German Manufacturing Excellence for Beauty, Pharma,
Phytomedicine & Lifestyle

PRESENTED BY CREVIL

Crevil
GERMANY

COMPANY OVERVIEW

Crevil Cosmetics & Pharmaceuticals Germany is a leading German manufacturer specializing in the development, production, and distribution of innovative beauty, pharmaceutical, phytomedicine, and lifestyle products. The company supports brands with end-to-end solutions, including creative design, technical development, and worldwide product registration.

As a trusted private label partner, Crevil combines manufacturing know-how with market-ready brand support

WHAT WE DO

- Product development tailored to customer and market needs.
- Manufacturing of beauty, pharma, phytomedicine, and lifestyle products.
- Private label solutions for brands seeking reliable German production.
- Creative design and technical development support.
- Product registration support for international markets

OUR VALUE PROPOSITION

Crevil offers more than production capacity; it provides a complete platform for building and scaling brands.

From the first idea to final packaging and market entry, the company supports customers through each stage of the product journey.

This integrated approach helps partners reduce complexity, accelerate launch timelines, and maintain consistent quality

QUALITY AND STANDARDS

Crevil states that its products are manufactured in compliance with Good Manufacturing Practices and ISO standards, aligned with German regulatory guidelines for quality and safety.

BROAD PRODUCT CAPABILITIES

Crevil offers an integrated portfolio that spans cosmetic, pharmaceutical, phytotherapeutic, and lifestyle products, enabling customers to source multiple categories from a single German manufacturing partner.

BEAUTY

Face, body, hair, and intimate care.

PHARMA

Function-focused, treatment-oriented products.

PHYTOMEDICINE

Plant-based, herbal care solutions.

LIFESTYLE

Daily wellbeing and comfort products.

PRODUCT DEVELOPMENT

Our team of specialists in hygiene, health and cosmetics creates your bespoke dream product – whether as an entirely new formulation, a fresh relaunch, or a perfectly tailored extension of your existing brand.

PRODUCTION

Embracing innovation and progress, our state-of-the-art production facilities are designed to deliver the highest product quality while optimizing production costs. By leveraging cutting-edge technologies and innovative processes, we ensure excellence at every stage of production without compromise. Committed to perfection, we invest in modern equipment and machinery from leading international manufacturers. This ensures that every aspect of product development adheres to globally recognized standards, guaranteeing exceptional quality and operational efficiency in all our beauty, pharma, phytomedicine and lifestyle products.

CREVIL MARKETS

Crevil sells its products throughout Europe, North America, the Middle East, Asia and Africa, reaching customers in more than 70 countries worldwide.

Our international distribution network includes pharmacies, drugstores, retail chains and online platforms, allowing us to supply both private label and branded products to a broad range of partners.

Through long-term collaborations with importers, distributors and key retail groups, we continuously expand our presence in established markets while opening up new regions.

This global footprint enables us to adapt our product portfolio to regional regulations, cultural expectations and consumer needs, ensuring consistent quality and brand experience across all markets.

ALL ABOUT V
VAGIVAL

Backed by years of experience in gynecology, dermatology, and holistic health, Vagival's approach integrates scientific research, clinical knowledge, and real-world experience. Every product is tested to meet the highest medical standards, providing gynecologist-recommended intimate care that promotes confidence, well-being, and overall feminine health.

Babylu

Gentle Care for Precious Skin

From the very first day, gentle, natural care is essential for every baby's skin. Babylu creates safe, dermatologically tested skincare designed to nourish, protect, and soothe even the most delicate skin. From those first moments of life through everyday routines, our trusted formulas are crafted with love—because nothing is more precious than your baby's skin.

NANO DERMA COSMETIC TECHNOLOGY

Nanoderma focuses on efficacy and scientifically backed facial skincare and treatment, combining high-performance active ingredients with dermatological research in every formula. Designed to target key concerns such as dryness, sensitivity, hyperpigmentation, and premature aging, Nanoderma products aim to deliver visible improvements in skin texture, tone, and resilience while remaining suitable for daily use.

ELAINE PERINE

We prioritize promoting a healthy body image. We do not conform to artificial or idealized standards of beauty. Our focus is not on changing your appearance or meeting advertising ideals—we want you to feel confident, comfortable, and good in your own skin.

We believe in a world where you have the freedom to be yourself—without judgment.

To explore, express, and embrace life boldly. We are committed to providing equal opportunities for everyone to discover their full potential, regardless of who they are, where they come from, or what they look like.

We exist to give you the confidence to be who you want to be.

Lancodent

THE BARE SKIN COMPANY

At The Bare Skin Company, we bridge the gap between advanced dermatological research and your skin's natural biology. While traditional skincare often relies on aggressive agents that disrupt the stratum corneum and trigger inflammatory cascades, our philosophy focuses on acting synergistically with your endogenous cellular pathways.

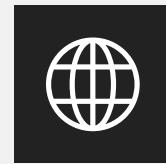

Formulated by clinical experts, our biomimetic molecular complexes utilize advanced delivery systems for optimal transdermal penetration. Instead of overriding your skin's biology, we use clinically validated concentrations to modulate cellular turnover, support the natural moisturizing factor (NMF), and neutralize reactive oxygen species (ROS) before they cause cellular degradation.
