WHAT CENTROFLORA CAN DO

FOR YOUR BUSINESSES?

Let us professionally guide you through the largest biodiversity on the planet.

Centroflora Group has over 68 years of experience in herbal extracts, APIs and pharma-grade essential oils. It is the largest company in its segment in Latin American and a reference worldwide for its sustainable supply chain. It's responsible for 2/3 of the global production of pilocarpine, an API applied in the treatment of presbyopia, xerostomia and glaucoma, and is spearheading the development of innovative phytomedicines by unlocking the untapped potential of Brazilian Biodiversity.

WHAT ARE CENTROFLORA

KEY DIFFERENTIATORS?

Sustainability & Responsible Sourcing

Centroflora has embraced ESG principles for over 20 years through its "Partnerships for a Better World" program. More than 4,000 small family farmers across Brazil are engaged on this socio-environmental projects, assuring ethical biotrade, full traceability, and quality of raw materials.

Global Stability

Brazil's insulation from many geopolitical disruptions ensures a stable supply of goods and consistent pricing for our customers. This stability aligns with nearshoring strategies, providing reliable contingency plans for product supply chains.

An Innovation Hub in the World's Richest Biodiversity

Centroflora harnesses the vast potential of Brazil's biodiversity to drive radical innovation. With a team of over 30 scientists, we are dedicated to developing intellectual property and creating novel products that meet the unique needs of our customers.

Quality, Reliability & Competitiveness

Centroflora has multiple GMP-certified (FDA, EDQM, and ANVISA) facilities for over two decades located in Brazil: a country abundant in clean water, low cost alcohol production, skilled labor, and accessible natural ingredients, which positions us to offer products of the highest quality and competitive pricing in the global botanicals market.

OUR BUSINESSES

Centroflora provides a wide range of pharma-grade products and a comprehensive ecosystem of services. This includes CDMO activities, agricultural expertise, the establishment of sustainable and responsible supply chains, and innovative support for product development. We are a one-stop shop, dedicated to tailoring solutions that meet your company's specific needs.

OUR SOLUTIONS

FROM BIODIVERSITY TO MARKET

DISCOVERY & INNOVATION

Access to Brazil's biodiversity in full compliance with local regulations, with expertise in bioprospecting and building botanical extract libraries. Technical and regulatory support for preparing dossiers and registering new drugs, integrating traditional knowledge of medicinal plants.

AGRICULTURAL TECHNOLOGY & EXPERTISE

Comprehensive solutions for responsible sourcing, including technical assistance, contracted harvests, and traceability. Agricultural R&D to improve quality, support ABS compliance, and achieve certifications such as Organic, Fair for Life, UEBT, and Rainforest Alliance. ESG projects and agricultural practices aligned with international sustainability standards.

R&D AND INDUSTRIAL SCALE UP

Development of proprietary extracts at lab, pilot, or industrial scale in GMP-certified facilities. Expertise in extraction, isolation, purification, and analytical validation. Pharmacotechnical support for prototypes and the development of traceable agricultural supply chains.

API AND BOTANICAL EXTRACTS MANUFACTURING

Pharma-grade production of APIs and botanical extracts, including alkaloid extraction, essential oil production, and toll drying for multiple sectors. Dedicated Quality Control and Quality Assurance units ensuring compliance and product excellence.

FROM BRAZIL'S BIODIVERSITY TO YOUR BUSINESS

Centroflora transforms the richness of Brazilian biodiversity into innovative botanical solutions. We combine sustainable sourcing with deep scientific expertise to create high-quality ingredients for the pharmaceutical, food, and cosmetic industries. Our work begins in the field, with responsible cultivation and full traceability, ensuring products that are ethically sourced and environmentally respectful.

END-TO-END EXPERTISE, PROVEN RESULTS

From agricultural development and R&D to GMP-certified manufacturing, Centroflora offers complete solutions to take your product from concept to market. We deliver proprietary extracts, pharma-grade APIs, essential oils, and botanical ingredients with strict quality control at every stage, ensuring safety, compliance, and market success.

CentroInova (Campinas, SP)

Our R&D Center brings together over 30 scientists and technicians dedicated to discovering and applying compounds from Brazilian biodiversity in innovative health solutions.

Connected to national scientific networks like InovaFitoBrasil, the center is a strategic pillar of Centroflora, driving new technologies, products, and research that link science, nature, and innovation.

CentroPhyto (Botucatu, SP)

Industrial facility dedicated to the production of botanical extracts with technological excellence and the highest market quality and compliance standards.

The facility operates with cutting-edge technology and Industry 4.0 concepts in automation and control. National reference in industrial processes applied to natural ingredients.

CentroIFA (Parnaíba, PI)

CentroIFA facility is an industrial center of excellence for the production of Active Pharmaceutical Ingredients (APIs).

It is responsible for manufacturing Pilocarpine salts, supplying 2/3 of the global demand and exporting to over 30 countries.

CentroAgro I (Botucatu, SP)

A strategic hub for agronomic research and the sustainable cultivation of medicinal plants. With 40% of its area preserved as native forest, the site follows Good Agricultural and Collection Practices (GACP).

It conducts studies on native species and works on adapting foreign plants, while also embracing a circular economy, reusing industrial byproducts as organic compost to enrich local crops and generate new raw materials.

CentroAgro II (Parnaíba, PI)

Strategic agricultural unit, focused on the cultivation of medicinal plants. With 60 hectares irrigated by center-pivot systems.

The farm employs modern cultivation technologies and sustainable practices, ensuring traceability, supply security, and support for the national pharmaceutical industry.

Brazbio (Botucatu, SP)

Brazbio drives sustainable production chains based on Brazilian social-biodiversity, strengthening the Partnerships for a Better World program and including traditional communities, farmers, and cooperatives in the value chain.

With a focus on traceability, quality, and conservation, it combines science and traditional knowledge to generate income, promote fairness, and protect the environment.

Our Portfolio

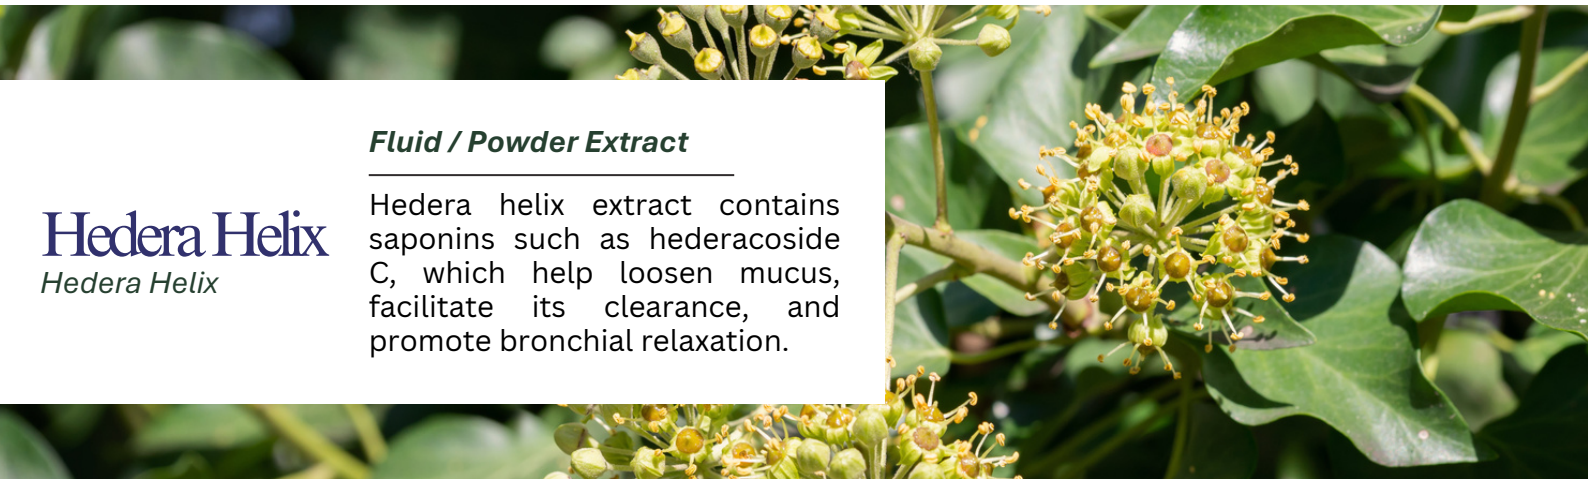

Passionflower

Passiflora incarnata

Fluid / Powder Extract

Passionflower is known for its calming and anxiolytic properties, traditionally used in products that promote stress relief and improved sleep quality.

Hedera Helix

Hedera Helix

Fluid / Powder Extract

Hedera helix extract contains saponins such as hederacoside C, which help loosen mucus, facilitate its clearance, and promote bronchial relaxation.

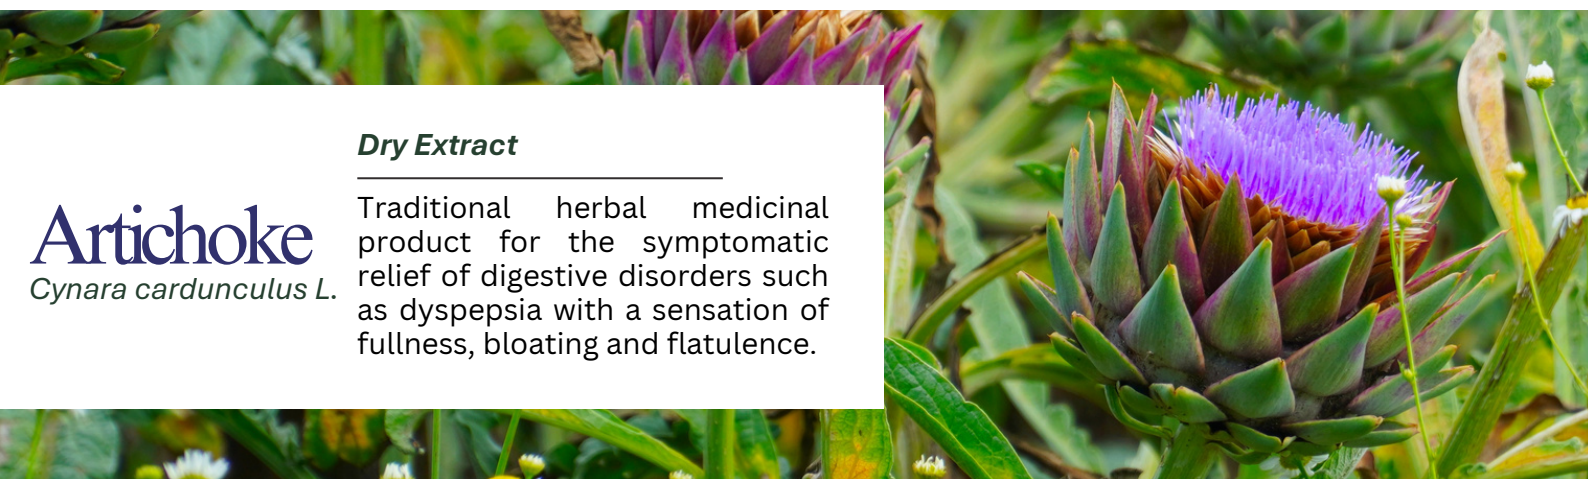

Silymarin

Silybum marianum

Powder Extract

Silymarin, extracted from milk thistle seeds, has hepatoprotective, antioxidant, and anti-inflammatory properties, helping support liver regeneration and protection.

Artichoke

Cynara cardunculus L.

Dry Extract

Traditional herbal medicinal product for the symptomatic relief of digestive disorders such as dyspepsia with a sensation of fullness, bloating and flatulence.

Our Portfolio

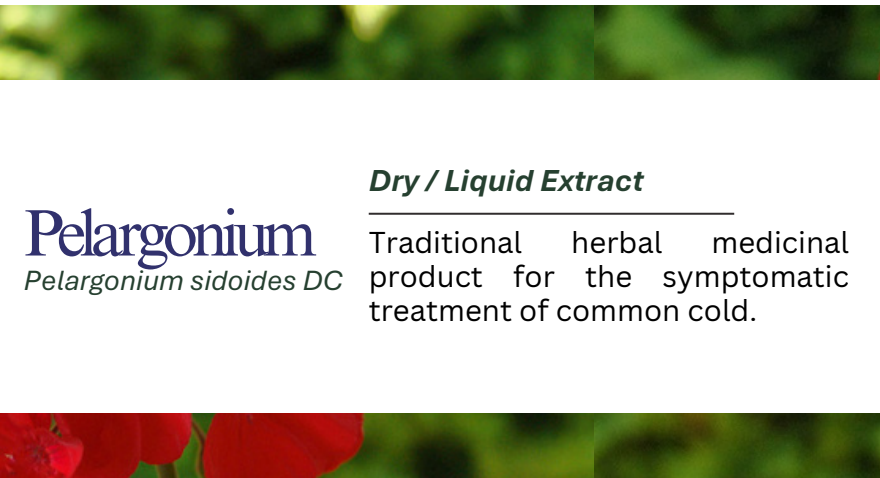

Harpagophytum

Harpagophytum procumbens DC.

Dry Extract

Traditional herbal medicinal product for relief of minor articular pain.

Pelargonium

Pelargonium sidoides DC

Dry / Liquid Extract

Traditional herbal medicinal product for the symptomatic treatment of common cold.

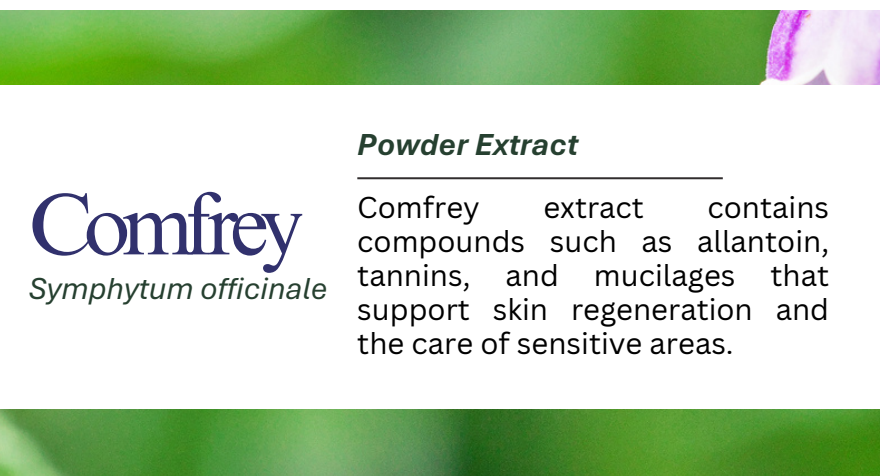

Salix Alba

Salix alba

Powder Extract

Salix alba contains compounds such as salicin, a natural precursor to salicylic acid. Traditionally used to relieve joint and muscle discomfort.

Comfrey

Symphytum officinale

Powder Extract

Comfrey extract contains compounds such as allantoin, tannins, and mucilages that support skin regeneration and the care of sensitive areas.
