## Cognitive Decline

- ▶ COGITON
- ▶ COGITON LONG TIME

Clinically tested in combination with drugs for Alzheimer disease

Clinically tested on over 300 people

Reduces homocysteine synthesis

Relief as early as 3 months

Patented in USA and EU

### COGITON

**Cogiton** is a clinically tested **food supplement** designed for cognitive decline and memory. It effectively **delays cognitive decline**, as evaluated by MMSE II objective scale, it **reduces homocysteine** level a risk factor for neurodegenerative diseases. It increases antioxidant defences, while **reducing oxidative stress**.

#### RECOMMENDED USE

Cogiton is a drinkable food supplement available in PET vials with a dosing cap, easy to use and it is recommended to take **one vial per day**.

### COGITON LONG TIME

#### RECOMMENDED USE

**Cogiton Long Time**, for longer periods of intake, is available in capsules; it is recommended to take **one capsule per day**.

## Ear Support

- ▶ ACUSTOP

Clinically tested to support cochlear microcirculation

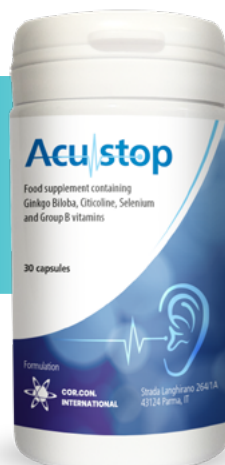

Improves cochlear flow relieving ear loss and tinnitus symptoms

Relief as early as 4 weeks

### ACUSTOP

**Acustop** is a **food supplement with antioxidant action**, formulated to counteract **ear oxidative stress (OS)**. **Clinically tested** in subjects with **mild-to-moderate tinnitus and cochlear hypoperfusion**, it significantly **improves cochlear flow and reduces tinnitus symptoms**. It is taken orally and supports various conditions linked to **ear OS**, and **cochlear hypoperfusion** (tinnitus, hearing loss, vertigo).

#### RECOMMENDED USE

Acustop is available in capsules; it is recommended to take one capsule per day.

## Epilepsy

- ▶ EPILAMBA
- ▶ EPILAMBA JUNIOR

Clinically tested in combination with AEDs

Improves people Quality of Life

Relief as early as 3 months

Patented Worldwide

Reduces gastrointestinal symptom

## EPILAMBA

**Epilamba** supports the wellness of people suffering epilepsy and counteracts side-effects caused by anti-epileptic drugs (AEDs) such as systemic toxicity, neurotoxicity and gastrointestinal issues. **It improve the patients' quality of life and compliance with therapy.**

### RECOMMENDED USE

Epilamba is available in sticks, it is recommended to take one stick per day, dissolved in a glass of water.

**Epilamba Junior** has been tailored with a specific dosage for children's needs. The taste has been specifically chosen to be pleasant taste of wild berry with no added sugar, and palatable. It supports children's well-being and compliance during therapy.

### RECOMMENDED USE

Epilamba Junior is available in sticks, it is recommended to take one stick per day, dissolved in a glass of water.

## EPILAMBA JUNIOR

## Vision Decline

- ▶ PROVIEW

Formulation with scientifically-backed ingredients

Supports metabolic activity and energy demands of the eyes

Protects eye structures from exposure to light, UV rays, pollution, and irritants

Counteracts eyes aging processes

## PROVIEW

**Proview** is a food supplement designed to protect eyes cells from oxidative stress (OS) and contribute to the maintenance of normal vision, with **specific action on eye functions and structures.** The eyes are highly susceptible to oxidative stress due to exposure to various factors (light and ultraviolet rays, pollution, irritants and pathogens), which induce pro-oxidative conditions.

### RECOMMENDED USE

Proview is available in capsules; it is recommended to take one capsule per day.

# Immuno Defence

**Bovine colostrum** is the first milk produced by cows after giving birth. It is a natural matrix rich in antibodies, immune factors, and growth factors that helps build the immune system of newborns.

This natural matrix provides the best support and bioavailability to its active ingredients, which can be further supplemented to create synergistic formulations targeting vulnerable individuals like children and elders.

Our Colostrum products:

- ✓ Promote immunity
- ✓ Help fight infections
- ✓ Improve gut health throughout life.

## FLU & IBS

- ▶ COLOSTRUM
- ▶ COLOSTRUM JUNIOR
- ▶ COLOSTRUM SENIOR

Clinically tested in association with vaccines

Rich in IgG and lactoferrin

Reduces IBS symptoms and seasonal flu episodes

## COLOSTRUM

**Colostrum**, rich in immunoglobulins, growth factors, and essential nutrients, offers protective effects against pathogens.

### RECOMMENDED USE

Colostrum is available in chewable tablets; it is recommended to take **one tablet per day**.

## COLOSTRUM JUNIOR

### RECOMMENDED USE

**Colostrum Junior** is available in chewable tablets specially formulated to be pleasant taste of strawberry flavor for children, with the addition of Vitamins A, C, D3 and E. ; it is recommended to take **one tablet per day**.

## COLOSTRUM SENIOR

### RECOMMENDED USE

**Colostrum Senior** is available in chewable tablets, specifically formulated with a quantity of vitamin C indicated for bone health; it is recommended to take **one tablet per day**.

# Gynecology

## Menopause

► AFRAGIL

Clinically tested on 34 menopause symptoms

Symptoms intensity reduced by more than 45%

Relief as early as 8 weeks

Hormone and drug free

### AFRAGIL

Afragil supports **women experiencing menopause**, from pre-menopause to post-menopause. It effectively tackles a wide range of symptoms including **hot flashes, breast pain and night sweats; fatigue and low energy; irritability and difficulty sleeping; mild joint pains and headaches.**

#### RECOMMENDED USE

Afragil is available in chewable tablets; it is recommended to take **one tablet per day.**

## Hormonal Imbalance

► TEMPLAR

► TEMPLAR LONG TIME

Clinically tested in combination with the most used oral contraceptive pills

Relief as early as 1 month

Reduces the OS due to oral contraception

Patented in EU and APAC

### TEMPLAR

#### RECOMMENDED USE

Templar long time, for longer periods of intake; it is recommended to take **one capsule per day.**

**Templar** is the first food supplement designed to deal with **co-morbidities** related to the use of the **oral contraceptive pills** or **hormone-based therapies**. It reduces the harmful effects linked to the increase of oxidative stress due to hormone imbalance in oral contraception and hormone-therapies.

#### RECOMMENDED USE

Templar is a drinkable food supplement available in PET vials with a dosing cap, it is recommended to take **one vial per day.**

### TEMPLAR LONG TIME

# Cardio-Metabolic

## Endothelial Protection

- ▶ STENOVIT
- ▶ STENOVIT LONG TIME

Clinically tested to protect the cardiovascular system from OS

Clinically tested to reduce OS in Sport

Relief as early as 2 weeks

Helps reduce homocysteine levels

### STENOVIT

**Stenovit** is a food supplement designed to protect blood vessels and microcirculation from oxidative stress (OS). Its synergistic formulation supports cardiovascular health by enhancing antioxidant defenses, contributing to normal homocysteine metabolism, and supporting **normal collagen formation for the physiological function of blood vessels**. It also helps modulate oxidative balance during physical activity, when oxidative stress and metabolic demands are elevated.

#### RECOMMENDED USE

Stenovit: is a drinkable food supplement, it is recommended to take one per day

### STENOVIT LONG TIME

#### RECOMMENDED USE

**Stenovit Long Time**, for longer periods of intake; it is recommended to take **one capsule per day**.

## Metabolic Syndrome

- ▶ LIPIBAN

Clinically tested to reduce body weight, BMI, waist circumference and blood glucose

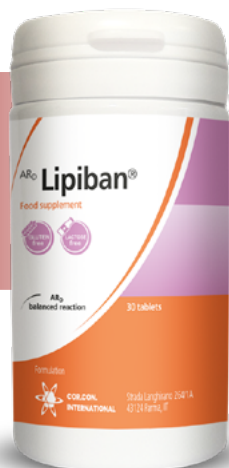

Relief as early as 4 months

Patented EU, USA, Japan, Mexico

### LIPIBAN

**Lipiban** is a patented food supplement based on a unique combination of high content of **Chitosan and Vitamin C**. It is rationally designed to support metabolic functions. Its formulation contributes to the **reduction of dietary fat and cholesterol absorption**, and supports the **maintenance of normal blood lipid levels**. Clinically tested in reducing body weight, BMI, abdominal circumference, and blood glucose levels, confirming its role as an effective aid in metabolic balance.

#### RECOMMENDED USE

Lipiban is available in tablets, it is recommended to take **two tablets half an hour before main meals**

Our **Antilip** products are based on a triple synergistic formulation carefully balanced by combining ingredients with a **mechanical action** (limiting fat absorption) and a **metabolic action** (modulating lipid and glucose levels):

- ✓ modulating the absorption of lipids and glucose (chitosan and chrome)
- ✓ replacing the endogenous need for cholesterol (phytosterols)
- ✓ limiting the production of cholesterol (monacolins)

## Cholesterol

### ▶ ANTILIP

Clinically tested for reduction of LDL cholesterol

Relief as early as 4 weeks

Patented EU, USA, Japan, Mexico

## ANTILIP

**Antilip** is a patented food supplement combining Chitosan, phytosterols, Monacolin K and vitamin C, designed to **reduce LDL cholesterol**.

It reduces lipids absorption and biosynthesis of cholesterol. Synergistically protects cells from oxidative stress that has deleterious effect of cardiovascular health.

#### RECOMMENDED USE

Antilip is available in tablets; it is recommended to take **one tablet half an hour before dinner**.

## Cholesterol & Glucose

### ▶ ANTILIP ADVANCE

Clinically tested for reduction of LDL cholesterol

Relief as early as 4 weeks

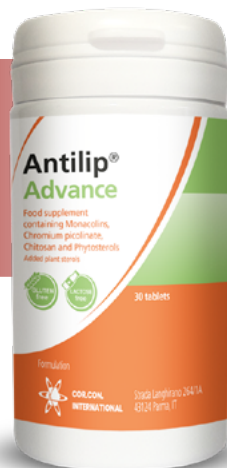

Patented EU, USA, Japan, Mexico

Contains chromium picolinate to help maintain a normal glucose level

## ANTILIP ADVANCE

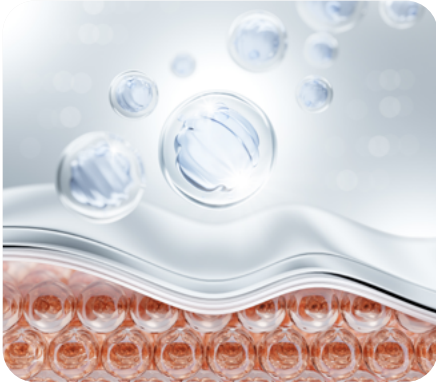

**Antilip Advance** is rationally designed to **reduce LDL cholesterol and glucose blood levels**. It is a patented food supplement based on a unique combination of chromium picolinate, Chitosan, phytosterols, vitamins and Monacolin K.

#### RECOMMENDED USE

Antilip Advance is available in tablets; it is recommended to take **one tablet half an hour before dinner**.

# Cosmeceutics

**Skin aging** can be mitigated by protecting skin structures from excessive oxidative stress caused by pollution, psychological stress, and fatigue. The most powerful skin **antioxidant is squalene, which is naturally produced by the epidermis until the age of 35.**

Our **Esilen** products implement a **dual-action strategy** against skin aging: an **inside-out** approach via oral squalene supplementation and an **outside-in** approach through a squalene-based topical emulsion. Their combined use showed improved results in **reducing oxidative stress and in preserving skin elasticity.**

## Skin-Aging

- ▶ **ESILEN**
- ▶ **ESILEN EMULSION**

Clinically tested its inside-out and outside-in functionality

Improve skin elasticity

Relief as early as 4 weeks

### ESILEN

The “inside-out” branch of our integrated strategy, **Esilen** provides targeted support against skin aging from within. This food supplement, available in vials with a dosing cap, is formulated for high bioavailability and rapid action.

**Esilen** features a unique formulation of *Olea europaea* extract (rich in squalene), bioflavonoids, vitamins, Coenzyme Q10, zinc, selenium, and beta-carotene—a synergistic combination designed to help reduce oxidative stress and support skin health at the cellular level.

#### RECOMMENDED USE

**Esilen** is a drinkable food supplement available in PET vials with a dosing cap, easy to use and it is recommended to take **one vial per day.**

### ESILEN EMULSION

The “outside-in” branch of our integrated strategy, **Esilen Emulsion** offers targeted topical support against skin aging. This emulsion combines *Elaeis Guineensis* oil, *Simmondsia Chinensis* seed oil, and squalene to provide strong antioxidant activity. For the prevention and treatment of skin aging by helping to maintain skin structure and function.

#### RECOMMENDED USE

Designed for daily use, **Esilen Emulsion** complements oral supplementation to enhance skin health through a dual-action approach.

# Oral Care

The **oral cavity** is the main entrance of many substances needed by our body and is continuously exposed to **environmental factors and pathogens linked to an increase in the presence of reactive oxygen species (ROS)**. The **increased amount of ROS** contributes to conditions in the oral cavity such as **gum inflammation, oral mucosal changes, and periodontal disease**.

Our **Odontovis** products provide a way to **counteract oxidative damage** by offering a **synergistic and harmonized network of antioxidant substances able to protect gums, teeth, and oral mucosa**.

## Oral Wellness

- ▶ ODONTOVIS
- ▶ ODONTOVIS TOOTHPASTE

Clinically tested to increase the antioxidant power of saliva in the oral cavity

One of the most antioxidant-rich toothpastes on the market

Relief as early as 1 week

## ODONTOVIS

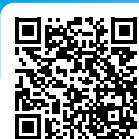

**Odontovis** is a clinically tested food supplement with a unique antioxidant formulation, specifically developed to manage oxidative stress in the oral cavity. It supports the immune system, promotes collagen formation for the normal function of gums and teeth. It contributes to the maintenance of mucous membranes.

### RECOMMENDED USE

Odontovis is a drinkable food supplement available in PET vials with a dosing cap, easy to use and it is recommended to take **one vial per day**.

## ODONTOVIS TOOTHPASTE

**Odontovis Toothpaste** is the first toothpaste specifically formulated to support oral health and help manage conditions affecting the oral cavity.

Its antioxidant and anti-inflammatory efficacy has been validated through in vitro testing, showing a significantly higher antioxidant power compared to commonly used commercial toothpastes. Designed to protect teeth, gums, and oral mucosa, it supports oral tissue regeneration through a physiologically modulated formulation.

# Testimonials

“What we appreciate most about our collaboration with Cor.Con is the continuous scientific support, the production of new publications and, above all, the reliability of deliveries: an aspect that is increasingly rare and valuable today.”

*Distributor*

“Cogiton, in a double-blind clinical study on 52 patients affected by Alzheimer’s disease, showed to be effective in combination therapy with donepezil in reducing oxidative stress and homocysteine and in delaying cognitive decline. In conclusion, Cogiton can be effective in patients with mild cognitive impairment, because it works out on multifactorial aspects of attention and memory, and could also be used in association with anti-dementia drugs.”

*Clinician’s Perspective*

“Epilamba’s goal is to help children with epilepsy overcome the side effects of drug therapies, improving sleep quality, concentration and social life, and ultimately supporting school performance and therapeutic adherence.”

*Clinician’s Perspective*

“The administration of Epilamba certainly contributed to an improvement in her quality of life and that of the family. The product has alleviated, dampened, and sometimes eliminated her great euphoria and agitation, which also leads her not to sleep for several days”

*Caregiver*

“I have used Stenovit for a long time and, since then, I have used it with positive results on patients”

*Clinician’s Perspective*

“We have been working with Cor.Con for years, and what we appreciate most is their support in the formulation and production of innovative supplements, which allows us to truly stand out in the market.”

*Distributor*

“Cor.Con’s strength lies in its solid clinical data and constant scientific support, which enable us to offer doctors credible and effective products with a high patient retention rate.”

*Distributor*

“About 30-40 days after starting Cogiton, my mother began to pay more attention to what people say to her, she remembers more, talks more, and gives advice on how to cook certain dishes that she knows well!”

*Caregiver*

“I think that the use of Epilamba contributed to an improvement in her quality of life, since during the drug therapy we have encountered many problems, including constipation, and she has appeared much more irritated and much more tired with little strength. Thanks to Epilamba she had a great improvement in her gut, her sleep improved a lot and also her mood”

*Caregiver*

‘In my years of practice in sports medicine, I have found that Stenovit significantly improves short-term cardiovascular and muscular recovery in athletes.’

*Clinician’s Perspective*

#### Ratings and Reviews

★★★★★ 4.7/5

“It is an excellent product that my mother, who has Alzheimer’s, uses, and I can see the benefits.”

“Recommended by my neurologist, easy to take, everything’s fine.”

“Excellent product! Recommended to me by a doctor.”

“Excellent product. I bought it for my mother because of her memory problems, and it is working well.”

#### Ratings and Reviews

★★★★★ 5/5

“Excellent, I’ve been using it for many years now and I’m very happy with it.”

“Good monacolin content”

“An excellent product that delivers impressive results.”

#### Ratings and Reviews

★★★★★ 5/5

“The product is excellent. My vascular surgeon recommended it to me and it is effective.”

“It helps with the change of season.”
