

Disease-Oriented Product Catalog (DOID)

Small molecules and tool compounds classified by disease area (DOID), exploring chemical probes, compound libraries, and related products for therapeutic research to support screening, pathway exploration, and disease model studies.

9,010+ Related Products

Focused on disease research and drug discovery, supporting efficient screening and rapid target identification.

Metabolic Diseases

565

Genetic Diseases

6493

Syndromes

2263

Infectious Diseases

2410

Cell Proliferation Diseases

5658

Organ / Anatomical Diseases

8713

Disease-Based Categorization
Quickly locate research directions

compound Screening
Efficiently match related compounds

Clear Information
Key information at a glance

Exhibition Consultation
On-site communication, fast response

Disease-Oriented Small Molecule Catalog Highlights & Application Scenarios

Catalog Highlights

9,010+ Related Product

Rapid coverage of
disease-research-
related catalogs

Small Molecules & Tool Compounds

Focused on
disease-oriente
d research needs

Chemical Probes / Compound Libraries / Related Products

Support diverse
screening and
exploration

Suitable for Screening, Pathway Analysis & Disease Model Research

Facilitates drug
discovery workflows

Application Scenarios

Disease Mechanism Research

Analyze disease
occurrence and
development
mechanisms; identify key
targets and biomarkers

Drug Discovery & Screening

Provide high-quality
compound
resources to accelerate
lead discovery and
optimization

Pathway Exploration & Validation

Explore disease-related
signaling
pathways and validate
mechanisms of action

Disease Model Research & Compound Screening

Support disease-model
studies and the
creation of
customized compound sets

Website Search

Convenient search,
quick positioning

Transparent Parameters

Detailed and
reliable data

Exhibition Consultation

On-site communication,
professional support

Fast Response

Efficient service,
timely support
