

**Leading Probiotics
Forward.**

Lallemand at a Glance

Changing the World Through Microorganisms

Lallemand is a privately owned company specializing in the development, production, and marketing of microorganisms—including yeast, bacteria, fungi, and their derivatives. With a strong focus on innovation, Lallemand delivers microbiological solutions across a wide range of industries, from human to animal health and nutrition to baking, oenology, brewing, food ingredients, probiotics, and biofuels.

Founded in Montreal by Fred A. Lallemand at the end of the **19th century**

Yeast production started in **1923**

Owned by the Chagnon family since **1952**

Over **5,500** employees globally

A worldwide presence

52 plants including **27 yeast** and **11 bacteria**

A Daily Presence in the Lives of Hundreds of Millions of People

30B+ loaves of bread

Cultures with **100** years of history, used in **50+** countries on **5** continents

22B+ bottles of wine

120M+ piglets and sows

10M+ people in Europe eat tomatoes without chemicals

Lallemand Health Solutions

A Global Leader of the Probiotic Industry

With 90 years of know-how, we are a global leader in the probiotic industry, specializing in the development, production, and marketing of bacteria- and yeast-based probiotic supplements for human health, nutraceuticals and food applications. Our production facilities meet the highest quality standards, including Good Manufacturing Practices, and we maintain a robust research program through the Rosell Institute for Microbiome and Probiotics. We offer our partners clinically documented probiotic strains for a wide range of health applications, including gut health, immune support, mental well-being, women's health, skin and oral health, sports, metabolic health, healthy aging, and infant health.

600+ employees

600+ formulas

90+ years of know-how

40+ proprietary strains

430+ publications

70+ countries

Taking Responsible Steps for a Healthier Future

- At Lallemand, we believe that **microbial solutions can contribute to addressing some of the main societal and environmental challenges of today**, and we are convinced that our core focus on microorganisms will become even more relevant in the future. However, we are conscious that the process of growing selected microorganisms also has its impact on the environment and society, and that we need to be careful about this. Every year, Lallemand invests in projects to reduce its environmental footprint and increase its production processes' efficiency.
- Lallemand Health Solutions strives to participating in the good health and well-being of the global population by providing quality-based and scientifically-proven probiotic solutions.**
- We believe we can achieve this goal, through ensuring in parallel:**
 - A responsible and environmentally conscientious production,
 - A respectful and supportive working environment for our employees,
 - A pioneering and innovative research collaborative platform.

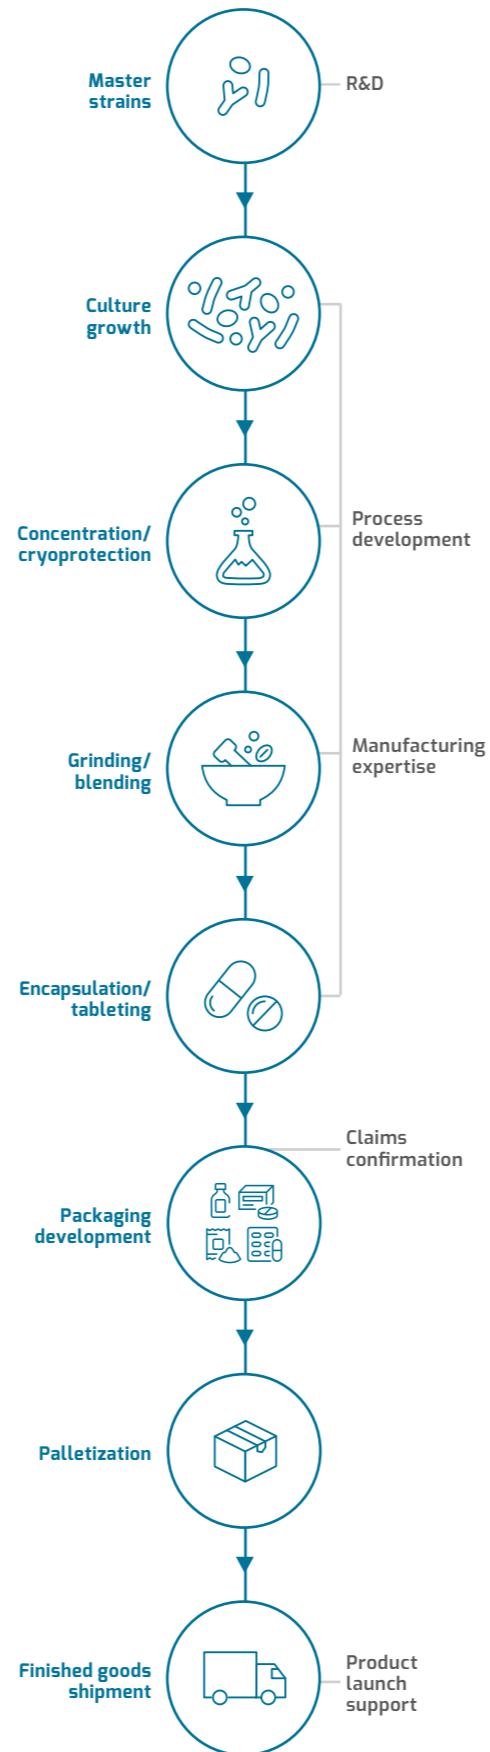

A Unique Global Probiotic Player, Fully Integrated **from Lab to Shelf**

Virtual visit

See it with your own eyes. Come take a tour of our installations.

Reaching the Highest Quality Standards

Full control is key to offer probiotic strains, blends or custom formulations produced to the highest quality standards. From lab to shelf, we control the overall production process.

Probiotic Facilities

- Bacteria and yeast production
 - 3 bacteria plants (Canada and France)
 - 1 yeast plant (Austria)
- Bulk manufacturing and packaging in France, Canada and the USA
 - Encapsulation
 - Sachets / Sticks
 - Lozenges
 - Tablets
 - Bottles
- Several approved subcontractors for secondary packaging.

Accreditation and Licenses Include

- Health Canada (NNHPD)
- cGMP / US FDA cGMP (21CFR111,117)
- UL, NSF, GRMA
- C-TPAT
- CFIA
- ISO 9001 / ISO 22000 & HACCP (France)
- TGA Clearance (Australian TGA clearance)
- Religious status for certain strains (e.g. Halal)
- Environmental and social certifications and labels:
 - ISO 14001 (France)
 - EcoVadis (Canada, France)
 - SMETA audit (France).

Each step is expertly supported by internal quality, regulatory, R&D, scientific affairs, technical support and marketing teams.

Leading Microbiome Science—Together

Leverage the full strength of a vertically integrated, trusted company to create the next generation of probiotics and live biotherapeutics

- Robust research and development expertise in next-generation probiotics
- State-of-the-art GMP pharmaceutical production capabilities
- Experienced pharmaceutical regulatory and compliance team

Applying Leading-Edge Technologies and Innovative Scientific Approaches to Develop Next-Generation Strains

- Our comprehensive development process includes:**
- Cell bank establishment and verification
 - Strain characterization
 - Process optimization at lab scale
 - Formulation development
 - Industrial scale-up
 - Analytical method development
 - Stability studies
 - Clinical trial support

Plant Certification for the Production of Probiotics and Live Biotherapeutics

Our certified facilities support the full production cycle, including:

- From production to final packaging (sticks, sachets, capsules)
- Clinical batch production
- Commercial batch production (from 480 liters to 20,000 liters)
- In-process controls and quality checks at every production step

Pharma certifications

- **Health Canada** - Good Manufacturing Practices for drug products - Pharmaceutical (Part C, Division 2 of the Food and Drug Regulations)
- **ANSM - EU GMP** for human medicinal products and human investigational medicinal products (EU GMP Part I)
- **ANSM - EU GMP** for human medicinal products for active substances used as starting materials (EU GMP Part II)

Pioneering Probiotic Research to Advance Human Health

At the Rosell® Institute for Microbiome and Probiotics, we harness advanced technologies and scientific expertise to develop probiotic strains that support human health. Guided by our founders' pioneering spirit and a strong commitment to global well-being, we invest in rigorous research across ten key health segments, reaching millions worldwide.

430+ publications
160+ published clinical trials

100+ *in vitro*
80+ *in vivo*

Health segments	Number of publications	
	Pre-clinical	Clinical
GUT HEALTH	44	107
NATURAL DEFENSES	9	34
MENTAL HEALTH	35	14
WOMEN'S HEALTH	6	14
ORAL HEALTH	2	15
SPORT	5	5
METABOLIC HEALTH	11	12
SKIN HEALTH	6	3
HEALTHY AGING	2	4
BABIES	8	34

We are currently conducting **25+ clinical trials** across **10+ countries**, with **3,000+ participants**

> 1,000
Human samples received annually

4,856
Analyses performed in 2024

Various sample types
Stool, vaginal swab, breast milk, saliva, blood, etc.

An Integrated Research Platform

Discovery platform

- Identifying and understanding probiotic strains**
- Screen and evaluate strains *in vitro* and *in vivo*
 - Characterize safety and functional properties
 - Investigate mechanisms of action
 - Apply and refine advanced technologies and models

Clinical platform

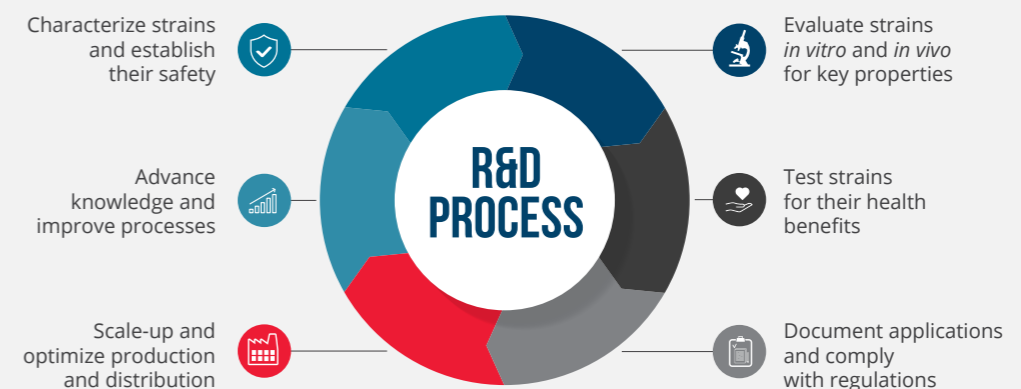

- Validating health benefits through clinical research**
- Conduct studies initiated by sponsors, investigators, or clients
 - Test individual or combined probiotic strains

Bioprocess and galenic form platform

- Optimizing production and delivery**
- Enhance bioprocess efficiency
 - Develop innovative galenic forms for targeted populations
 - Operate a dedicated applied research facility

Microbiome program

- Scaling next-generation microbiome solutions**
- Advance fermentation and formulation of key microbiome strains
 - Use an agile, adaptive "toolbox" to rapidly deliver scalable solutions

Pre-clinical and Clinical Research Center (Montreal, Canada)

Home to four cutting-edge laboratories:

- **One biosafety level 2 microbiology lab** – for advanced microbiological analysis
- **Two pre-clinical labs** – focused on host-microbe interactions and molecular biology
- **One clinical lab** – supporting human health studies

Bioprocess and Galenic Expertise Center (Blagnac, France)

Specialized in microorganisms processing and formulation, with research organized around three core areas:

- **New Product Development** – including novel strain processes, galenic forms, and tailored solutions
- **Process Optimization** – enhancing performance of existing products
- **Technical Support** – for production sites and customer-specific needs

EXPERT 'Biotics™

by LALLEMAND

Best-in-Class Documented Formulas Supported by:

- An integrated R&D platform from *in vitro* and *in vivo* models to clinical studies
- Regulatory affairs: complete registration dossier and claims available
- Marketing: product training and communication tools

Lacidofil®

- 29 clinical studies: 14 in children / 15 in adults, including 2 in pregnant women
- Commercially available since 1995 with a pharmacovigilance program showing safe use
- Shown to support healthy microflora in infants, promote vaginal balance in women, and help manage occasional gastrointestinal symptoms such as diarrhea in adults, among other gut-related functions

B. lactis Lafti® B94

- Selected from among 40 bifidobacteria strains for its good synergy with prebiotics
- 8 clinical studies in infants and children, GRAS for infant formula from birth
- Activates bile acid metabolism in healthy overweight adults
- Synergistic benefits as a synbiotic with Biotis® GOS, a combination successfully tested by consumers

S. boulardii CNCM I-1079

- The most documented probiotic yeast in the world with 100+ clinical studies
- A time-tested yeast culture mastered and perfected from lab to shelf
- Synergistic effects with bacteria
- Also available as pharma grade, organic or specifically for babies

IBacilluS+

- Strong combination of two robust bacteria strains
- For other use than dietary supplements: 120 clinical studies with 10,000+ participants in SIBO, IBS, UC, AAD, *H. pylori*.

L. paracasei HA-196

- Beneficial effects to help support healthy bowel habits in adults as demonstrated in a large North-American study

L. rhamnosus GG

- One of the most documented probiotic strains in the world with 50+ studies mainly in gut health and natural defenses
- Specifically recommended by pediatricians

Cerenity™

- A clinical breakthrough in healthy aging: supporting mobility, strength, and quality of life
- 1 clinical study on healthy community-dwelling elderlies, showing improvements in mobility, coordination, endurance and muscle strength

Cardiomeo™

- Cardiovascular support in elderly men
- 1 clinical study on overweight but otherwise healthy elderly men, demonstrating improvements in cardiovascular risk indexes, antioxidant capacity and mental health.

Metabiotic™

- Helps maintain cardiovascular health
- 1 clinical study on participants with metabolic syndrome (no vascular disease, not taking statins), demonstrating beneficial effects on vascular inflammation and cholesterol levels

Probiokid®

- 28 clinical studies in 3,000+ participants, with benefits on gut health, natural defenses and beyond
- GRAS Notified for use in infant formula (from birth) for both the Probiokid® combination and the single strains

L. helveticus Lafti® L10

- 6 clinical publications in athletes and healthy adults with IBS-like symptoms
- Shows antioxidant potential in healthy athletes
- Promising preliminary clinical results for supporting healthy cholesterol levels

Immuse®
L. lactis strain Plasma

- The most documented, award winning postbiotic for immune health
- 15 clinical studies on the strain including 11 on the heat-inactivated *Lactococcus lactis* strain Plasma
- Distinctive mode of action for a more comprehensive immune support

Cerebiome®

- Pioneering and most documented psychobiotic in the world
- 10+ clinical studies and 11+ mechanistic studies, highlighting 8 modes of action on the microbiota-gut-brain axis
- Benefits in overall wellbeing : mood and stress, stress-related gut comfort, sleep quality (with 5+ clinical studies related to sleep), holistic wellbeing and skin appearance

B. bifidum Rosell®-71

- 1 clinical and safety study showing support in a baby-specific microflora, GRAS Notified for infant formula
- 1 large clinical study on healthy adults showing greater proportion of healthy days and a positive effect on self-reported occasional stress scores
- 1 clinical study on healthy women during the menstrual cycle, observed a reduction in bloating associated with menstruation

ROSELLA®

- Studied on over 800 women: 6 clinical studies including 2 with oral treatment
- Helps promote vaginal health, supports a normal vaginal pH and promotes vaginal diversity associated with a healthy vaginal flora
- Demonstrated vaginal colonization and persistence following oral intake

Prenatis™

- Best-in-class prenatal probiotic formula with two proprietary strains known for their efficacy
- 1 clinical study on healthy pregnant women during their third trimester and their infants up to twelve months
- Supports a healthy pregnancy and contributes to the establishment of a healthy infant microbiome during the first months of life

L. rhamnosus HA-114

- 1 clinical study on weight management support in overweight but otherwise healthy adults on a diet: beneficial effects on cravings, hunger, mood and metabolic profile
- For other use than dietary supplements: 2 clinical studies on cognition in Alzheimer's disease

Oralis SB

- One of the most documented formulas on oral health with 13 clinical studies: 3 on the control of the growth of *S. mutans* count for healthy teeth, 8 on gum health and plaque formation, and 1 on the maintenance of a healthy salivary pH, with similar or better results compared to conventional mouthwashes
- Several dosage forms adapted to oral health (chewable tablets, lozenges, orodispersible powders...)

When R&D Work Translates into Health Benefits

All our strains are systematically screened for purity, efficacy, innocuity, and documented for their modes of action in order to identify their potential health benefits.

Systematic Screening

- Phenotype profile
- Whole genome sequencing
- Adhesion to specific epithelial cells (small intestine, colon, vaginal)
- Survival to stomach pH and bile acids
- Secretome analyses: H₂O₂, SCFAs and other acids, digestive enzymes, bioactive peptides, surface-layer proteins, bile salt hydrolase activity (BSH), amino acids, neurotransmitters etc.
- pH regulation
- Antimicrobial activity against opportunistic bacteria (food, nosocomial, vaginal and oral)
- Modulation of the immune response: stimulation or reduction of cytokine production and other immune biomarkers (IgA, lymphocytes CD4/CD8, TNF-α, IFN-γ etc.), activation or inhibition of specific immune pathways (e.g. TLR-3, MAPK, NFκB)
- Modulation of the flora
- Modulation of the HPA axis and the nervous system

Protective technologies

From the manufacturer's plant to the consumer's gut, probiotics have to survive many stresses: **product processing** (moisture, temperature, pressure), **storage conditions** and **digestive processes** (acids and bile). We have developed a range of technologies to protect probiotics from these stresses in order to offer **optimal probiotic survival and versatile applications**.

The First Level of Probiotic Protection

- Guaranteed for all strains
- Selection of strains naturally resistant to gastric acidity
- Protective matrix and optimized manufacturing process to ensure shelf-life stability

Microencapsulation Technology

- For sachets, sticks and tablets, and for food applications
- Ideal in case of drastic processing conditions such as compression and heat

Gut Acid-Resistance Delivery

- For capsules and tablets
- Clean-label, food-based and patented
- Versatile
- Efficient gastric protection

Enteric-Coating Technology

- For capsules
- Ensures optimal delivery in the gut for every probiotic strain

Our Formulation Expertise is Grounded in Our in-Depth Knowledge of:

- The stability of individual strains
- The selection of excipients, including verification of the absence of inhibitory interactions with other ingredients
- The optimal choice of dosage form and packaging
- The stability profiles of various semi-finished and finished formulations, which we can benchmark against your formula
- Environmental controls throughout production and transportation

Validation Process for New Ingredients

Lallemand Health Solutions is an active member of **16 trade associations**, contributing to the advancement of industry standards

A Proven Track Record of Claims

Our team of regulatory experts maintains regular surveillance and dialogue with authorities worldwide (e.g. Health Canada, US FDA, TGA, ANVISA, EFSA) for:

- **Successful registration/authorization of our probiotics in 50+ countries**
 - **40+** approved health claims in Canada and **3** in Brazil
 - **200+** food supplements approval registration worldwide
 - **A total of 29 drugs** - Czech Republic, Poland, India, Turkey, and the CIS region
 - Verified strategies for Food for Special Medical Purposes (FSMPs) in the European Union
 - Several listings on strain-specific worldwide databases
- **Consultation as industry experts** for the development of policies pertaining to probiotics
- **Advocacy and regulatory intelligence** in collaboration with trade associations.

Balanced Intestinal Flora. Enhanced Well-Being.

- **It all starts in the gut!** Gastrointestinal health remains the first reason why consumers buy probiotics today and it still represents the first area of clinical evidence for probiotics. With **150 publications**, including preclinical and clinical studies, Lallemand Health Solutions has strongly documented its strains and formulas for gut health applications and well-being.
- Our probiotic bacteria and yeast solutions, demonstrate **beneficial effects** on microbiota balance, occasional diarrhea, occasional constipation, and support **specific populations** such as babies during their first year of life as well as adults with serious gut conditions.

Probiokid® is the world's best-selling pediatric probiotic formulation. Its benefits were summarized in a comprehensive review by Tremblay *et al.*, published in *Nutrients* in 2021.

Stand Out in Your Market with Added-Value Ingredients

Enhance your formulation with a selection of compatible vitamins (B, C, D) and minerals (zinc) to further support natural defenses or choose from yeast-based ingredients designed for immune support:

- **Lalmin®:** Inactivated yeasts enriched in vitamins and minerals (Lalmin® VitaD, Lalmin® Se, Lalmin® Zn)
- **MOS YE:** Yeast cell wall.

Pioneering Psychobiotics for the Microbiome-Gut-Brain Axis

- We are pioneers in the field of psychobiotics, supported by groundbreaking science. In 2010, a landmark clinical study demonstrated that our formula, **Cerebiome®**, significantly reduced psychological stress and related symptoms—such as anger and hostility—in stressed but otherwise healthy individuals. This gold-standard study by Messaoudi marked a major milestone in gut-brain axis research and remains a key reference in scientific literature. Since then, numerous studies in the mental health area have followed.
- Today, our offer supports multiple aspects of mental well-being, including **occasional stress, gut comfort, cognitive function, sleep quality, eating behavior, and skin appearance.**

B. bifidum
Rosell®-71

Cerebiome® + safr'inside™

A combination of two gold standard ingredients with complementary action on the microbiota-gut-brain axis and a synergistic action on bioavailability. Demonstrated multiple benefits to support wellbeing including mental health, gut comfort and sleep, with available claims in various countries.

First effects experienced in only 1 week according to an open-label consumer study under medical supervision.

Cerebiome® is a proud double finalist in the 2025 NutraIngredients Awards Europe for Ingredient of the Year in both the Mind and Mood and the Beauty from Within categories. Our recent clinical study highlights **significant benefits in perceived stress, benefits for sleep, and improvements in skin appearance.**

Probiotics Right for Her

- The benefits of probiotics to support women's health are increasingly recognized, mainly due to their ability to **maintain and restore digestive and vaginal microflora balance.** Specific probiotics can help each individual woman at every stage of her life, from puberty to menopause. With 28 years of expertise in women's health, we strive to empower women through science-backed, holistic solutions for lifelong well-being.

Cranberry can help support urinary tract health by reducing adhesion of bacteria to the urinary tract walls, particularly *E. coli*. This is due to compounds in cranberries called **A-type proanthocyanidins (PACs).**

Prenatis™
Lacidofil®

A Healthy Microbiome for Holistic Beauty

• We promote a holistic approach to beauty by providing probiotics that **help balance the gut, brain, and skin microbiomes**. As orally administered nutritional supplements, our probiotics are formulated and marketed **to support the natural beauty of skin, hair, and nails**—while promoting overall well-being from the inside out.

S. boulardii
CNCM I-1079

Lacidofil®

IMMUSE®

Based on new findings from a dermatologist-supervised open-label study, **Cerebiome®** has demonstrated benefits that support claims related **to improved perceived stress, circadian rhythm regulation, and enhanced skin appearance**. This innovative formula has shown significant effects on occasional stress, sleep quality, and visible skin health.

Our probiotics are combined with carefully selected, compatible ingredients for beauty-from-within formulations.

Backed by available beauty claims, our formulations support **skin firmness, appearance (including gloss, wrinkles, and elasticity), radiance, and tone uniformity**.

Probiotics to Stay Ahead of the Game

- Probiotic supplements are recommended by the International Society for Sport Nutrition (ISSN) for their demonstrated modes of action on athletes **to optimize their wellbeing**. Our flagship strain for sport, *L. helveticus* Lafti® L10 is clinically studied in athletes, demonstrating its role in **sustaining immune function during intense exercise**.
- We offer convenient, on-the-go dosage formats tailored for active lifestyles—featuring naturally sourced flavors and compatible ingredients for an extra kick.

*Based on preclinical *in vitro* data on the combinations. 2'FL: 2'-Fucosyllactose; 3'SL: 3'-Sialyllactose; LNnT: Lacto-N-neotetraose

Heat-Inactivated Strains to Support Natural Defenses

- Our postbiotics are produced through heat inactivation using a gentle process that **preserves the integrity of bacterial cells, resulting in enhanced technical properties and potential health benefits.**

IMMUSE® Heat-inactivated *L. lactis* strain Plasma JCM 5805

- L. acidophilus* Rosell®-418
- L. helveticus* HA-122
- L. paracasei* HA-108
- L. plantarum* HA-119
- L. rhamnosus* HA-111
- B. lactis* Lafti® B94

Streptococcus thermophilus HA-110

Value-added-ingredients:

- Safe bacteria
- No refrigeration needed
- Highly stable
- Compatible with many ingredients

Joy brings us together
KIRIN

Our recent partnership

IMMUSE® Heat-inactivated *L. lactis* strain Plasma

New strategic distribution partnership: Lallemand Health Solutions and Kirin Holding have joined forces to enhance the visibility and market reach of the most documented postbiotic for immune support:

- 15** Clinical Studies*
- 2** Safety Studies
- 26** Mechanistic Studies

*Including 11 clinical studies on the heat-inactivated *Lactococcus lactis* strain Plasma. IMMUSE® is a clinically researched lactic acid bacteria developed by Kirin Holdings Company, Limited.

Expert'Biotics for Pets

- **Pet health and wellness products** are gaining popularity.
- Untapped opportunities exist in this emerging category as **remarkably, over one-third of products making probiotic claims do not actually contain probiotics—and fewer than 10% include identified strains.**
- Given the structural and functional similarities between human and pet microbiomes, we leverage the science behind our **EXPERT'Biotics** to help you develop high-quality, evidence-based supplements for pets.

All formulas contain 1B CFU *S. boulardii*, the most documented probiotic strain with 100+ human clinical studies, and clinically demonstrated to have positive effects in dogs for gut comfort and psycho-physical stress.

Innovation Retrospective:

Highlighting Key Achievements That Have Shaped the Past Six Years

At Lallemand Health Solutions, we turn vision into action.

Here is an overview of the past six years illustrating how we have truly walked the talk, leading the way in probiotic innovation.

We've forged strategic partnerships, made key acquisitions, and significantly increased our production capacity. We kept on optimizing our processes and adopted cutting-edge technologies.

Our journey has included organizational shifts and structural investments, all while keeping a strong focus on a robust pre-clinical and clinical research programs. We do not just talk about innovation, we deliver it. And with a strong pipeline of innovations ahead, we remain committed to supporting our partners in achieving success in their markets.

2025: The Saint-Simon plant achieves **ISO 14001 certification**, confirming the integration of environmental concerns into its daily activities while maintaining its operational imperatives.

2020

Inauguration of a cutting-edge 11.000m² plant in Mirabel (Canada), designed from scratch and built with our collective know-how with state-of-the-art probiotics production machinery

Licensing agreement with **Proge Farm®** to distribute *L. plantarum* (Proge P17630®), Rosella convenient, orally administered probiotic shown to support women's intimate health

Innovative Canadian health claims:
 • **Lafti® L10** as an antioxidant probiotic
 • **IBacilluS+** on Small Intestine Bacterial Overgrowth (SIBO)

EXPERT'Biotics for babies: consolidation of our documented offer and approval of three of our flagship strains for safe use in infant food in China

Cerebiome® becomes the first probiotic formulation for the **brain-gut axis on the Brazilian market**, with approved health claims by the Brazilian Health Authorities

A large North American RCT assessed the impact of **two bacterial strains on multiple IBS subtypes**, finding positive results on both quality of life and frequency of bowel movements

2021

Launch of **GUARD**, a new protective oral delivery technology for probiotic applications. Food-based, clean-label and patented

Partnership with **FrieslandCampina Ingredients** to launch a best-in class gut health concepts, Natural Pro-Digest, combining Biotis® GOS and *B. lactis* Lafti® B94

Cerebiome® receives the Frost & Sullivan 2021 Best Practices Award

Official kick-off of the first North American clinical study on the use of **Nimble Science's** Small Intestine Microbiome Aspiration (SIMBA) capsule to detect a dietary intervention in the small intestine

New publication in Nutrients demonstrating the efficacy of a multi-strain probiotic formulation, **Probiokid®**, in a comprehensive review of 28 clinical studies in pediatric populations

Lallemand Health Solutions joins **Alliance Promotion Microbiote** (now known as European Microbiome Innovation for Health), a newly formed association to place the microbiome at the heart of diagnostic and therapeutic strategies for better health

2022

Launch of our offer for **Nutraceutical applications**

New Canadian claims show that our probiotics **can help formula-fed babies develop a microflora similar to that of breastfed ones**

Cerebiome® combined with **Safr'inside** demonstrated in an open study under **medical supervision reduction of daily stress** with first effects experienced in only 1 week

Lallemand Health Solutions support the **French Gut Project** to accelerate microbiome science

New breakthrough study in adults with overweight during weight loss demonstrating **L. rhamnosus HA-114 improves mood, eating behavior** - such as craving - and **metabolic health**, to support weight management efforts. HA-114 was granted innovative health claims in Canada on eating behaviors

2023

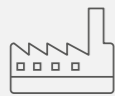

Launch of the first and unique organic version of **S. boulardii**

Creation of **Expert'Biome™** CDMO by Lallemand to strengthen its strategic position in the microbiome field through contract development and manufacturing operations

Launch of **lozenges**, a new convenient dosage form to support oral and gut health. **Oralis SB** also gained new Canadian claims as a natural alternative to conventional mouthwashes

Acquisition of **DietaryPros Inc.**, a US-based full-service contract manufacturer specializing in the formulation and supply of probiotic solutions for the supplement and nutraceutical sectors

New review highlights the beneficial effects of **B. lactis Lafti® B94** on infants' and children's gut health

New study reveals promising results with **Lacidofil®** as an adjuvant to standard therapy, offering an effective approach to *Helicobacter pylori* eradication

An open-label study conducted in Florida in healthy women demonstrated the passage from gut to vagina of three probiotic strains taken orally (**L. plantarum Rosell-1012**, **L. fermentum HA-179**, **L. brevis HA-112**)

A new systematic review and meta-analysis underscores the potential of **IBacillus+** as an effective adjuvant of conventional IBS therapies

2024

Launch of **Prenatis®** to maintain a **healthy pregnancy** and to contribute to the establishment of a **healthy infant microbiome during the first months of life**

New partnership with **dsm-firmenich** for **early-life synbiotic solutions**, leveraging the synergy of probiotics and human milk oligosaccharides

Publication of new pre-clinical findings on the **modes of action of probiotics in sleep-disrupted conditions**

Inauguration of new **R&D laboratories in France** coupled with the **acquisition of new, state-of-the-art equipment to strengthen our bioprocess innovation cluster** and accelerate the development of next-generation strains

The synergy between **FrieslandCampina's Biotis® GOS** and **Lafti® B94** is confirmed by an *ex vivo* gastrointestinal simulation using SIFR® technology assessing their effect individually and as a synbiotic, on gut microbiota and metabolites production

2025

Launch of a complete offer for Healthy Aging, led by **Cerenity™**, a clinically documented formula to support mobility, strength, and quality of life in healthy aging

Cerebiome® demonstrates, in a dermatologist-supervised open-label clinical study, significant benefits for occasional stress, sleep quality, and skin appearance

Cerebiome® named finalist for "Ingredient of the year" award in two separate categories: Mind and Mood and Beauty from Within

Ostia Sciences and **EXPERT'Biome** successfully produced a new oral care probiotic to launch clinical trials

Strategic distribution agreement with **Kirin Holding** to enhance the visibility and market reach of the most documented postbiotic for immune support, **Immuse®**

Innovative study investigating the benefits of probiotics on **healthy women during the menstrual cycle**

The Saint-Simon plant achieves **ISO 14001 certification**, confirming the integration of environmental concerns into its daily activities while maintaining its operational imperatives
