YUNG SHIN PHARMACEUTICAL

For years, YSP has upheld the philosophy of service, integrity and innovation for providing best service to numerous satisfied customers. In order to service more customers and bring happiness to mankind, YSP has strategically established manufacturing facilities in USA, China, Malaysia and Taiwan. After years of development, YSP has successfully expanded its reach to multiple continents and is now an international group with abundant expertise in pharmaceuticals and health supplements manufacturing as the firm foundation. At the moment, YSP will follow in founder's footsteps by keep providing the premium quality products to enhance overall human health.

INTERNATIONAL GROUP

EYES Lab, established in 2011, is YSP's on-site lab. It was named after the all-seeing eye, which represents the capability of discovering micro traces and hidden facts.

In 2011, the plasticizer incident hit Taiwan and panic was spread among the general public. YSP volunteered to take plasticizer analysis cases sent by the general public free of charge. The Information Bureau of Taichung City Government later released the news to express gratitude towards efforts in restoring general public's confidence devoted by EYES Lab. EYES Lab was then certified by TFDA (Taiwan's Food and Drug Administration, Certified No. F046) and that marked the milestone in YSP's history.
