

Let's build quality-driven manufacturing together

Shaping the Future of European Pharma — Reshored & Reliable

Proven European production

For over 30 years, we've delivered trusted oral solid dose solutions backed by European quality, ensuring reliability and sustainability across your pharmaceutical supply chain.

Integrated expertise

Our R&D, QA/QC and operations teams work cohesively to deliver seamless tech transfers through an integrated approach that helps to guarantee consistent quality and compliance at every stage.

Efficiency built in

EU-GMP and GDP certified, with advanced granulation, compression, coating and packaging lines all designed for scalable, compliant production.

- 30 years of EU-based manufacturing
- Annual capacity of 2 billion tablets
- High-shear wet granulation, direct compression, film/sugar coating
- Blister and bottle packaging
- EU GMP, GDP and opiate exemption certified

Closer partners. Stronger supply chains.

Lifecycle manufacturing

From small-scale production to full commercial scale, our facilities are equipped to handle every stage of the product lifecycle with precision and reliability.

Trusted quality

Count on three decades of compliant, dependable European manufacturing for long-term confidence and control.

Collaborative excellence

Seamless tech transfers built on partnership, collaboration, and European quality. We bring production closer to home, strengthening supply security and supporting customers in delivering reliable, responsible healthcare across Europe.
