

COMPANY PROFILE

- Pharmaceutical product out-licensing
- In-licensing
- Co-development
- Contract manufacturing and development services

At Douglas, we improve lives

Our legacy is built on a foundation of scientific excellence.

Douglas' talented team collaborates with a network of innovative partners to meticulously research, develop, manufacture, market, and distribute life-changing pharmaceutical products to more than 50 countries worldwide.

Every product we create is a testament to our commitment to quality, developed in full compliance with the highest international standards and regulatory authorities.

A New Zealand success story

Douglas was founded in 1967 by West Auckland chemist Sir Graeme Douglas. He dispensed prescription medicines from his pharmacy in Te Atatū, until seeing a need for a cough syrup amongst his own customers and formulating a product he called Kofsin.

In 1980 he turned his hand to manufacturing and by the 1990s he was successfully researching and developing his own products for the domestic and international markets.

Today, Douglas is New Zealand's largest family-owned healthcare company. We employ 500 people and export to 50 countries globally.

Douglas products are made to international standards known as GMP (Good Manufacturing Practice).

Our manufacturing facilities undergo regular inspections by both local and international authorities, including Medsafe and the US FDA.

These inspections confirm Douglas' ongoing compliance and provide independent assurance that systems, facilities, and processes consistently meet the high standards expected of modern pharmaceutical manufacturing.

Our recognition

FDA

The FDA's Quality Management Maturity Pilot Study In 2024, Douglas was one of only nine companies selected globally to participate in this ongoing, in-depth review of our processes that contribute to our ability to deliver the right quality products on time.

New Zealand Manufacturer of the Year 2025

Finalist in Best Places to Work New Zealand 2024

Achieved 25% CO2 emission reduction over 5 years with Toitū, New Zealand's leading carbon reducing program

EcoVadis Bronze Sustainability Rating

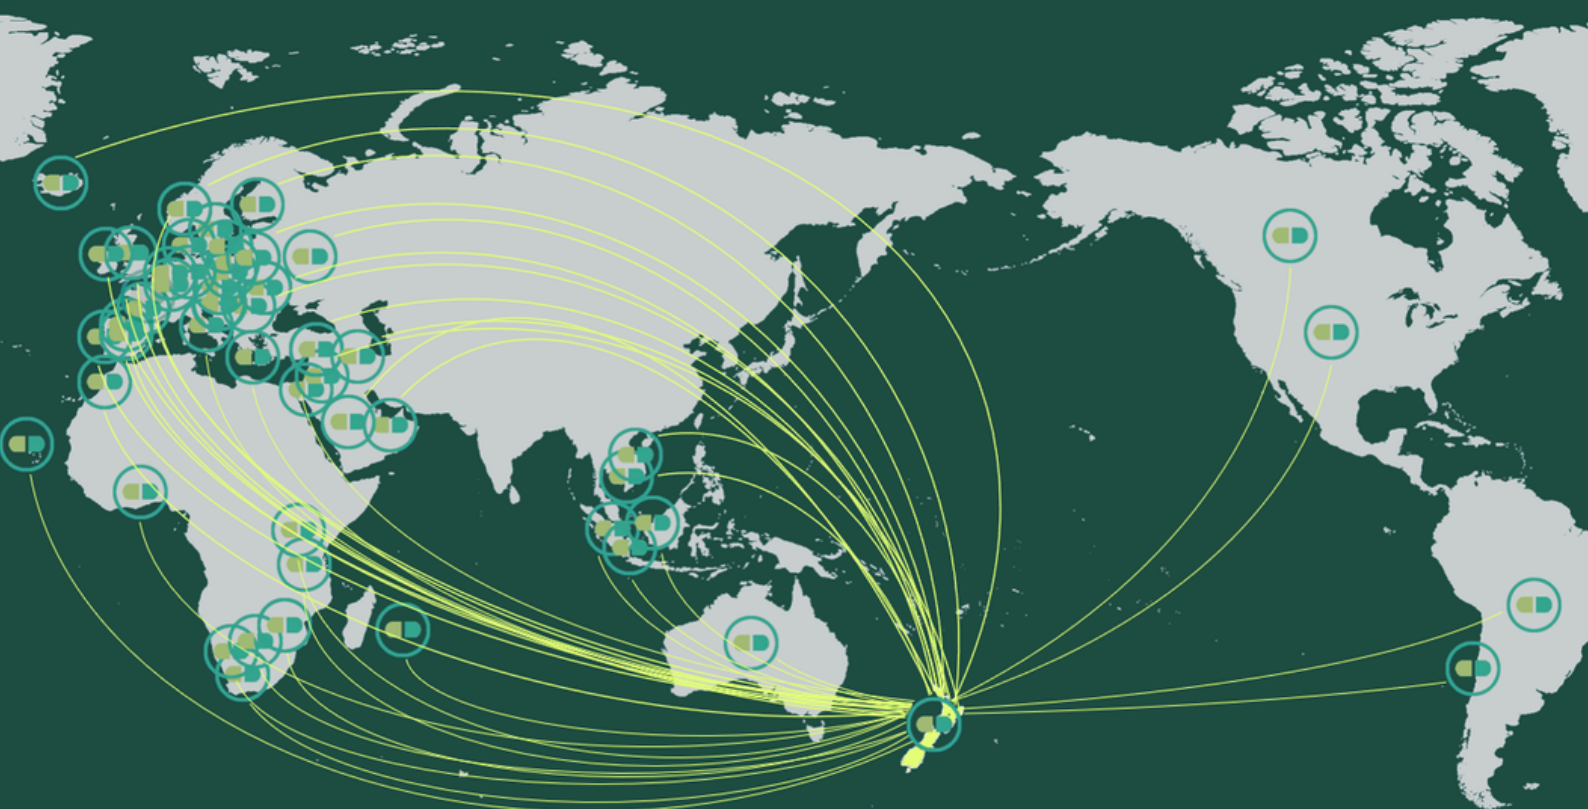

SiteWise Green in workplace health and safety

2025 Global Top 100 Inspiring Workplaces, ranked second in Australasia, 35th globally

Our reach

Dermatology

Acitretin

Strength: 10 mg, 17.5 mg, 22.5 mg, 25 mg
Form: Capsules
Dossier available: Yes
Branded generic available: Novatretin TM

Alitretinoin

Strength: 10 mg, 30 mg
Form: Softgel capsules
Dossier available: Yes
Branded generic available: Zematane TM

Isotretinoin

Strength: 5 mg, 10 mg, 20 mg, 30 mg, 40 mg
Form: Softgel capsules
Dossier available: Yes
Branded generic available: Oratane TM

Central nervous system/ Psychiatry

Clozapine

Strength: 25mg, 50mg, 100mg, 200mg
Form: Tablets
Dossier available: Yes
Branded generic available: Clopine TM

Clozapine Suspension

Strength: 50 mg/ml
Form: Oral suspension
Dossier available: Yes
Branded generic available: Yes

Methylphenidate

Strength: 10mg
Form: Tablets
Dossier available: Yes

Immunology

Azathioprine

Strength: 25 mg, 50 mg, 75 mg and 100 mg
Form: Tablets
Dossier available: Yes
Branded generic available: Azamun TM

Endocrinology

Cyproterone Acetate

Strength: 50 mg, 100 mg
Form: Tablets
Dossier available: Yes

Ethinylestradiol and Cyproterone Acetate

Strength: 35mcg/2mg
Form: Tablets
Dossier available: Yes
Branded generic available: Estelle TM

Paricalcitol

Strength: 1 mcg, 2 mcg
Form: Softgel capsules
Dossier available: Yes

Anti-infective

Posaconazole Oral Suspension

Strength: 40 mg/ml
Form: Oral suspension
Dossier available: Yes

Anti-fungal

Ketoconazole

Strength: 2%
Form: Shampoo
Dossier available: Yes
Branded generic available: Sebizole TM

Oncology

Bexarotene

Strength: 75 mg
Form: Softgel capsules
Dossier available: Yes

Douglas Australia

Douglas has manufactured and supplied pharmaceutical products to Australia for over a quarter of a century, founded on a commitment to reliable supply and stringent compliance.

With a long history of supply and a robust supply chain, we offer what few partners can – a base of operations in both Australia and New Zealand.

Our Australian office is situated in Melbourne, where our team are on hand to provide support and education.

Our expertise is demonstrated by a deep and enduring commitment to patient care through the consistent provision of essential medicines, having manufactured medicines including isotretinoin, acitretin and clozapine for Australia for more than 25 years.

Strategic Partnering and Licensing Opportunities

Douglas Australia is actively seeking to expand its portfolio through strategic collaboration with international and domestic pharmaceutical enterprises.

We invite companies seeking to introduce their products to the Australian market to leverage our established platform.

Douglas offers:

- **Market access:** Utilise our established distribution network and in-depth local market intelligence to ensure a successful product launch and sustained management.
- **Regulatory efficiency:** Benefit from our proven track record in navigating Australia's regulatory requirements and managing the full product lifecycle in compliance with Government standards.
- **A reliable partner:** Partner with an organisation known for its long-standing quality, ethical conduct, and financial stability in the region.

Douglas Pharmaceuticals Generics Co-Development Product Opportunities

Douglas specializes in complex generic product developments that have technical, clinical or IP complexity.

Douglas has a robust portfolio of innovative projects in various therapeutic areas and is seeking co-development partners with complementary expertise and resources to accelerate the development and commercialization of these promising therapies.

Complex Generic Pipeline

Molecule	Form	Indication	Estimated Launch
Testosterone undecanoate	Soft-gel capsule	Hormone replacement therapy	2031
Tafamidis meglumine	Soft-gel capsule	ATTR polyneuropathy	2029
Tafamidis	Soft-gel capsule	ATTR cardiomyopathy	TBC
Adapalene; Benzoyl Peroxide; Clindamycin	Topical gel	Acne vulgaris	TBC
Talazoparib	Soft-gel capsule	Prostate cancer & breast cancer	TBC

Why partner with Douglas?

- **Strong technical capability:** With over 58 years of experience in pharmaceutical development, manufacturing, and commercialization, we possess the knowledge and insights to navigate the complexities of the healthcare landscape. Douglas is world-known for its softgel formulation, micro dosage capabilities and high potency formulations.
- **State of the art facilities:** Our GMP-certified manufacturing plant and advanced research laboratories, and access to clinical research trial teams provide the infrastructure necessary to support projects from concept to commercialization.
- **Commitment to quality:** Douglas is renowned for adherence to the highest international quality standards, ensuring the safety and efficacy of all our products.
- **Flexible partnership models:** We understand that every project is unique. We offer flexible partnership models tailored to your needs and objectives.

Discover the New Zealand advantage:

- **Streamlined ethics:** One multi-regional submission covers all New Zealand sites.
- **Parallel processing:** Begin Phase I clinical trials in New Zealand while preparing your US IND, saving 6+ months of development time.
- **15% R&D tax incentive:** Your project may benefit from New Zealand's Research and Development Tax Incentive (RDTI).
- **Time zone gains:** Our time zone allows us to work while the US and Europe sleeps.
- **IP protections:** Operate in a globally renowned and transparent legal framework.
- **End-to-end reliability:** Douglas CDMO provides a secure environment for manufacturing and supply chain integrity.

**Talk to Douglas CDMO about your next project
for a collaborative and successful partnership.**
