

FRIKE GROUP
THE SMART SOLUTION

Swiss Quality

**SMART SOLUTIONS
FOR GREAT PRODUCTS.**

A male scientist is shown in a laboratory setting, wearing a white lab coat, a hairnet, and safety glasses. He is smiling and looking towards the camera while working with equipment. The background is slightly blurred, showing laboratory equipment and a clean environment. The text is overlaid on the left side of the image.

**Switzerland's largest
independent contract
manufacturer with expertise
in pharmaceuticals,
cosmetics and chemicals.**

It all began with shoe and floor waxes

- Fritz Keller AG was founded in 1944 by Fritz Keller.
- First production of shoe cream for the Swiss Army in Oberrieden ZH.
- Fritz Keller stood for his high-quality standards for his floor care products and shoe cream.
- Son André Keller is the second generation to lead the group.
- 1980: Completion of the range with pharmaceuticals, cosmetics and chemical-technical products.

- FRIKE CHEMICALS AG

FRIKE PHARMA AG

General Info

- Location Mönchaltorf ZH (since 1953)
- 2002 Expansion of pharmaceutical production with clean rooms
- Approx. 40 employees
- Manufacture of pharmaceuticals and medical devices on lists D to E

Technical Information

- Area 12,000 m²
- Storage area 2,500 m²
- R&D and Analytics
- Batches 30 kg - 2,200 kg up to 7 tons per day

FRIKE PHARMA AG

Production systems

Bulk production

- **Liquid mixer:** 5'000 kg, 2'000 kg, 800 kg
- **Process mixer:** 1'300 kg, 200 kg, 30 kg

Filling systems

- **Bottles:** Dällenbach, Zellwaag, Flexikon, 15-1000 ml
- **Tubes aluminum:** Romaco, 2-150 ml
- **Plastic tubes:** Romaco, 5-150 ml

GLAROPHARM AG

General Info

- Location Mitlödi, Canton of Glarus (since 2013)
- Formerly Grünenthal Group
- Approx. 50 employees
- Manufacture of medicinal products and medical devices on list A to E

Technical Information

- Area 14,600 m²
- Storage area 1,700 m²
- R&D and Analytics
- Batches 5 kg - 3,000 kg up to 7 tons per day

GLAROPHARM AG

Production systems

Bulk production

- **Liquid mixer:** 1'200 kg
- **Process mixer:** 2.5 kg, 7 kg, 35 kg, 100kg, 250 kg, 750 kg, 3'000 kg

Filling systems

- **Bottles:** Deckert, Dällenbach, Flexikon, 15-2'000 ml
- **Aluminum tubes:** IWK, Arenco, 2-150 ml
- **Plastic tubes:** Marchesini, IWK, 2-150 ml
- **Suppositories:** Sarong, 1-3 g
- **Sachet:** Laudenberg, 2-35 ml

Certificates for contract manufacturing of pharmaceuticals

Our production facilities are equipped with state-of-the-art facilities that meet the stringent requirements of Good Manufacturing Practice for pharmaceuticals (Swissmedic GMP-Compliance). We are continuously innovating and optimizing our processes to guarantee the highest quality, low production costs and efficient use of resources.

9001:2015

Logistics

Your go-to partner for the product development

Customized further development solutions

For example, we develop sunscreen for the USA, creams for muscle and joint pain, cough syrup and oil drops, as well as prescription medicines for dental hygiene, dermatology, gynecology and more.

Investigational medication

Since the FRIKE GROUP also has a permit for the production of small batches for clinical trials, we also stand by our customers in this regard. You and your pharmaceuticals benefit all along the line.

Formulation testing

The FRIKE GROUP draws upon its many years of expertise as a partner for the further development and optimization of existing formulations. Our formulation testing service, based on the latest findings, is also very popular with customers.

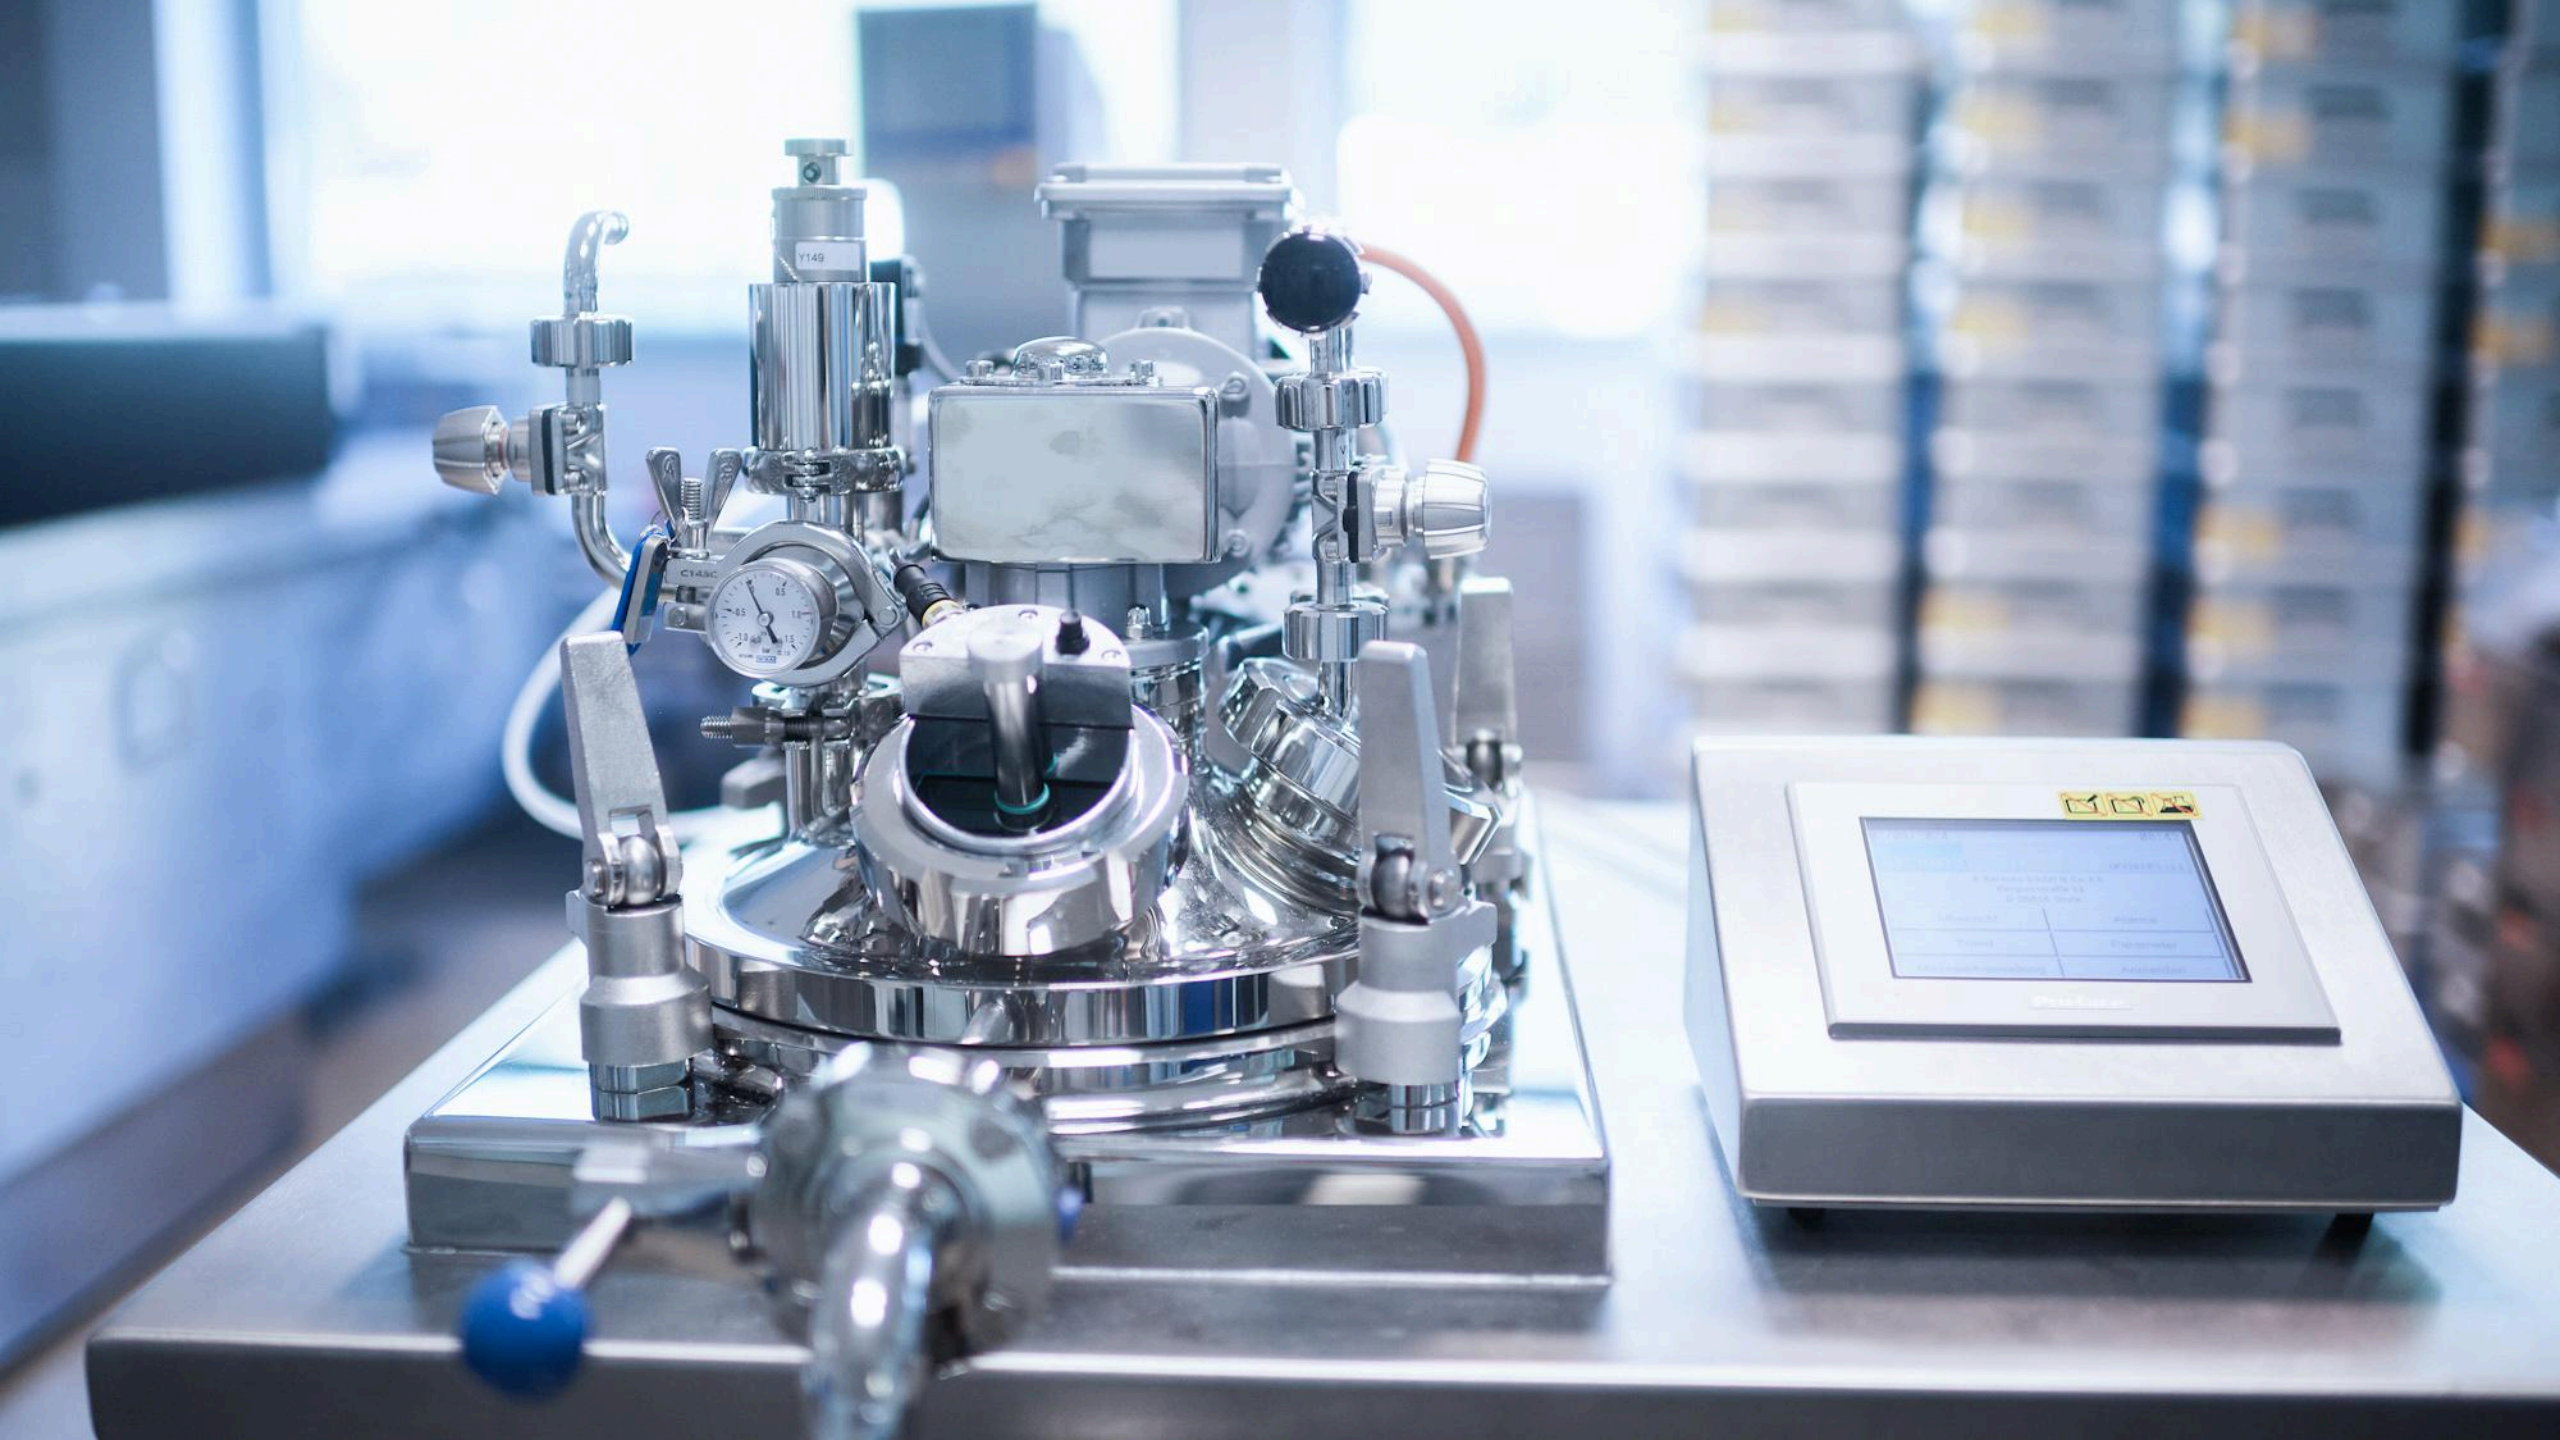

Clinical trials

The FRIKE GROUP assists customers with production and supply management for clinical trials. Make the most of our support to bring your pharmaceutical products to market as quickly as possible.

Technology transfer

A technology transfer in pharmaceutical contract manufacturing is a comprehensive process in which the knowledge, methods and know-how for the production of a specific drug are transferred from one development or manufacturing site to another. The transfer enables a contract manufacturer to take over the production of a drug in accordance with the high regulatory and quality requirements.

Individually tailored bulk production in top quality

Quality requirements for pharmaceuticals are very high. At the FRIKE GROUP, we ensure that you meet them in full. When it comes to the bulk production of pharmaceutical products – from ointments and liquids to suppositories – our customers benefit from maximum process reliability, which means they can always depend on us, down to the very finest detail.

Custom filling solutions

Filling of pharmaceuticals in various consistencies and forms

With its many years of experience as contract manufacturer of pharmaceuticals, the FRIKE GROUP has the perfect infrastructure for this task. Our flexible filling systems for liquid to semi-solid products ensure fast throughput times and competitive prices, even for small and medium quantities. You can rely on our expertise in filling a wide range of pharmaceutical products – even with challenging consistencies and a wide variety of packaging shapes and sizes.

**Strict in-process
controls ensure
consistently high
product quality.**

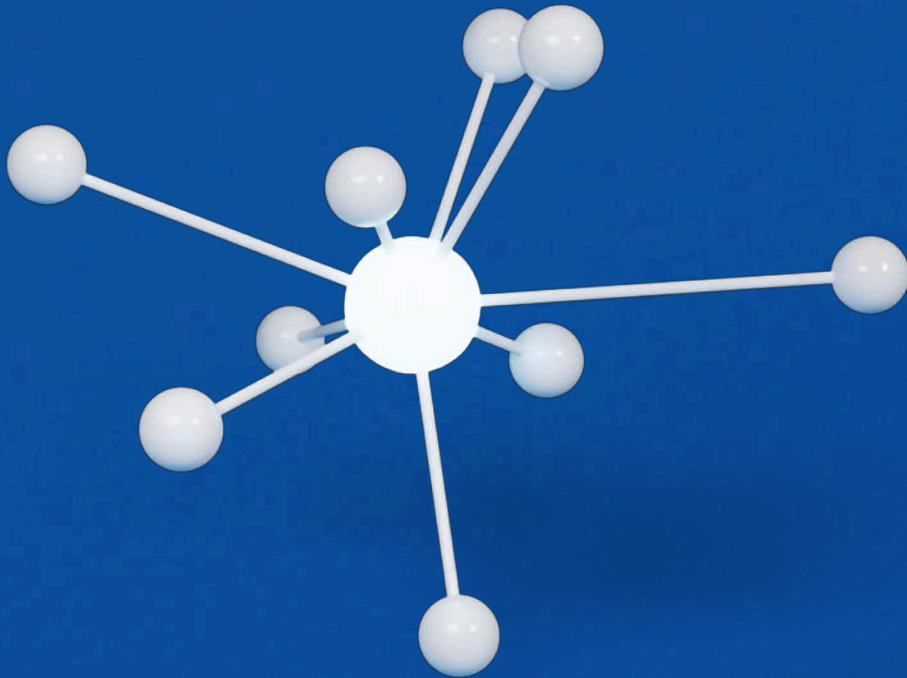

Customized logistics solutions

Global delivery of your products

FRIKE GROUP customers benefit from a wide range of warehousing and logistics services for pharmaceutical products. We guarantee smooth handling all the way from goods receipt to the delivery of your products straight to your specified delivery address.

Advice tailored to your needs

Customer-oriented advice based on decades of expertise

Are you looking for experts to exchange ideas with or do you need a sounding board? Are you in the process of planning a new project but haven't yet worked out all the details? Or perhaps you're looking for innovation? As an experienced contract pharmaceutical manufacturer, we provide support as an expert partner and guide you through the entire process, from the initial idea to the development and production of your pharmaceuticals, right through to filling and shipping.

FRIKE GROUP
THE SMART SOLUTION

**AND WHAT CAN
WE DO FOR YOU?**

Our actions for the environment

Responsible Care Programm

The FRIKE GROUP actively participates in the global Responsible Care program. This program is a global chemical and pharmaceutical industry initiative that promotes the safe handling of chemical products throughout their life cycle and emphasizes their contribution to improving quality of life and sustainable development.

Responsible Care[®]
OUR COMMITMENT TO SUSTAINABILITY

2024 Certificate from the Energy Agency for Industry

With a target agreement, the FRIKE GROUP has committed itself to targets for increasing energy efficiency and reducing greenhouse gases. By 2025, the FRIKE GROUP is aiming to reduce CO₂ emissions in production by 40%. We have already been able to continuously reduce CO₂ emissions by 31% since 2017.

Solar roof at the location Ebnat-Kappel

We recently installed a solar system on the roof of our site in Ebnat-Kappel. There, 675 PV modules on an area of around 1500 m² generate an annual average of around 300,000 kWh of electricity. In a further step, we are now examining the more intensive use of solar energy at additional locations to bring us closer to our ambitious target step by step. Another solar roof is planned in Wetzikon from 2026. To keep environmental emissions as low as possible, we are constantly switching from fossil steam to electric steam.

ClimatePartner for climate protection

As a Climate Partner customer, the FRIKE GROUP is actively committed to climate protection measures. With the 5-step plan for CO2 reduction, it keeps environmental emissions at the five locations as low as possible.
