About

The Amino Sciences group in Belgium has been serving customers across EMEA since 1956, providing highly pure Ajinomoto Amino Acids for pharmaceutical, medical food & nutraceutical, food, and cosmetic applications.

Ajinomoto Amino Acids are produced to the highest quality standards under cGMP conditions using non-animal-derived materials, enabling compliance with and certification by major international standards and pharmacopeias, including JP, USP, EP, DMF, JDMF, CEP, ICH, CFR, C-DMF and ISO.

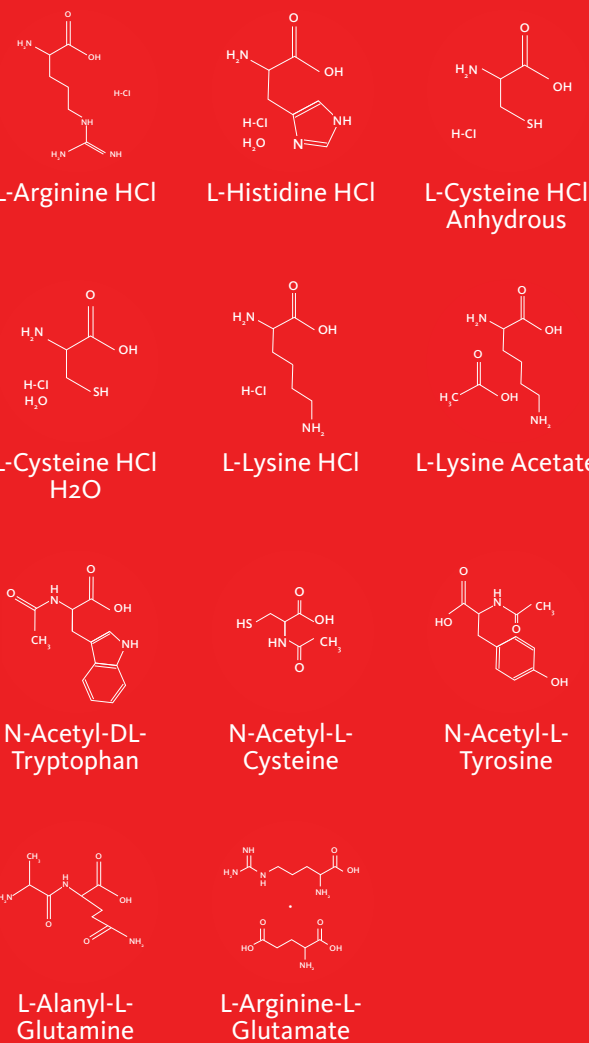

Our global manufacturing network, spanning the United States, Japan, Brazil, and China, utilizes advanced fermentation processes and patented production technologies to ensure consistent quality and reliable supply. Supported by our strategically located distribution warehouse in the Netherlands, we are able to deliver the right quality in the appropriate packaging sizes and provide customers with dependable access to our premium amino acid portfolio.

Available Amino Acid Salts & Derivatives

Our Business Areas

- Enteral & Parenteral Nutrition
- BioPharma & Culture Media
- Pharma API & Intermediates
- Food & Supplements
- Cosmetic & Personal Care

Emerging Applications

- Cultured Meat
- Semiconductor

FULL RANGE OF AMINO ACIDS

- Sustainable fermentation from vegetable raw materials
- Complete process control, from fermentation to purification
- Pharmaceutical and food grades available
- Multiple pack sizes available

HIGH QUALITY AMINO ACIDS

- Batch-to-batch consistency
- Compliance with pharmacopeias (USP, EP, JP, ChP)
- Extensive international certifications (Ecovadis, FSSC, GMP, ISO, Halal, and much more)

SUPPLY CHAIN RESILIENCE

- Stable and sustainable amino acids supply
- Dual-site supply structure
- Global distribution of manufacturing facilities and warehouses
- Business Continuity Planning (BCP)

REGULATORY SUPPORT

- DMF registration for US, EU, Japan and China
- Successful inspections from regulatory authorities (US-FDA, EDQM, PMDA, NMPA, MFDS, TGA, ANVISA)
- Common technical documentation for drug application
