

Application

CMO

enParticle provides CMO (Contract Manufacturing Organization) services utilizing advanced microfluidic technology, supporting high-quality particle production and customized solutions for industries such as pharmaceuticals, cosmetics, and food. With strict quality control and comprehensive technical support, we ensure reliability and efficiency.

DESIGNING A SUSTAINABLE FUTURE

With enParticle's microfluidic Technology

PRODUCT PORTFOLIO

Microfluidic Formulation Machines

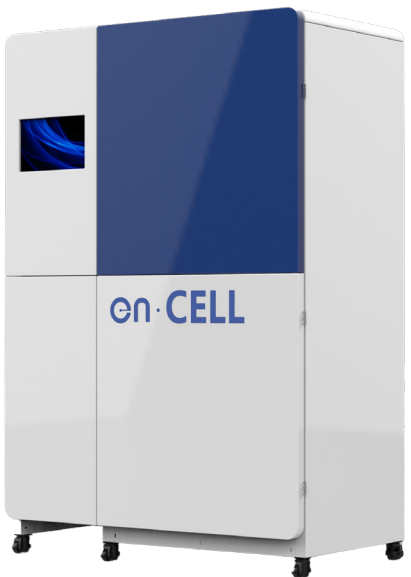

enCELL-Master / Organic

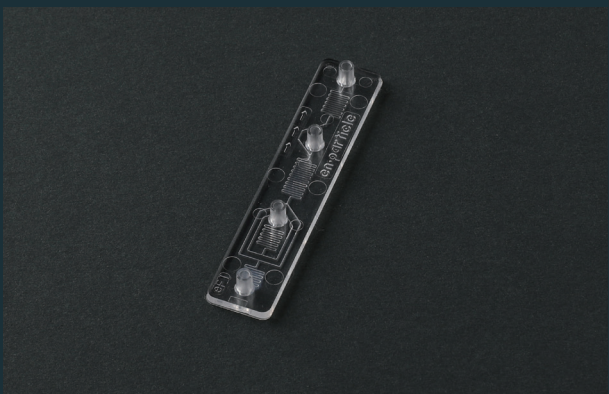

- 1mL~50mL
- Table-top size
- Organic solvent - compatible (*Organic model)

enCELL-Pharm

- 10mL~2L
- A scaled-up configuration of Master/Organic model
- Suitable for installation in GMP facilities

Microfluidic Formulation Cartridge

*For Organic model
