MANA PHARMA GROUP

-  Marketing Authorization Holder (MAH)
-  Manufacturing of APIs and Medicines
-  Pharmaceutical Distribution Warehouse
-  Consultancy & Engineering / Turnkey Projects
-  Supplements Brand

Integral Services

Distribution

We distribute medicines, medical devices and a wide range of pharmaceutical products (APIs, excipients, reagents, food supplements, etc.) and equipment for use in aesthetic medicine.

Consultancy

We assist our clients in a comprehensive way by offering them consultancy services tailored to their needs.

Registration of medicines

The knowledge acquired over the years in different markets makes us experts in the registration of pharmaceutical products in an agile and effective manner.

Engineering

We adapt to the needs and circumstances of each project to achieve the best result. Hospitals and health centres, Pharmaceutical plants, Distribution warehouses, Quality control laboratories.

MD Authorised Representative

We provide regulatory services for commercialising medical devices manufactured outside the EU on the European market.

Wide Range of Products

- 🐦 Medicinal products, active ingredients, excipients and reagents
- 🐦 Medical Devices
- 🐦 Cosmetics and dermatological products
- 🐦 Hospital and Pharmaceutical Production Plant Equipment
- 🐦 Food Supplements and Nutraceutical products
- 🐦 Private-label supplements brand and collaborations with top European labs to develop formulations and facilitate tech transfers.

Specialists in Import and Export

- 🐦 MANA PHARMA specialises in the distribution, import and export of medicines, APIs, excipients, cosmetics, medical devices, and other pharmaceutical products within and outside the EU.
- 🐦 We have the capacity to complete the whole cycle of a medicine, from the supply of the raw material itself to the distribution of the finished product.
- 🐦 We operate at both public and private levels.

Marketing Authorization Holder (MAH)

Hospital Sector

At MANA PHARMA, we specialize in the daily distribution of medicines and medical supplies to hospitals across Spain.

Our network ensures fast and secure deliveries, complying with the highest standards of quality and traceability.

We work closely with hospital pharmacy departments to guarantee healthcare professionals always have access to the treatments they need, when they need them.

Own Medicines

We hold Marketing Authorization Holder (MAH) status for our own medicines.

Additionally, we act as the Local Representative for other EU-based MAH Laboratories.

Local Representation

We are certified as a trusted importer by the Spanish Agency of Medicines and Medical Products (AEMPS), specializing in the importation of Medicines for Special Situations (MSE)

Certifications

MANA PHARMA has Licenses and Certifications, which enable us to offer our customers a wide range of products and services.

Authorisation as a Wholesale Pharmaceutical Distribution Entity of Medicines for Human Use allows us to carry out our main task as an Exporter of medicines.

-  Wholesale Distribution Authorisation for Medicinal Products for Human (and veterinary) Use
-  Marketing Authorisation Holder (MAH) of Medicinal Products for Human Use
-  Operating License as a Medical Devices Importer
-  Unified Register of Active Substance Companies (RUESA)
-  General Register of Operators of Scheduled Chemicals (Category 2 and 3)
-  Quality certificates: ISO 13485 and ISO 9001

Engineering

We adapt to every need

We cover healthcare projects from start to finish, starting with their design, construction and refurbishment, through equipment, installation and commissioning, and ending with maintenance and training of the staff involved.

Turnkey projects

Specialised in healthcare projects, including *consulting & engineering* plans, construction, refurbishment, equipment, installation, commissioning and maintenance of the project, under our "turnkey" modality. Hospitals and Health Centres, Pharmaceutical Plants, Distribution Warehouses, Quality Control Laboratories.

Consultancy

Experts in pharmaceutical advice

To ensure compliance with the high quality standards in the EU, we offer our partners and customers an advisory and support service.

We have the necessary experience for the development of Quality Systems (SOPs), Pharmacovigilance, continuous training, custody, conservation and storage of products, as well as for the registration and resolution of customer complaints.

Registration of medicines

The knowledge acquired over the years in different markets makes us experts in the registration of pharmaceutical products in an agile and effective manner.

This ensures a continuous supply of products in those territories with the greatest need, increasing the turnover of our partners.

Turnkey Projects. Comprehensive Solutions

At MANA PHARMA, we offer an integral service covering all phases of a turnkey project. We ensure a complete solution, from conceptualization to project commissioning, including when necessary: consultancy, engineering, supply, installation, and concluding with training and maintenance.

- 🐦 Experience setting up pharma projects outside Europe.
- 🐦 Strategic alliance with InntegraPharma for conceptual design and strategic planning of Pharma-Biotech projects.
- 🐦 Mana China: A top-tier team with access to Asia's leading suppliers of equipment and raw materials.

Project "Pharmaceutical Plants"

At MANA PHARMA, we specialize in providing CUSTOM SOLUTIONS and executing pharmaceutical plant projects. Our goal is to deliver innovative infrastructures that ensure safe and effective drug production, complying with the highest quality standards and international regulations: EU GMP, US GMP, ISO, PIC, CDC guidelines, WHO guidelines.

Pharmaceutical Development

Based on the products and processes defined in the conceptual design, detailed development must be carried out for each pharmaceutical form, covering both composition and production process. Prior to production, it is mandatory to prepare and submit a dossier to the health authorities to enable the launch and commercialization of each pharmaceutical product. All process-related documentation must be prepared in accordance with GMP to proceed with the submission process.

Training and Qualification

In a turnkey project, such as the delivery of a pharmaceutical plant for drug manufacturing or a fully equipped hospital, personnel training and qualification represent the final critical step to ensure operational success and long-term sustainability.

This comprehensive training process prepares the workforce not only to operate advanced equipment, but also to implement preventive and corrective maintenance strategies that guarantee operational continuity and long-term efficiency.

In pharmaceutical plants, operators and technicians must master high-tech equipment handling and understand production/quality control protocols required to meet stringent regulations. In hospital settings, beyond training on safe operation of critical medical devices, professionals learn to perform routine maintenance—preventing disruptions and minimizing risks.

We provide training facilities for project managers prior to on-site deployment in Iraq, including cleanrooms and a fully equipped QC laboratory.

Turnkey Projects. Venezuela

We are currently developing a pharmaceutical plant in Venezuela from the ground up. The project, executed from scratch, will culminate in the facility's full commissioning.

Key Features:

- Single-point accountability for all project stages
- Regulatory-ready documentation (DQ/IQ/OQ/PQ protocols)
- Technology transfer support for sustained operations

Turnkey Projects. Equatorial Guinea

MANA PHARMA Guinea Ecuatorial, a subsidiary of MANA PHARMA is currently executing a strategic project to supply and install state-of-the-art medical equipment at the Sampaka General Hospital (Malabo). This initiative is part of a public tender contract awarded in 2024.

A Two-Phase Key Project

Designed to significantly enhance the hospital's care capacity, the project is structured in two distinct phases:

1. Maintenance and Repair Phase

- 🐦 Supply of original spare parts to rehabilitate existing equipment.
- 🐦 Optimization of critical medical devices to ensure optimal performance and safety.

2. New Equipment Phase

Installation of advanced medical technology in previously underserved areas, including:

- 🐦 Medical gas generator (ensuring continuous supply for operating rooms and ICUs).
- 🐦 Anesthesia machines and ventilators (for critical monitoring in surgery and intensive care).
- 🐦 X-ray equipment (high-precision diagnostic imaging).
- 🐦 Electrosurgical units and surgical equipment (enabling complex procedures).

Supply of Medical Equipment and Hospital Projects

Mana PHARMA develops various projects within healthcare infrastructure, always incorporating the latest technologies tailored to our clients' needs. We cover the entire lifecycle of healthcare projects, from design (consulting and engineering), construction, renovation, and equipment supply to installation, commissioning, and maintenance, all under a "turnkey" model.

Our Projects Include:

- 🐦 Hospitals
- 🐦 Healthcare Centers
- 🐦 Specialized Facilities (forensic pathology centers, laboratories, vaccine and medication logistics & storage centers, primary care units, blood banks, vaccination centers)
- 🐦 Nurseries
- 🐦 Pharmaceutical Production Plants
- 🐦 Field Hospitals
- 🐦 Mobile Medical Units
- 🐦 Special Installations (medical gases, HVAC systems, kitchen, laundry...)
- 🐦 Supply of Medical, Hospital & Laboratory Equipment
- 🐦 Supply of Consumable Materials
- 🐦 Training Programs
