

EKOKOM
Group JSC

Bibiotic® Advanced Postbiotics

Transforming Microbiome Science
into Commercial Products

Company Overview

EKOKOM Group JSC is a Bulgarian biotechnology company specialized in fermentation technologies, microbiome-related solutions, dietary supplements, and postbiotic products.

The company develops and manufactures innovative liquid postbiotic formulations based on proprietary fermentation processes and scientific expertise accumulated through decades of experience in biotechnology and food production.

Headquarters: **Bulgaria**
Manufacturing Facility:
Bioenterprise AUTOBIOTIC
171 Georgi Kochev Str.
5800 Pleven, Bulgaria

30+ Years Experience
150,000+ Boxes Annual Capacity
9 Product Lines
6 International Certifications

Our Expertise

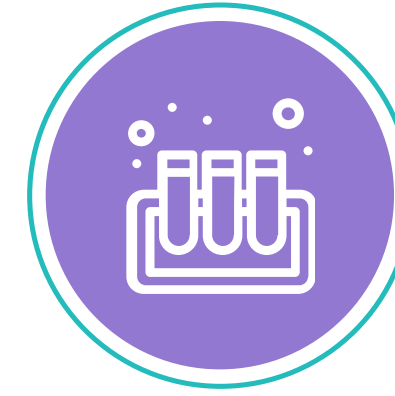

More than 30 years of experience in fermentation technologies

Biotechnology and microbiome-related innovations

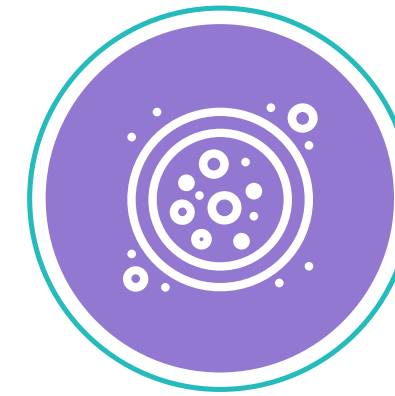

Development of advanced postbiotic ingredients and formulations

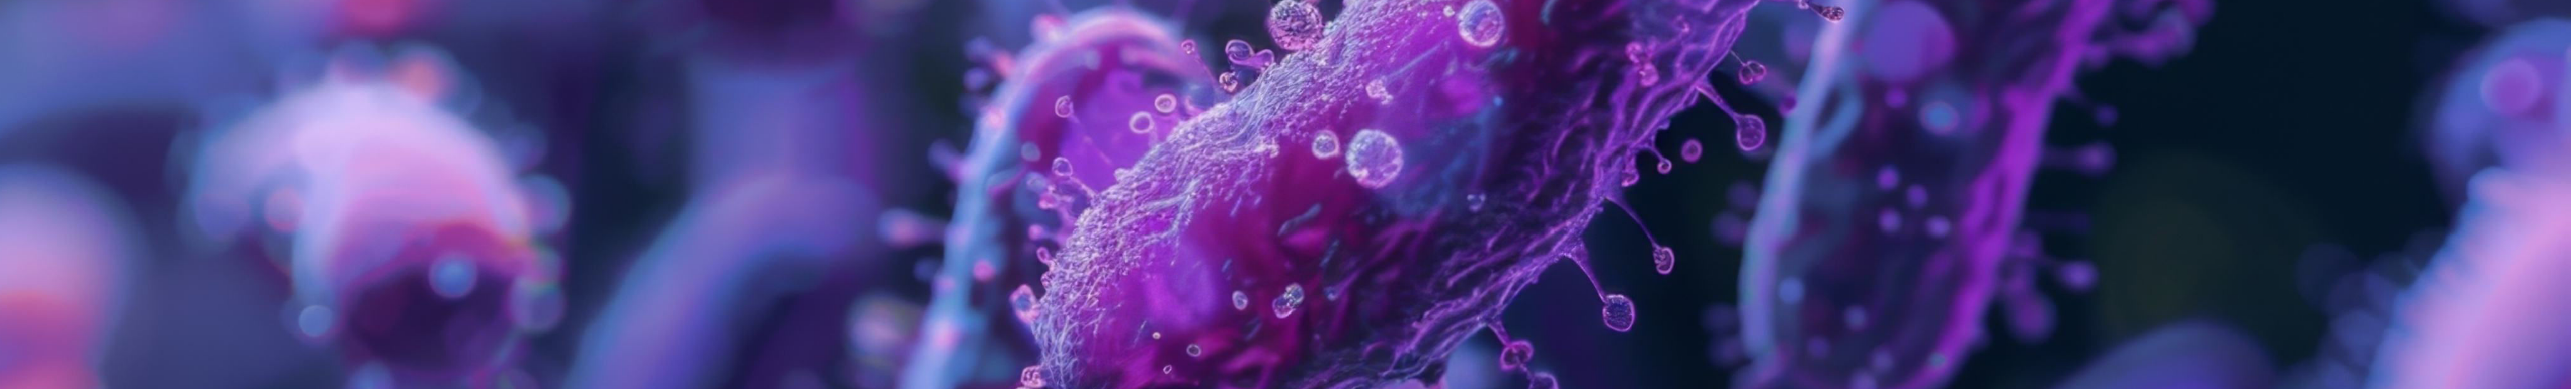

Dietary supplement manufacturing

Private Label & Contract Manufacturing

Research and development of next-generation microbiome products

What Are Postbiotics?

Bibiotic® products are based on advanced postbiotic technology.

Unlike conventional probiotics, postbiotics contain:

- Beneficial microbial metabolites
- Cell lysates
- Cellular components
- Bioactive compounds produced during fermentation

Advantages:

- No live microorganisms
- Excellent stability
- No refrigeration required
- Direct delivery of bioactive compounds
- Suitable for sensitive populations
- Consistent quality and activity throughout shelf life

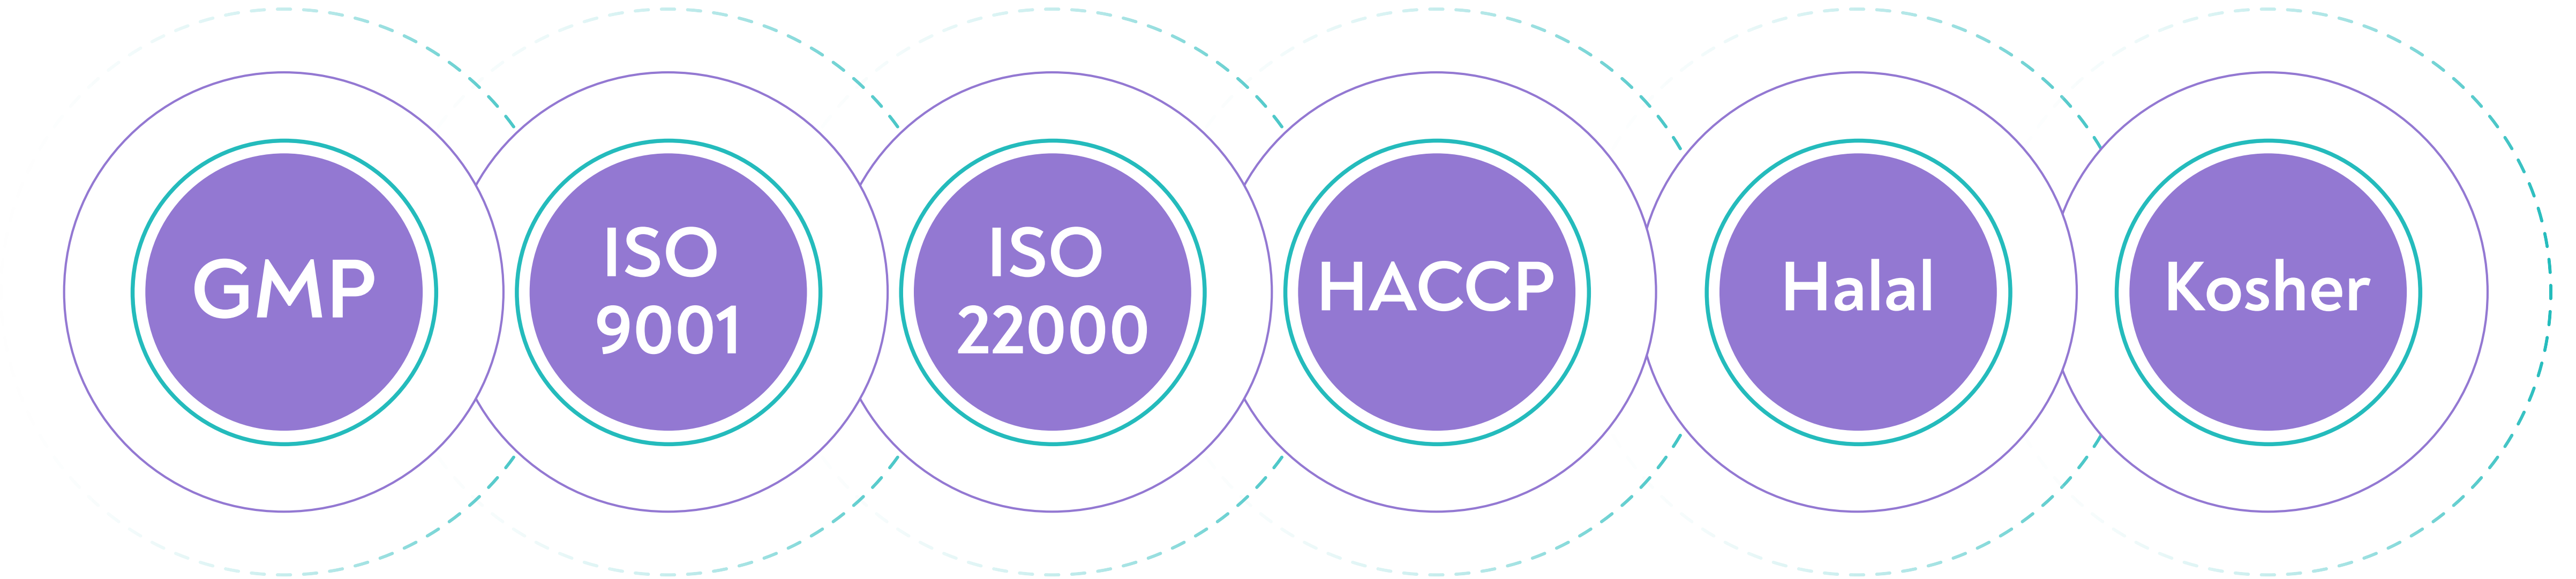

Manufacturing Capabilities

- Private Label Manufacturing
- Product development
- Formula customization
- Packaging design support
- Brand development assistance
- Contract Manufacturing
- Custom formulations
- Bulk production
- Export-oriented manufacturing
- International compliance support
- Product Formats

Specialized in:
Postbiotic formulations

Certifications

Our manufacturing operations are supported by internationally recognized certifications:

Product Portfolio

Available as:
Private Label
White Label

Bibiotic® Gastro

Postbiotic for Digestive Health & Microbiome Balance

Bibiotic® Immuno

Postbiotic for Immune system support

Bibiotic® Sensitive

Postbiotic for Sensitive Individuals and immune balance

- **Best Dietary Supplement for Children** – Grazia Mother & Kids Awards 2025
- **Best Dietary Supplement for Pregnancy** – Grazia Mother & Kids Awards 2025
- **Best Natural Product** – Grazia Mother & Kids Awards 2025
- **Best Immunity Support Product** – Grazia Mother & Kids Awards 2025

These achievements reflect our commitment to innovation, scientific excellence, and product quality.

Company Overview

We actively develop partnerships across:

We are open to distribution, private label, and contract manufacturing partnerships worldwide.

Europe

Middle East

India

North America

Asia

Why Partner With Us?

Be Among the First

Postbiotics represent the next evolution in microbiome science. While probiotics have already become an established global category, postbiotics are only beginning their broader commercial expansion.

By partnering with us today, you have the opportunity to position your company among the early adopters and future leaders in a category that is expected to experience substantial growth over the next decade.

- ✓ Proprietary technology for the production of effective postbiotics.
- ✓ One of the few manufacturers developing true postbiotic products aligned with the scientific definition of postbiotics established by the International Scientific Association of Probiotics and Prebiotics (ISAPP).
- ✓ Manufacturing facility certified according to GMP, ISO 9001, ISO 22000, Halal and Kosher standards, supporting international market requirements.
- ✓ Flexible Private Label and Contract Manufacturing solutions tailored to your market needs.
- ✓ Opportunity to become an early partner in one of the fastest-growing categories within microbiome-based health products.
- ✓ First-Mover Advantage in the emerging postbiotic market, a category expected to experience significant global growth in the coming years.
