NATURAL

HIGHTECH

SINCE 1922

«The trust and cooperation with our clients and partners give us the power to be creative and to keep finding new solutions.»

Silvia Huber, CEO

NATURAL HIGHTECH IS IN OUR DNA

Natural Hightech is in the DNA of our Swiss family-run company and we have lived according to this value for decades.

Natural means the use of the purest and most natural ingredients, as well as the sustainable management of natural resources, people and the environment. Hightech stands for unique and

state of the art technologies, standards and processes. This combination allows us to work with raw materials in their most natural state. We have preserved and cultivated this know-how since 1922.

We use Natural Hightech.....

You are looking for a partner with profound expertise in processing pure and natural ingredients.

We know Natural Hightech.....

You are looking for a partner with customized products for your pharmaceutical, food or food supplement range. Natural products from modern manufacturing.

We provide Natural Hightech.....

You are looking for a partner with profound expertise in bringing a product idea to market.

We represent Natural Hightech.....

You are looking for a partner with highly motivated and well-educated people who understand your priorities and respond to your needs.

We live Natural Hightech.....

You are looking for a partner for customized product concepts, who applies Swiss quality and know-how.

Made in Switzerland.

«We care about thinking differently – innovation builds the foundation of all day-to-day activities.»

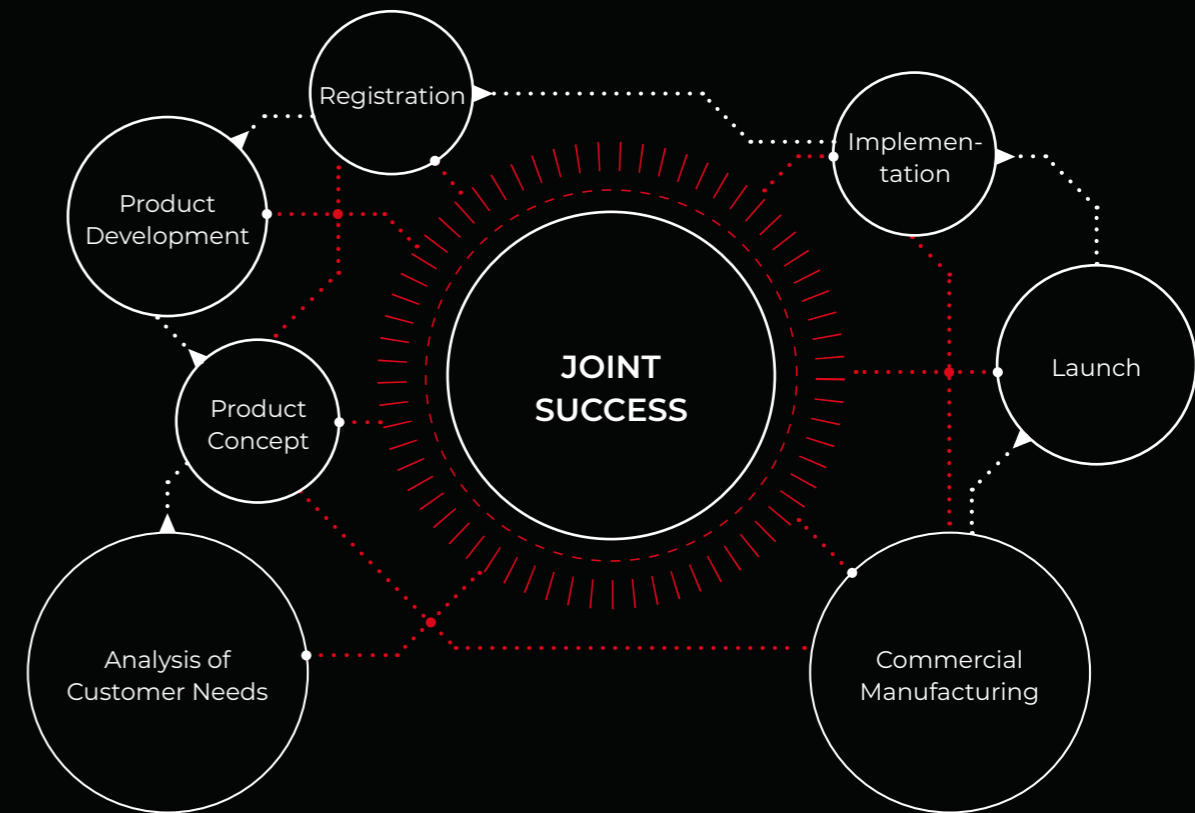

Vanessa Peterhans-Huber, Project Management

FROM THE IDEA TO THE FINISHED PRODUCT

We are your personal expert in designing customised and successful products for the pharmaceutical market, the food supplement market, as well as the food market.

As a producer with decades of experience, we know the details and challenges of bringing instant products, lozenges, pastilles, jellies or tablets from product idea, through product

development, production, packaging, registration, delivery, and finally to market. All from a single source and in Swiss quality.

SOPHISTICATED TECHNOLOGY ACCORDING TO GMP-STANDARDS

For tailor-made
products in different
galenic forms.

Our extensive know-how, as well as our
continuously improved production
machinery & facilities, form an important
part of our core competences.

technologies, to conserve all of the natural
ingredients in the product.»*

Marc Huber, Business Development

USE OF THE BEST RAW MATERIALS

Our global and long-term network of suppliers and partners allows us to utilise the best raw materials for your project. When it comes to sourcing excellent raw materials, we value high quality, good prices and short transportation routes.

«Every day, new insights and trends for improving the quality of life of consumers drive us to find new and innovative product solutions.»

Silvia Huber, CEO

QUALITY APPLIED SUSTAINABLY

Our high quality requirements are represented in each product, the people and the environment, expressing the ecological and ethical standards of the enterprise.

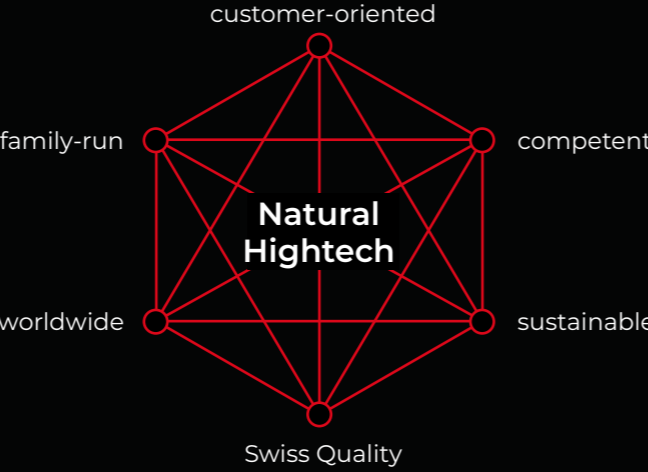

The use of natural ingredients guarantees sustainable and resource-friendly manufacturing along the entire value chain. We make sure that we continuously meet and exceed your expectations, high demands and complex regulatory requirements. Customer requirements, customer

satisfaction and consumer safety are the starting point and the heart of our activities. We follow regulatory requirements and international standards to guarantee high-quality and natural products with health benefits and for enjoyment.

Our Standards

- Swissmedic / GMP
- BRC Food Certification
- IFS Food Certification
- SEDEX / SMETA
- Sedex Member Ethical Trade Audit
- European Organic Products
- Swiss Organic Product
- Fair Trade Products

Our Values

YOUR PERFECT PARTNER

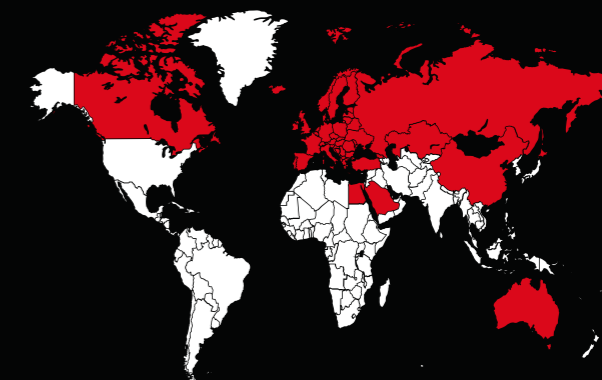

Products from our 240-plus business customers successfully compete in more than 40 countries.

We know the high demands of the markets on every continent, track trends, and analyse and examine sales opportunities together. We develop your product based on your requirements. We take all of the steps from the idea

to the finished product on the market, together. Our offer includes consultation, product development, product design, purchasing, manufacturing, packaging, project management, and registration – up to delivery and beyond.

- All from a single source
- A century of experience and know-how
- Swiss technology, innovation and quality
- > 240 satisfied business customers
- > 1,400 existing formulations
- > 800 product developments per year
- > 200 motivated employees form our team

Export in > 40 countries

«We have been working with Domaco for a long time, over 10 years, and we are completely satisfied. We are very happy with the excellent quality of the products and we appreciate their understanding of our needs and expectations. We can recommend Domaco as a reliable partner to everyone who values quality, technology, and a long-standing and trusting partnership.»

Eirini Varti, Senior Buyer, Supplies & Purchases Department, Apivita SA, Athens, Greece

THE SECRET OF TRADITIONAL FAMILY RECIPES

Healthy roots make us stronger – since 1922 we have had the courage to continuously reinvent ourselves. Immerse yourself in our story and become a part of it.

1922

Dr. med. Aufdermaur discovers the unique, soothing effect of natural herbs. His lozenges help to treat his patients' sore throats, coughs and hoarseness. This is the foundation of the family-run company Domaco.

1960

Development and industrial manufacturing of the first original Swiss herbal tablets.

1962

Alfons Meier takes over the small manufacturing company and develops the first industrially manufactured lozenges with the famous and still successful recipe, «20 Herbs with Honey».

1964

With his business brain and his spirit of innovation, the founder invents the process for transforming herbs into a soluble form – recipes and processes that are still used by Domaco nowadays. The process of instantization is revolutionary.

1969

The product portfolio is expanded with the development of the production technique to manufacture the first sugar-free peppermint tablets.

1972

Launch of the first instantly soluble children's teas made from pure herbs and fruits – specifically formulated and produced for babies and children.

1974

Lemon tea becomes ICE TEA, and a new trend drink is invented by Domaco.

1975

First accreditation of the GMP-Certification.

1981

We begin to export to other countries. Besides Finland, Japan and also the USA become more important markets. New markets, new products, and many new ideas require more space.

1982

We move to the new production facilities in the canton of Aargau.

1993

Handover of the management board to the oldest daughter Silvia Huber-Meier. Acquisition of Tiki AG & Belart Confiseur AG.

2001

The production of OTC-products increases with additional value for the consumer. We build more production facilities according to the latest GMP standards.

2007

We develop the first gummies containing vitamins – also as a sugar-free version. Tasty and soothing gummies with vitamins for young and old.

2018

The new production complex has been successfully completed for the production of pharmaceutical lozenges. It contains Europe's most modern production machine for manufacturing pharmaceutical lozenges.

TODAY

Our 200-plus employees produce lozenges, and tablets, pastilles and jellies and instant granules every day. These products are delivered to Switzerland and more than 40 other countries.
