

## Eficaps<sup>®</sup>, a unique controlled-release technology

Studies show that most current food supplements in the market share the same three challenges:

- Ingredients **degrade before reaching their target site**, reducing bioavailability.
- **Compounds interact** upon release, reducing efficacy.
- More ingredients means lower stability and a **bigger, harder-to-swallow tablet**.

What if you could control **WHEN** each ingredient is released, **WHERE** in the digestive tract it activates, and **AVOID** ingredient interactions, all in a single, once-daily dose? That's not a future concept. It's what Eficaps<sup>®</sup> technology already enables across our Controlled-release Technology range.

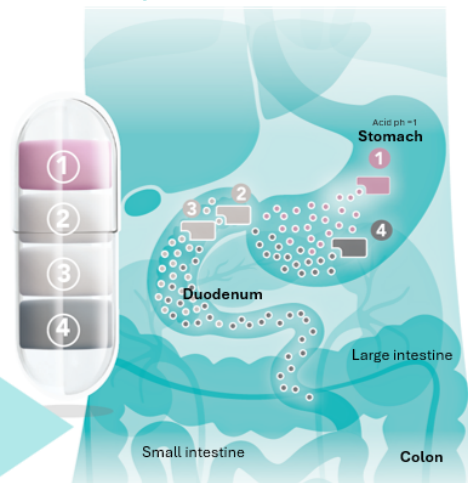

Conventional Supplements 1 capsule

Same place and time release

- Low efficacy - ingredient interactions
- Low bioavailability - ingredient degradation
- Bigger, harder-to-swallow capsule

Eficaps<sup>®</sup> 1 capsule, 4 mini-tablets

Target place and time release

- ✓ Maximum effectiveness - avoid interactions
- ✓ Highest bioavailability
- ✓ Maximum quality, stability of ingredients

# Eficaps® Range

At STE Pharmaceuticals, our controlled-release technology portfolio targets two high-demand therapeutic areas: **immunity**, to support the body's natural defenses, and **central nervous system (CNS)**, covering anxiety and sleep.

## Immunity

The Immunity product box is yellow and white, featuring the Eficaps logo and the text 'defensas • defenses'. It includes a list of ingredients: Echinacea, Vitamin D3, Zinc, and Selenium. To the right, a diagram of a capsule shows four distinct layers: a top orange layer, a yellow layer, a white layer, and a bottom blue layer. The text '+12 years' is displayed below the box.

**1 - GASTRO-RESISTANT** of vitamin D  
**2/3 - IMMEDIATE RELEASE** of Echinacea  
**4 - IMMEDIATE RELEASE** of Zinc and Selenium

## CNS

The CNS section displays two products. The first, 'ansiedad • anxiety', has a blue and white box and a capsule diagram with four layers: pink, white, grey, and black. The second, 'sueño • nightREST', has a blue and white box and a capsule diagram with four layers: white, yellow, blue, and black. Both products include a list of ingredients and the text '+12 years'.

**1 - IMMEDIATE RELEASE** of Thiamine (Vitamin B1) and Saffron  
**2/3 - DELAYED RELEASE** of Magnesium  
**4 - SUSTAINED RELEASE** of Vitamin B6

**1 - IMMEDIATE RELEASE** of Melatonin, GABA and Passion-flower  
**2/3 - IMMEDIATE RELEASE** of Passion-flower and Valerian  
**4 - SUSTAINED RELEASE** of Melatonin, GABA and Passion-flower

- ✓ Unique technology in the market with **immediate, sustained and prolonged release**
- ✓ **High bioavailability** of each ingredient
- ✓ 4 coated mini-tablets. **Maximum ingredient quality and stability**
- ✓ **Synergy** of all ingredients inside the body.
