing thought leaders, clinicians, scientists and commercial strategists who have extensive experience in the area of drug development and commercialization of niche cancer treatments.

Our growing portfolio with the capability of backward integration will bring accessible, affordable, and life-saving treatments to patients, delivering a major contribution to patient care.

OUR Purpose

Our Existence

It is an established fact that cancer is a scourge that has surrounded human beings, big time. With every passing day, it is becoming more crucial to answer this deadly disease with the right efficiency at right time. We have the required infrastructure and knowledge pool to extend our lifecare products and services to combating cancer. We can help them to relive hope.

Beta Drugs Limited, committed to Oncology offers medical treatment options for major cancer types, namely Breast Cancer, Ovarian Cancer, Head & Neck Cancer, Prostate Cancer, Renal cell Carcinoma, Pancreatic Cancer, GI cancer, Colorectal cancer, Brain tumor, Lung Cancer and Blood Cancers.

For us quality is a habit, an inherent ingredient of our products & services. It is an aspect that is our prime focus.

The major reasons for the alarming rate of cancer deaths are the expensive treatment, toxicity of medicines, availability and delay in detection. Hence we accelerate the access to quality, affordable and innovative cancer medicines. Besides this, our prime focus will be extending patient awareness and patient care activities. We aim to touch the lives of people suffering from this deadly disease directly and positively.

" To touch the lives of millions of cancer patients by expanding access to Quality & affordable drugs through cutting edge technology & advance R&D"

Vision

To achieve a sustainable leadership in complex chemical synthesis for anticancer bulk drugs and finished dosages.

Values

Care: We care about the well being of patients, care- givers and the communities, we touch. We care about our colleagues; creating a respectful, diverse and inclusive working environment.

Continuous improvement to create value: We innovate to create value for patients, our partners in the healthcare system and our stakeholders. We constantly look for original and better ways to excel, creating solutions for current and future unmet needs.

Patient first: Patients are the center of each and every activity we do.

Leading way: We are passionate about being first to market and realizing opportunities. We believe that leadership happens with and through people.

Focus and accountability: We are focused on everything we do. We define clear objectives and concentrate our efforts, attention, and energy to deliver. We do what we say and we hold ourselves accountable for our actions and results.

Cost-effectiveness: Work towards to make cost-effective medicine by achieving economy of scale and backward integration of formulations.

Collaboration & Partnership : With the philosophy of partnership, every customer is a partner for us.

OUR Market Reach

Domestic Market

Beta Drugs has a leadership position in Indian Oncology market with 110 SKUs. Products are available in all major corporate hospitals & Govt institutes

Corporate Hospitals

Government Institutes

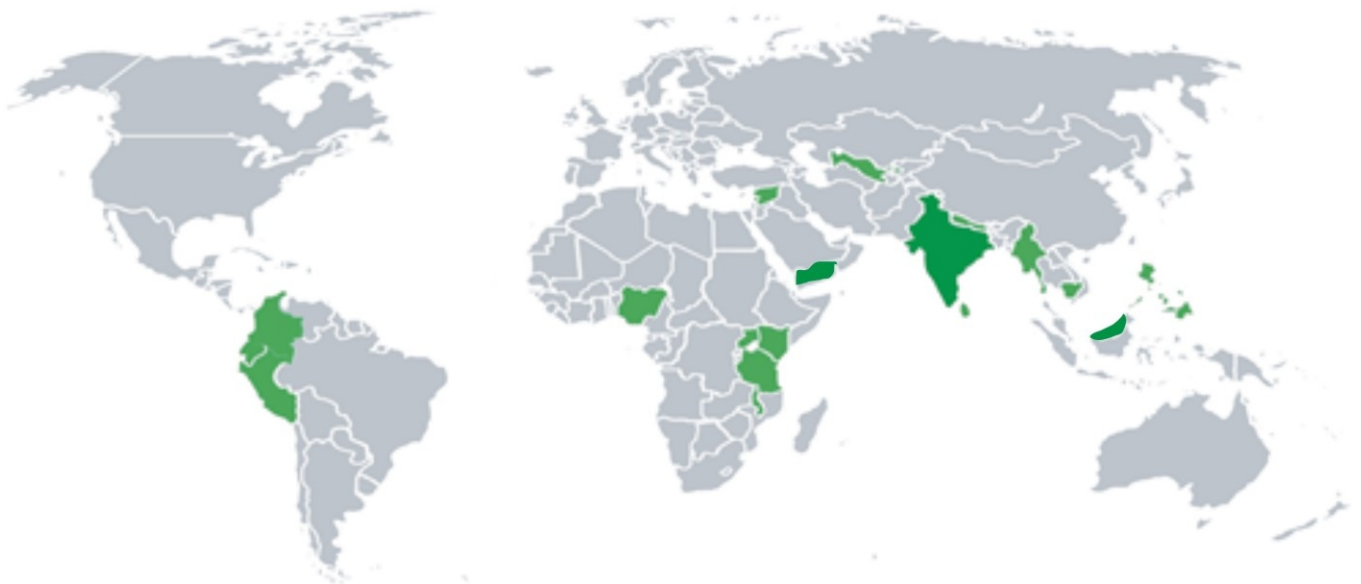

Global Presence

We have employed the best of technologies in our manufacturing process. To further intensify the check on quality levels, we have dedicated quality assurance & quality control team.

Our manufacturing facility consist of an API & formulation plants.

Formulations Plants

BETA DRUGS LIMITED INDIA

Beta Drugs Limited is a state-of-the-art manufacturing facility situated in Nandpur, Lodhimajra Road Solan, Himachal Pradesh, India.

It has WHO-GMP, and other international accreditations. The Unit is also geared for PICS inspections.

The plant has been audited and approved by almost all the recognized pharmaceutical companies of India to manufacture of their products for marketing in the local and overseas markets.

Capacity: 3.5 Million Liquid Injectables
 1.7 Million Lyophilized Injectables
 50 Million Tablets
 10 Million Capsules

ADLEY FORMULATIONS PVT LTD INDIA

Adley formulation pvt Ltd is located in Kotla, Barotiwala, Distt. Solan Himachal Pradesh India.

It is WHO-GMP-approved Facility, dedicated to manufacturing of anti-cancer products (Tablets, Capsules, Injections- Liquid, Lyophilized and Pre-Filled Syringes). This plant also has international accreditations.

Oncology wing

Capacity: 1.5 - 3.3 Million Liquid Injectables
 1.0 - 6.3 Million Lyophilized Injectables
 15-35 Million Tablets
 5 -8 Million Capsules

General Injectable wing

In 2022, Beta Drugs Ltd started manufacturing of general Injectables. This manufacturing facility has a capacity to produce wide range of injections like: High end antibiotics, cardiology, antifungal, Anaesthesia, and Proton Pumps Inhibitors.

“State of Art” manufacturing facility has fully automatic machine for washing, filling and sealing of vials, manufacturing tank with in-built stirrer, Morden Lyophilizers, PFS-filling machine. It also has morden QA, QC, microbiological & PD Lab.

Lyophilize Capacity :

5ml- 10 ml : 2.6 million Vial P.A
20ml- 30ml: 1.8 million Vial P.A
50ml: 0.1 million Vial P.A

Liquid vial capacity

5ml- 10 ml : 12.5 million Vial P.A
20ml- 30ml: 10 million Vial P.A
50ml: 7.5 million Vial P.A

PFS filling capacity: 1.5 million P.A

API Plant

ADLEY LAB. LTD INDIA

Our WHO-GMP approved API manufacturing facility located in Derabassi, Punjab India.

It meets the cGMP standards and comply with all statutes of Pollution control, Environment, Health and Safety parameters. It is equipped with latest equipments at Lab scale, Kilo scale, pilot scale & commercial scale.

Our facility has technically and professionally competent to handle all the associated and inherent hazards and risks while manufacturing Oncological range of APIs. As a mandatory safeguard and to ensure maximum protection to staff handling oncology products, utmost care is taken to avoid cross-contamination and possible exposure to lead hazards.

we are going to expand our wings in the European & semiregulated countries such as Russia & other parts of the world.

Capacity: Line 1: 60 Tonnes P.A
Line 2: 30 Tonnes P.A.

OUR Strength

Quality

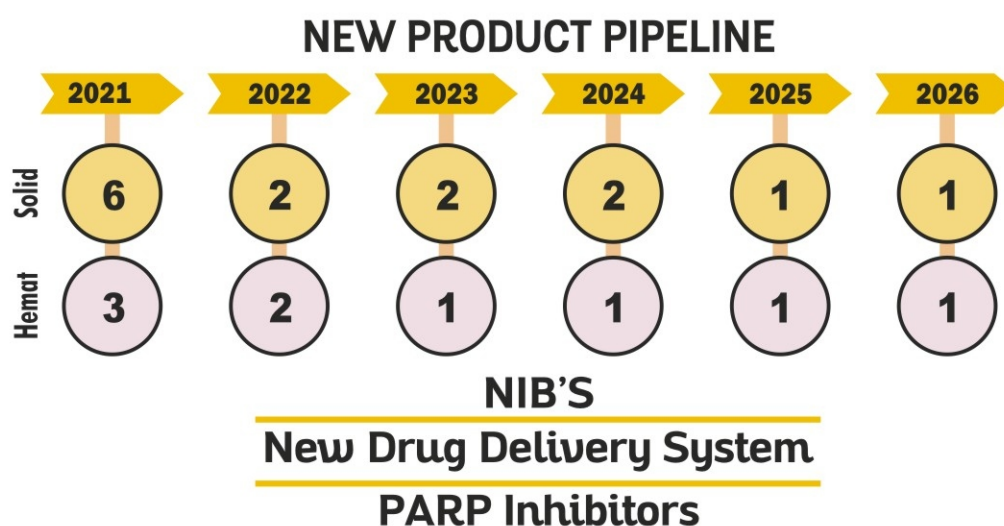

We are committed to excellent quality and to being the best in the industry.

Formulations & Development

Beta Drugs limited is amongst a handful of Indian Oncology companies to foresee the importance of R&D and invest heavily in these activities. We have highly accomplished team of dedicated scientists for process and analytical work.

We are extensively working for NDDS like Liposomes, Nanoparticles, or Micro-particulate systems. We are one of the few Indian companies who have successfully developed & commercialized Nanoparticle –Albumin–Bound Paclitaxel, Ready to use Docetaxel & Gemcitabine, Azacitidine oral.

We also have one of the richest product pipeline of targeted therapies which at different stages of development.

API Development

Strong In-House API Development with backward Integration provides us the key competitive advantage.

We always intend to improve process that can give cost advantage. Our team is constantly working on novel route of synthesis & process elegance. We have also adopted environment friendly green & safe technology.

Expanding Our Expertise to

Cosmetic Dermatology

Beta Drugs Limited is exploring the dermatology segment. This is one of the fastest growing segment in pharmaceutical industry. Nowadays, people are more aware of skin and hair care. Rising disposable income is also allowing Indian consumers to spend more on skincare products for a better skincare regime. In the last decade, the perception of skin care has broadened. Today, modern skin care includes cleansing, soothing, restoring, reinforcing, and protecting.

The skin is the largest organ of the human body and is exposed, which makes it the first contact point for infection, microbes, and harmful bacteria. It is also a good indicator of the overall health of our body such as the Kidney, stomach, or thyroid gland. The skin is the gateway of the body.

We have the required infrastructure & knowledge pool to extend our expertise, products and services to the Dermatology segment. Our R&D is focused to develop products that enhance the efficacy & safety of the drug and improve the quality of life of patients. We have the capability to develop novel dermatological medicines to allay the increasing skin & hair complaints.

Inspira is a dedicated division of Beta Drugs Ltd for the dermatology segment. We will offer medical treatment options for major dermatology issues like Acne, Melasma, Eczema, hair loss, Fungal infections, Psoriasis etc. We also offer cosmetic products like moisturizers, sunscreen, serums

For us, quality is an aspect that is our prime focus. Our longstanding association with more than 50 top Indian Pharma companies is a testimony to our insistence on “supreme quality products”

OUR Milestones

Journey

- 1983 Laid the foundation of Adley Group by Late Shri Vijay Batra
- 2007 Entered into the Oncology Market
- 2008 Setup the first oncology unit in Adley Formulations Pvt. Ltd.
- 2011 Foray into the International Market.
- 2014 Setup a new "state of art" manufacturing facility for Oncology Formulations- Beta Drugs Limited.
- 2015 Developed In-house Albumin bound paclitaxel
- 2017 Received SME Excellence award.
Listed in NSE- National Stock Exchange
Commenced In-house API Plant - Adley Labs
- 2020 Setup In-house PFS facility
Launched **GEM-RTU** (Gemcitabine-Ready to use), **ADLEAP** (Enzalutamide Caps),
ADLANTE (Lenvatinib Caps), **BEXINIB** (Axitinib Tabs),
Launched 1st Indian brand of Dasatinib **BEEDAN**
- 2021 Launched 1st Indian brand of Sunitinib **ADSUNIB**
First to launch NDDS formulation of Azacitidine **MDS-O** (Azacitidine Tablets)
- 2022 Launched 2 New Divisions : 1. General Injectable 2. Skin Care Division ; Inspira
