OUR PHILOSOPHY

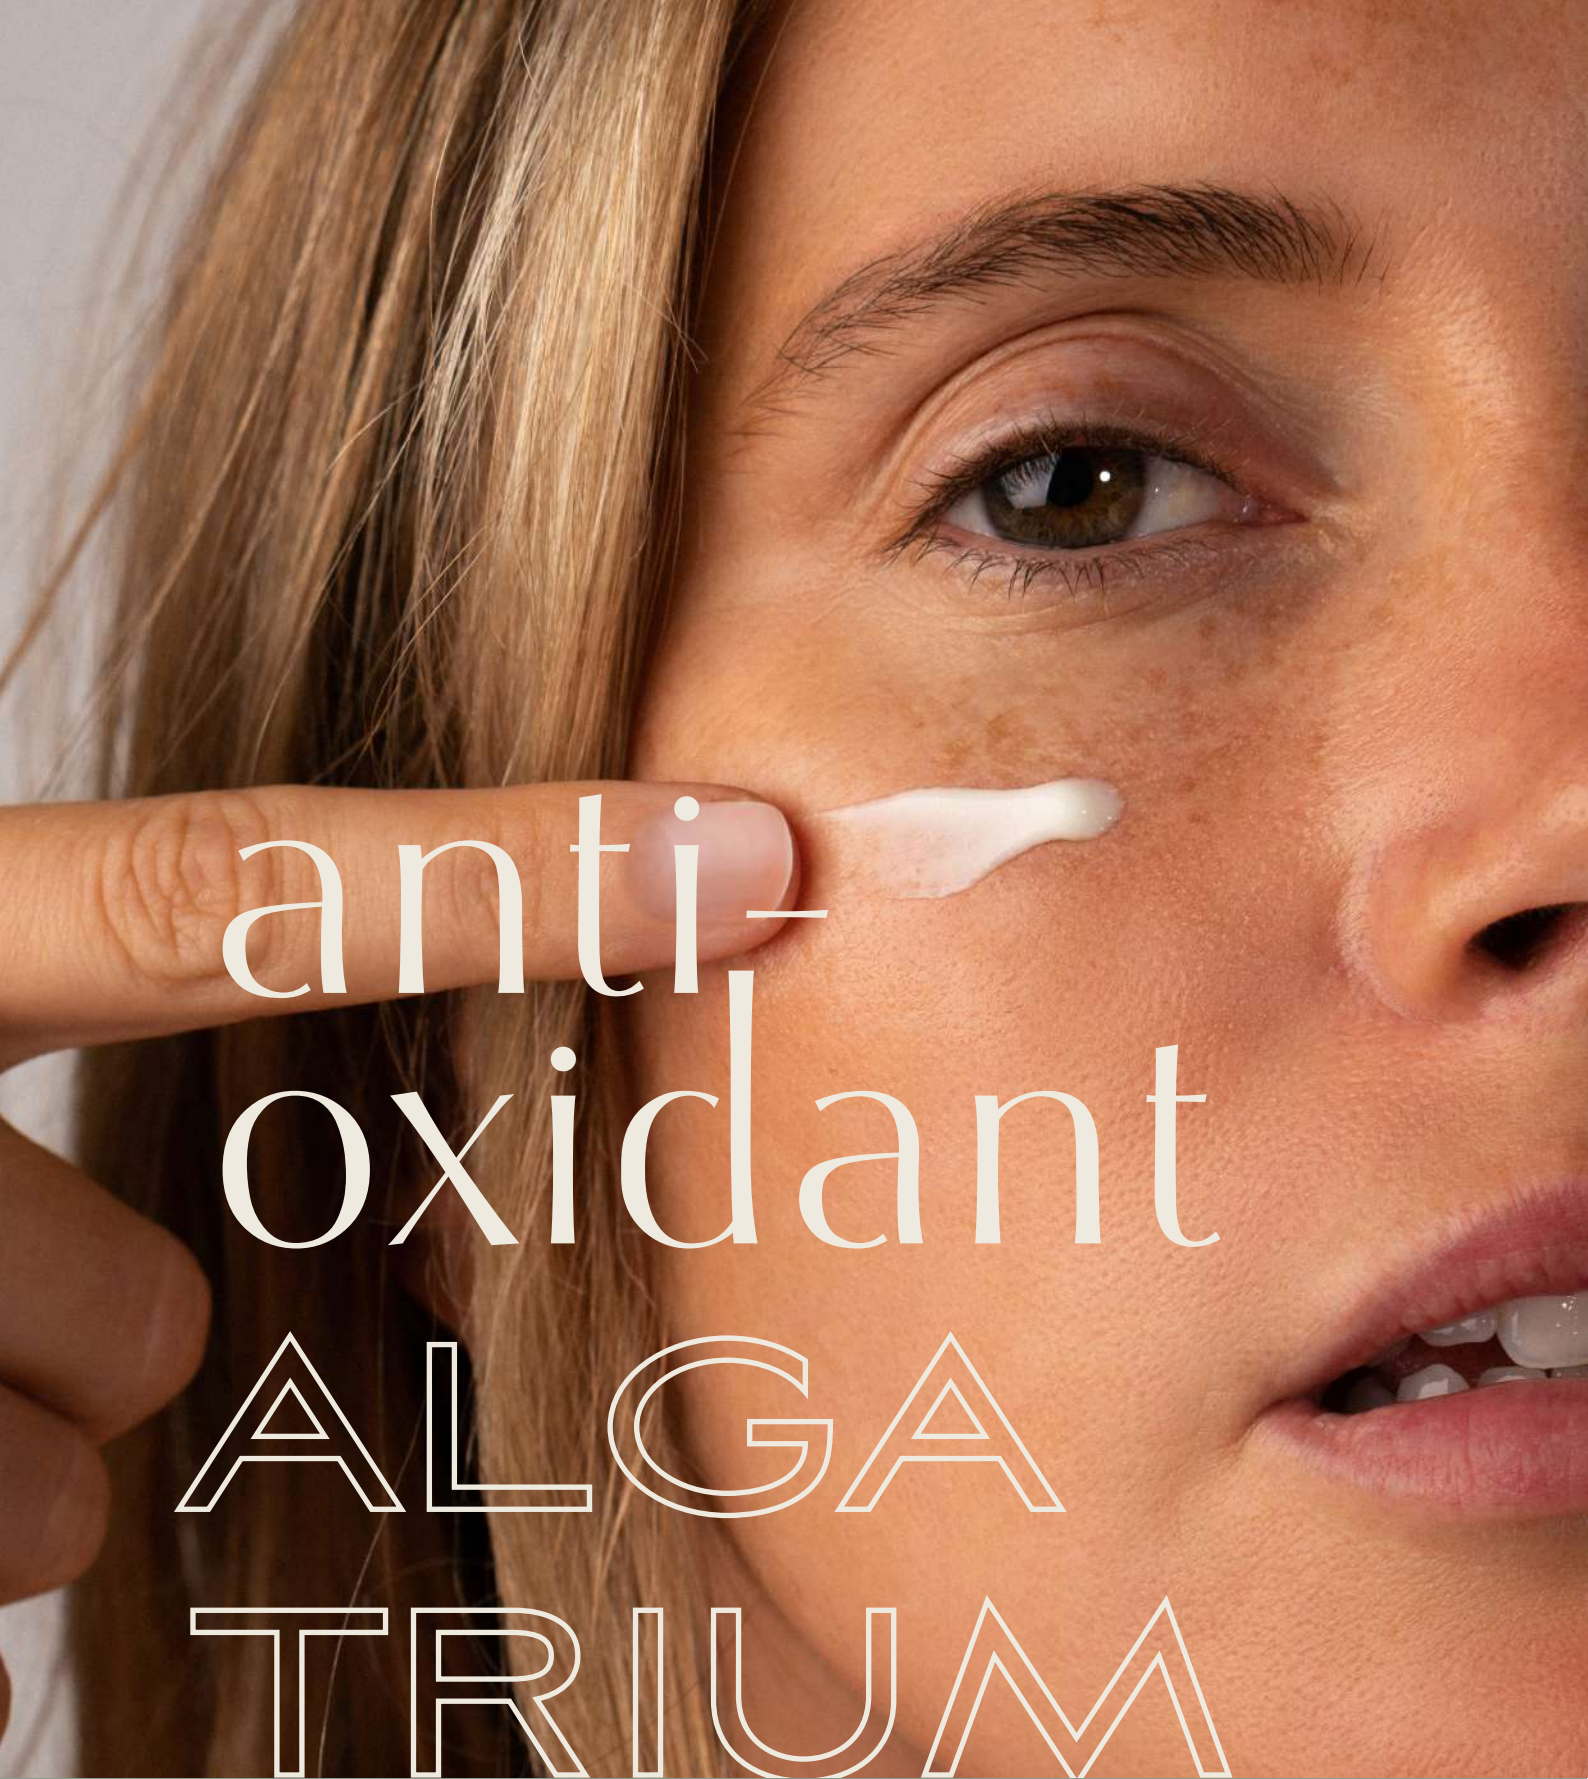

We take care of you in a different way

Brudy Cosmetics is a Spanish company created by Brudy Technology, which is a laboratory in Barcelona with over 25 years of experience working on innovation, research and development. At Brudy Cosmetics, we devote ourselves to natural and sustainable cosmetics with DHA.

Our star ingredient is the Algatrium AL, which is a completely natural oil of marine origin from microalgae, and enriched with high bioactive DHA endorsed by international patents.

Our DHA-Algatrium® molecule is the world's strongest cellular antioxidant.

anti-
oxidant
ALGA
TRIUM

Our star ingredient is Algatrium AL, a completely natural marine origin oil from microalgae, and enriched DHA.

After many years of research, we are certain of its great cellular antioxidant power by inhibiting the signs of cellular oxidation caused by free radicals, solar radiation exposure, and skin aging.

Day Cream

MOISTURISER	50ml / 1.69 FL. OZ	vegan 100%
-------------	--------------------	------------

BENEFITS

Facial Day Cream with anti-aging and antioxidant properties.
 High skin compatibility, for normal and sensitive, combination/oily skin.
 DHA-Algatrium® with antioxidant properties.

Night Cream

NOURISHING	50ml / 1.69 FL. OZ	vegan 100%
------------	--------------------	------------

BENEFITS

Our Nourishing Facial Night Cream is an OVERNIGHT treatment, with a selection of ingredients that provide hydration and nourishment during the night and without a greasy feeling.

DHA-Algatrium® con propiedades antioxidantes.

Bakuchiol oil: powerful sebum regulator that helps improve the skin appearance.

Jojoba and Argan Oil: dry-touch oils that provide beneficial nutrients and hydration, without leaving the skin excessively greasy.

Bisabolol: soothing agent.

Extract of 5 Algae: Fucus, Spirulina, Ascophyllum, Laminaria and Nori; mixture of algae extracts that provide hydration.

Low and high molecular weight sodium hyaluronate: the low molecular weight allows it to reach the deepest layers of the skin, preventing the appearance of wrinkles. The high molecular weight improves hydration in the outermost layers of the skin.
