**EAR NOSE
THROAT**

ISOTONIC SEA WATER NASAL SPRAY

Index: ENT02

Status: Medical device, class IIb

Indications:

- Daily hygiene and cleansing of the nose and sinuses.
- Moisturizing dry nasal mucosa and sinuses.
- Helping in the case of rhinitis, sinusitis and hay fever.
- Soothing irritation of the nasal mucosa and sinuses in cases of infection and allergy.
- Moisturizing the irritated nasal mucosa and sinuses of oncology patients.

Main ingredients:

- Sea water from the depths of the Atlantic Ocean dilutes thick secretions and brings relief to the nasal mucosa and sinuses during cold. It flushes dust and allergens from the nose and facilitates free breathing. Cleanses the nasal cavity and sinuses, moisturises, provides appropriate environment for mucous membranes.

Usage: Infants from 1 month or 6 months of age*, children and adults. * Two variants of can pressure.

Packaging: Plastic snap-on bottle 30/50 ml with APF atomizer. BOV aluminium spray can 50/100/150 ml with overprint + applicator.

HYPERTONIC SEA WATER NASAL SPRAY

Index: ENT09

Status: Medical device, class IIb

Indications:

- Cleansing the nasal cavities and sinuses during runny nose and cold.
- Unblocking the nose and sinuses during hay fever and allergies.
- Helping during sinusitis and infections.

Main ingredients:

- Hypertonic seawater is a solution in which the salt concentration is much higher than in the cells of the human body, which allows you to naturally reduce the swelling of the nasal mucosa and sinuses.

Usage: Children over 3 years of age and adults.

Packaging: Plastic snap-on bottle 30/50 ml with APF atomizer. BOV aluminium spray can 50/100/150 ml with overprint.

ISOTONIC SEA WATER WITH HYALURONIC ACID AND ALOE EXTRACT

Index: ENT03

Status: Medical device, class IIa

Indications:

- Daily hygiene and cleaning of the nose and sinuses.
- Moisturizing dry nasal mucosa and sinuses.
- Helping in the case of rhinitis, sinusitis and hay fever.
- Soothing irritation of the nasal mucosa and sinuses in cases of infection and allergy.
- Moisturizing the irritated nasal mucosa and sinuses of oncology patients.

Main ingredients:

- Seawater from the depths of the Atlantic Ocean cleanses the nasal cavity, moisturises, flushes dust and allergens from the nose and sinuses and facilitates free breathing. Dilutes thick secretions and brings relief to the nasal and sinus mucosa, e.g. during colds.
- Sodium hyaluronate and aloe extract intensively moisturizes the dry and irritated mucous membrane of the nose and sinuses.

Usage: Children over 6 months of age and adults.

Packaging: Plastic snap-on bottle 30/50 ml with APF atomizer.

SALINE NASAL RINSE KIT (ISOTONIC/HYPERTONIC)

Index: ENT25

Status: Medical device, class IIb

Indications:

- For the prevention and symptomatic treatment of the nose and sinuses, mainly in the case of:
- Inflammation of the nasal mucosa and sinuses.
- Runny nose of various causes.
- In nose and sinus hygiene.

Directions for use:

- To prepare an isotonic solution: dissolve 1 sachet in 240 ml of water.
- To prepare a hypertonic solution: dissolve 2 sachets in 240 ml of water.

Main ingredients:

- Sodium chloride (after preparing an isotonic or hypertonic solution) unblocks and cleanses the nose and sinuses of excessive secretion and residual mucus.

Usage: Children over 4 years of age, adults.

Packaging: Basic set: 250 ml bottle with applicator and 10/12/30 sachets of sodium chloride. Extension set: 30/60 sachets of sodium chloride.

LACTATED RINGER'S SOLUTION RINSE KIT

Index: ENT33

Status: Medical device, class IIb

Indications:

- The lactated Ringer's solution in contact with the mucous membranes, ensures their hydration and cleansing.
- Maintaining nasal and sinus hygiene.
- For the prevention and symptomatic treatment of the nose and sinuses, mainly in the case of:
 - inflammation of the nasal mucosa and sinuses,
 - runny nose of various causes,
 - in nose and sinus hygiene,
 - after ENT surgery.

Directions for use:

- To prepare an isotonic solution: dissolve 1 sachet in 240 ml of water.
- To prepare a hypertonic solution: dissolve 2 sachets in 240 ml of water.

Main ingredients:

- Lactated Ringer's solution is a precisely selected composition of salts including sodium chloride, potassium chloride, calcium chloride, and sodium lactate, making the solution similar to physiological fluids. When applied to the nasal mucosa, it moisturises and cleans it.

Usage: Children over 4 years of age, adults.

Packaging: Basic set: Easy to use 250 ml bottle with applicator and 6/10/30 sachets for preparing the solution.

LACTATED RINGER'S SOLUTION NASAL SPRAY

Index: ENT41

Status: Medical device, class IIa

Indications:

- Moisturising and cleansing of the dry nasal mucosa.
- Soothing irritations of the mucous membrane, in case of infection and allergy, i.e. hay fever.
- Facilitating the removal of allergens from the nasal cavities.
- Daily care and hygiene of the nose.

Main ingredients:

- Lactated Ringer's solution is a precisely selected composition of salts including sodium chloride, potassium chloride, calcium chloride, and sodium lactate, making the solution similar to physiological fluids. When applied to the nasal mucosa, it moisturises and cleans it.

Usage: Children from 1 month of age, adults.

Packaging: Snap-on plastic bottle 30 ml with APF atomizer.

NASAL SPRAY WITH SESAME, BERGAMOT AND MARJORAM OILS

Index: ENT31

Status: Medical device, class IIa

Indications:

- Dry nasal mucosa caused by external factors of various origins.
- Protective when staying in dry, hot, air-conditioned and smoky rooms.
- To soothe irritations in the case of infections and allergies of the nasal mucosa.
- In a state of discomfort after using oxygen during therapeutic procedures.
- Soothing the irritation of dry and cracked skin around the nose.

Main ingredients:

- The use of bergamot and marjoram oils, due to their characteristic fragrance, increase the comfort of product use.

Usage: Children over 6 years of age and adults.

Packaging: Plastic snap-on bottle 15/20 ml with atomizer.

MOISTURISING NASAL OINTMENT

Index: ENT10

Status: Medical device, class IIa

Indications:

- Dryness of the nasal mucosa caused by various factors.
- Helpful in cases of viral or bacterial infections.
- Soothing irritated and cracked skin around the nose during infection.

Main ingredients:

- Borage oil and olive oil create a protective barrier, supporting the maintenance of appropriate moisture of the mucous membranes and irritated and cracked skin around the nose.
- Prebiotic Biolin P supports the development of physiological bacterial flora, thus preventing the development of pathogenic microorganisms.

Usage: Children over 1 year of age and adults.

Packaging: Plastic tube 15 g.

SINUS HOT-REM POWDER FOR ORAL SOLUTIONS

ENT49 – raspberry (sugar free)

Status: Dietary supplement

Indications:

- Recommended as a dietary supplement with vitamin C and zinc in the autumn-winter and winter-spring periods.

Main ingredients:

- Vitamin C contributes to maintain the normal function of the immune system during and after intense physical exercise and contributes to the reduction of tiredness and fatigue.
- Zinc contributes to the normal function of the immune system.
- A carefully selected blend of natural plant extracts with a wide range of traditional uses:
 - mullein flower extract,
 - elderflower extract,
 - linden blossom extract.

Usage: Children over 3 years of age, adults.

Packaging: 10 or 20 sachets with powder.

EAR WAX REMOVER WITH SODIUM DOCUSATE

- spray
- drops

Index: ENT05/spray, Index: ENT05

Status: Medical device, class IIa

Indications:

- Regular ear hygiene to prevent accumulation of ear wax.
- Unblocks the ear canal, removes residual secretion in the ear.
- Prevents the re-accumulation of earwax.
- Supporting the process of cleaning the ear from secretions resulting from otitis externa, in particular the auricle.

Main ingredients:

- Sodium docusate is an ear wax softener, that facilitate ear wax removal.
- Aloe extract is known for its soothing and moisturising effects.
- Hyaluronic acid blends with moist secretions of mucous membranes in the ear, deeply moisturises.

Usage: Children over 1 year of age and adults.

Packaging: Ear spray: plastic snap-on bottle 20 or 30 ml with atomizer. Ear drops: plastic bottle 15 g with dropper.

EAR WAX REMOVER SPRAY WITH OLIVE AND MINT

Index: ENT07

Status: Medical device, class IIa

Indications:

- Regular ear hygiene in order to prevent accumulation of ear wax.
- Dissolving and removing earwax deposits,
- Moisturizing the mucous membranes of the external auditory canal.
- Ear hygiene in people using hearing aids, as well as in people with excessive earwax production.
- Elimination of water retention in the ear canal during bathing for people practicing water sports.

Main ingredients:

- Olive oil dissolves and removes residual earwax, moisturizes the ear canal, thus maintaining its proper hygiene.
- Mint oil, thanks to its fresh smell, provides comfort for the patient.

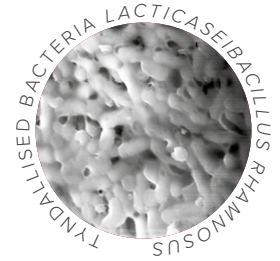

Usage: Children over 3 months of age and adults.

Packaging: Plastic snap-on bottle 15 or 30 ml with atomizer.

THROAT SPRAY WITH TYNDALLISED LACTICASEIBACILLUS RHAMNOSUS BACTERIA

Index: ENT43 RASPBERRY AND MINT FLAVOUR

Status: Medical device, class I

Indications:

- Supportive in inflammation of the mouth and throat associated with bacterial or fungal infection.
- To provide the relief of symptoms, such as dry mouth, dry cough, itchy throat, difficulties with swallowing.
- In dryness of the mucous membranes, as a result of medication (e.g. antidepressants, antihistamines).
- Supportive in inflammation of the gums.
- Prevention of dental caries and plaque formation.
- As a prevention after dental procedures.
- For people exposed to irritating external conditions e.g. air-conditioning, polluted air, nicotine smoke.

Main ingredients:

- Polyvinylpyrrolidone (PVP), tyndallized (non-viable) lactic acid bacteria *Lactocaseibacillus rhamnosus*, glycerin and xylitol coats the mucous membrane of the mouth and throat, creating a protective film.
- Thanks to its moisturizing effect, it maintains the elasticity of the mucous membranes, which effectively relieves irritation and discomfort associated with dry mouth.

Usage: Children from 3 years of age and adults.

Packaging: Plastic snap-on bottle 30 ml with short or long atomizer.

THROAT SPRAY WITH ICELAND LICHEN

Lemon flavour

Index: ENT14

COATING LOZENGES WITH ICELAND LICHEN

Blackcurrant flavour

Index: ENT12

Status: Medical device, class IIa

Indications:

- As a support during the therapy of inflammation of oral cavity and throat, of various etiologies e.g. pharyngitis, tonsillitis or aphthosis.
- To relieve symptoms of dry cough and hoarseness.
- In the case of people who put excessive strain on their vocal cords (teachers, singers, speakers, presenters, etc.).
- In people with dryness of oral cavity.
- In people particularly exposed to the influence of harmful, external factors, such as dry, air-conditioned, cold, polluted air.

Main ingredients:

- Natural extracts of Icelandic lichen, mallow and linden, rich in mucinous substances coat mucosa, protecting and covering the ending sensory nerves responsible for causing sore throat and cough reflex.
- The sodium hyaluronate (a component of the created film) additionally intensively moisturizes dried and irritated mucosa, what brings relief.

Usage: Children over 1 year of age and adults.

Packaging: Plastic snap-on bottle 30 ml with long or short atomizer.

Usage: Children over 4 years of age and adults.

Packaging: 1, 2 or 3 blisters with 12 lozenges.

COATING SYRUP WITH ICELAND LICHEN

Index: ENT15 plastic bottle – mildly sweet taste

Index: ENT40 glass bottle – sweet and sour taste

Status: Medical device, class IIa (plastic bottle); Medical device, class I (glass bottle)

Indications:

- As a support during the therapy of inflammation of oral cavity and throat, of various etiologies e.g. pharyngitis, tonsillitis or aphthosis.
- To relieve symptoms of dry cough and hoarseness.
- In the case of people who put excessive strain on their vocal cords (teachers, singers, speakers, presenters, etc.).
- In people with dryness of oral cavity.
- In people particularly exposed to the influence of harmful, external factors, such as dry, air-conditioned, cold, polluted air.

Main ingredients:

- Natural extracts of Icelandic lichen, mallow and linden, rich in mucinous substances coat both oral cavity and the throat, protecting and covering the ending sensory nerves responsible for causing sore throat and cough reflex.
- The sodium hyaluronate has strong moisturizing properties.

Usage: Children over 1 year of age and adults.

Packaging: Plastic bottle 125ml or glass bottle 125/200 ml with measuring cup.

DRY & CHESTY COUGH SYRUP WITH HONEY

Index: ENT50

NEW
PRODUCT

Status: Medical device, class IIa

Indications:

- For dry and chesty cough.
- Relief of irritation and dryness of the mucous membranes of the mouth and throat.
- For inflammation of the oral cavity.
- Especially for people who work with their voice or are exposed to harmful external factors, e.g. dry air.

Main ingredients:

- PVP (Polyvinylpyrrolidone) creates a protective film on the surface of the mucous membrane.
- Linden honey gives a pleasant taste.
- Sodium hyaluronate creates a protective layer, has the ability to bind a large number of water molecules.

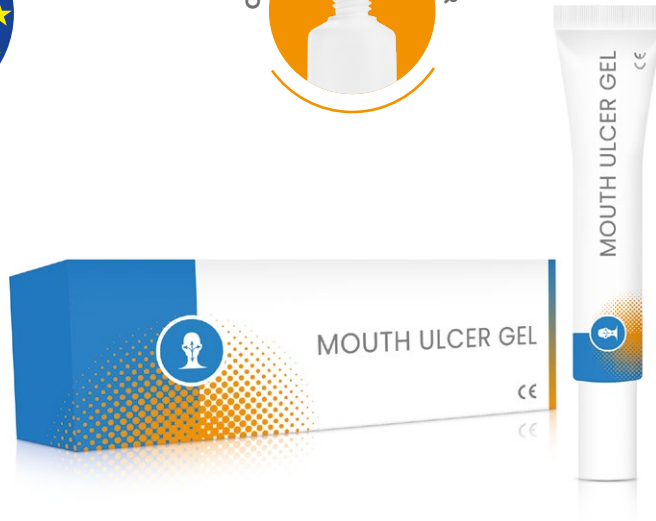

Usage: Children over 3 year of age, adults.

Packaging: Glass bottle 125/200 ml with measuring cup.

MOUTH ULCER GEL

Index: ENT37

Status: Medical device, class I

Indications:

- Small aphthae (Mikulicz's aphthae).
- Herpes-like mouth ulcers, ulcers which are a symptom of the Behçet's disease.
- Minor injuries and abrasions of the oral mucosa caused by dentures and orthodontic appliances.
- Product creates a protective film on the surface of the oral mucosa, which isolates the area with erosion or ulceration caused by irritants.
- Alleviating symptoms such as burning and pain
- Supporting the proper renewal of the oral cavity epithelium.

Main ingredients:

- Sodium hyaluronate intensively moisturises and soothes mucous membranes of oral cavity.

Usage: Children over 1 year of age and adults.

Packaging: Plastic tube 15 ml.

TEETHING GEL

Raspberry flavour

Index: CH27

Status: Medical device, class I

Indications:

- Relieves symptoms associated with teething, including pain, swelling, redness and itching.
- Increases the comfort of the infant during tooth eruption.
- Facilitates gentle massage of swollen gums providing relief.

Main ingredients:

- High-molecular sodium hyaluronate creates a protective film on the surface of the gums.
- Aloe vera moisturises and soothes redness.
- Xylitol provides a sweet taste and at the same time provides effective protection against caries.

Usage: Children over 2 months of age.

Packaging: Plastic tube 15 ml.

WOMEN'S HEALTHCARE

VAGINAL GEL

Index: WH01

Status: Medical device, class IIb

**Indications:**

- Vaginal dryness associated with hormonal changes in all periods of a woman's life, especially during menopause, postpartum, lactation and caused by chemo and radiotherapy.
- Abrasions or other factors related to superinfection.
- Restoration of natural physiological condition of vaginal mucosa after gynecological intervention.
- Symptoms of vaginal atrophy, i.e. itching, burning, swelling, redness, abnormal discharge, feeling of tension, or discomfort during sexual intercourse.
- For diabetic women to help maintain an appropriate vaginal mucosa environment.
- After chemo and radiotherapy.

**Main ingredients:**

- Hyaluronic acid is a natural component of the human body. Associated with moist secretions of vaginal mucosa, it forms a gel protective film on its surface.
- Lactic acid, by providing an acidic environment in the vagina, maintains the microbial balance and prevents spread of pathogenic bacteria.

Usage: For women. For vaginal use.

Packaging: 5 disposable, plastic applicators 5 ml each. Plastic tube 50 ml, reusable applicator.

INTIMATE CARE GEL WITH OAK BARK AND LACTOBACILLUS FERMENT

Index: WH08

Status: Pharmaceutical cosmetic

Indications:

- Intensive moisturization and soothing of irritation symptoms in external intimate areas.
- In case of dryness of external genitals.
- To maintain physiological pH for women with increased susceptibility to inflammations.
- To protect intimate areas against bacterial and fungal infections.
- In case of feeling of burning, itching and irritation.
- For external use only.

Main ingredients:

- *Lactobacillus* ferment is a probiotic-based ingredient created by the fermentation of *Lactobacillus*. It helps maintain proper pH intimate areas, thus protecting them from infections and supporting the development of beneficial bacterial flora.
- Prebiotic Biolin P protects the lining of the intimate areas by stimulating the growth of beneficial bacteria. Ensures the appropriate balance of microbiological flora.
- *Quercus petraea* bark extract is a natural component rich in tannins. It soothes delicate and irritated skin, strengthens its natural protective barrier and has astringent effect on the skin.
- *Salvia officinalis* leaf extract is a plant ingredient which helps to reduce irritation and redness of intimate areas. Supports protection against bacterial and fungal infections.

Usage: For women, suitable also for pregnant women and after childbirth.

Packaging: Plastic tube 50 ml.

INTIMATE HYGIENE GEL WITH OAK BARK

Index: WH09

INTIMATE HYGIENE GEL WITH CRANBERRY EXTRACT

Index: WH05

Status: Pharmaceutical cosmetics

Indications:

- Gentle cleansing of intimate areas.
- Supports acidic pH and microbiological balance.
- Helps protect against symptoms of intimate infections.

Main ingredients:

- Salvia officinalis leaf extract helps soothing intimate areas and supports protection against bacteria and fungi.
- Glycyrrhiza glabra root extract moisturises and helps to reduce irritation.
- Biolin P provides the proper balance of microbiological flora.
- Quercus petraea bark extract soothes and protects the skin.

Indications:

- Helps maintain the natural microflora of intimate areas by supporting an acidic pH.
- Helps protect against symptoms associated with intimate infections and reduces itching and burning.

Main ingredients:

- Cranberry extract moisturises and improves skin appearance.
- Lactic acid helps maintain the natural acidic pH of intimate areas.
- Biolin P forms a protective film and supports the natural microflora.
- Sodium hyaluronate helps hydrate dry and sensitive skin.

Usage: For women.

Packaging: Plastic bottle 125/250 ml with pump or disc-top.

Usage: For women (also for pregnant women and after childbirth).

Packaging: Plastic bottle 250 ml with pump, flip-top or disc-top.

**PROCTO
CARE**

MICRO-ENEMA:

- constipation
- hemorrhoids

Index: WH11

NEW
PRODUCT

Status: Medical device, class I

Indications:

- Supporting defecation, especially in people struggling with problem of hemorrhoids, anal fissure and constipation.
- In case of discomfort when passing stools in the case of pathological hemorrhoidal conditions and anal fissures.
- Moisturizing the anal mucosa and soothing its irritation.
- Difficulty passing stools during constipation.
- The coating and sliding properties of the emulsion relieve unpleasant symptoms (burning and pain) and allow comfortable defecation.

Main ingredients:

- The effect of the emulsion is achieved thanks to a complex of carefully selected natural ingredients: 4 oils (coconut, linseed, sunflower, olive oil) and hyaluronic acid.
- Hyaluronic acid moisturizes and protects the rectal mucosa, which can lead to a reduce discomfort during defecation.
- The coating and sliding properties of the emulsion relieve unpleasant symptoms and allow comfortable defecation.

Usage: Infants, children and adults.
For internal use.

Packaging: 5 micro-enemas, 4 g each.

MEDICAL HEMORRHOIDS GEL

Index: WH10

NEW
PRODUCT

Status: Medical device, class I

Indications:

- For people with pathological changes in the area of hemorrhoids.
- In case of discomfort, irritation of the skin surrounding the anus, itching or burning sensation, soreness and redness of the anus area, which can accompany both internal and external hemorrhoids.
- For people exposed to risk of pathological hemorrhoidal conditions, especially those who perform long-term work in a sitting position (drivers, office workers), professional athletes (weightlifters, cyclists, motorcyclists) and obese people.
- Recommended for pregnant and breastfeeding women.
- For external use only.

Main ingredients:

- Hyaluronic acid supports the return of the skin to a normal physiological state.
- Aloe vera gel contains mucopolysaccharides that bind water particles, improves skin hydration and integrity. It soothes irritation of the skin around the anus.
- Prebiotic Biolin P protects against the development of pathogenic bacteria and promotes the development of physiological bacterial flora.

Usage: For adults, suitable for pregnant and breastfeeding women. For external use.

Packaging: Plastic tube 50 ml.

GEL FOR RECTUM CARE

Index: WH04

Status: Pharmaceutical cosmetic

Indications:

- For people with a sedentary lifestyle, poor diet, lack of exercise.
- In case of discomfort after defecation.
- Protection of the microbiological balance of the anus area.

Main ingredients:

- Hyaluronic acid intensely moisturise and soothes.
- L-Arginine increases the level of hydration, thus increasing the skin's protective barrier.
- Aloe vera gel has moisturising properties, nourishes the skin and mucous membranes.
- Vitamin E maintains the skin in good condition.
- Prebiotic Biolin P protects against the growth of pathogenic bacteria.
- Benzyl alcohol cooling properties.

Usage: For adults, suitable for pregnant women.
For external use.

Packaging: Plastic tube 50 ml.

SKIN CARE

ANTI-LICE KIT

Index: SC38

PROVEN BY IN VITRO STUDY!
WORKS IN **7** MINUTES

NEW
PRODUCT

Status: Medical device, class I

**Indications:**

- Anti-lice Kit is a medical device designed for the comprehensive treatment of head lice (*Pediculus humanus capitis*).

**Main ingredients:**

- Dimethicone – tightly covers the parasite's body, cuts off airflow, and blocks its breathing openings, resulting in suffocation.
- Isopropyl myristate – dissolves the waxy protective layer of the lice's cuticle, which covers their body, leading to water loss and death from dehydration.

Usage: Children over 2 years of age and adults.

Packaging: 50 ml plastic bottle with an applicator + plastic comb (medical device) + protective cap.

MEDICAL HAND CREAM FOR THE TREATMENT OF DRY SKIN SYMPTOMS

Index: OM02

Status: Medical device, class IIa

Indications:

- Intended for people with problems of excessive dryness of the skin (xerosis).
- Especially recommended for relieving the symptoms of dry skin of hands, subjected to frequent disinfection, washing with strong relieving and irritated by wearing of protective gloves.

Main ingredients:

- Urea in the form of hydroxyethyl urea, a stable form of urea, attracts and retains water.
- Omega Plus is a complex of vegetable oils which increases the barrier of the epidermis.
- Shea Butter moisturises and lubricates the skin.
- Silk proteins support the reconstruction of the skin-epidermal barrier.
- SyriCalm™ CLR soothes and restores the skin's protective function.

Usage: Children over 3 years of age and adults.

Packaging: Plastic tube 100 ml.

LIQUID PLASTER SPRAY

Waterproof

Index: SC09

Status: Medical device, class I

**Indications:**

- Dressing for wounded skin, especially on moving parts of the body, in conditions of increased ambient humidity. The product is waterproof.

**Main ingredients:**

- Acrylates Copolymer creates a mechanical barrier that protects against external factors.

Usage: Children from 12 years of age and adults.

Packaging: Aluminium spray can 70 ml.

SILICONE ADHESIVE REMOVER

Index: SC10

Status: Medical device, class I

Indications:

- Removal of plasters e.g.: ostomy plasters, nicotine patches, hormonal patches or kinesiotope patches.
- Removal of adhesive residues.

Main ingredients:

- Siloxanes help to remove plasters faster and in a painless way.

Usage: Adults.

Packaging: Aluminium spray can 50 ml.

COOLING ICE SPRAY

Index: SC06

Status: Medical device, class IIa

Indications:

- Due to cooling properties, the product reduces the feeling of pain after sports injuries, contusions and bruises.
- Quick mitigation of injuries effects.
- Fast cooling effect and relief.
- Easy and convenient to use.

Main ingredients:

- Mixture of hydrocarbons – rapid evaporation of gases from the surface of the skin causes a decrease in temperature and thus alleviates of pain symptoms.

Usage: Children over 2 years of age, adults.

Packaging: Aluminium can 150/400 ml.

SCAR GEL

Index: SC37

100%
softens
and improves
skin elasticity

Status: Medical device, class I

**Indications:**

- Professional care for scars after surgery, burns, injuries, acne. The gel lightens and smooths the scars.

**Main ingredients:**

- Polysiloxane is a clinically tested substance which forms a surface on the skin, with a thin, water resistant and invisible film. It ensures proper hydration of the stratum corneum and makes the scar structure more elastic. They also reduce the size of the scar and its discoloration.

Usage: Children over 1 year of age and adults.

Packaging: Plastic tube 10/15/20 g.

NAPPY RASH SPRAY

Index: CH04

NAPPY RASH CREAM

Index: CH05

Status: Pharmaceutical cosmetic

Indications:

- Soothing redness and irritation.
- Smoothing the skin.
- Reducing of itching and burning.
- Creating a protective layer that will protect the baby's sensitive skin against irritating factors (which may be contained in the diaper, e.g. urine).
- Supporting skin regeneration.
- Protecting against abrasions caused by the shifting of the diaper.

Main ingredients (SPRAY):

- Zinc oxide 5% is a ingredient used in cosmetics as a substance soothing skin irritations.
- D-Panthenol is a naturally soothing and moisturising ingredient.
- Prebiotic Biolin P supports the reconstruction and maintenance of the skin's protective barrier.

Main ingredients (CREAM):

- Zinc oxide 10% is a ingredient used in cosmetics as a substance soothing skin irritations.
- D-Panthenol is a naturally soothing and moisturising ingredient.
- Omega Plus is a complex of vegetable oils, which supports the natural protective properties of the skin, prevents water loss, softens and moisturizes the skin.

Usage: Children over the 1st day of life.

Packaging: Plastic bottle 100/200 ml with atomizer. Plastic jar 75/125/250 g.

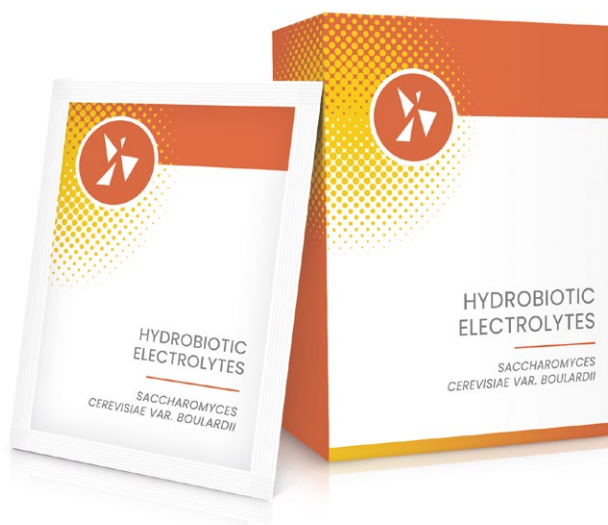

GASTRO BALANCE

HYDROBIOTIC ELECTROLYTES

Strawberry – cream flavour,
Grapefruit flavour

Indeks: GST04

NEW
PRODUCT

Status: Food for special medical purposes

Indications:

- For dietary management in cases of acute or chronic diarrhea and vomiting.
- For the loss of electrolytes and fluids due to diarrhea and/or vomiting.
- Supports the restoration of gut microbiota.

Main ingredients:

- *Saccharomyces cerevisiae var. boulardii* helps restore the gut microbiota.
- Strawberry – cream or grapefruit flavour.
- Glucose facilitates the reabsorption of sodium and water.
- Sodium citrate helps restore the acid-base balance, which becomes disrupted during dehydration.
- Sodium chloride and potassium chloride are essential for replenishing lost electrolytes.

★
UNIQUE
FORMULA
★

Usage: Children over 2 year of age, adults.

Packaging: 6 or 10 sachets.

GASTROESOPHAGEAL REFLUX GEL

Index: GST01

NEW
PRODUCT

European
Funds

Republic
of Poland

Co-funded by the
European Union

MAŁOPOLSKA

Status: Medical device, class IIb

Indications:

- Creates a barrier, coating the mucous membrane and protecting it from irritation.
- Moisturizes the mucous membrane of the esophagus.
- Relieves symptoms associated with reflux, such as heartburn, upper abdominal pain, hoarseness, and irritation-induced cough.
- Prevents irritation caused by refluxed food contents into the esophagus.
- For patients:
 - suffering despite the use of basic medications,
 - as an adjunct therapy,
 - during the withdrawal period of basic medications – as a bridging therapy.

Main ingredients:

- Sodium hyaluronate has strong moisturizing properties, forming a protective film on tissue surfaces that supports regeneration, soothes irritation, and promotes healing.
- Poloxamer forms a protective barrier—such as in the esophagus to prevent gastric reflux—and is widely used in pharmaceuticals and medical devices.
- Carbomer is a high-molecular-weight polymer with strong gelling and thickening properties, capable of binding water to form stable hydrogels.

Usage: Children over 12 years of age, adults.

Packaging: 15 x single-dose sachet (10 g gel); plastic bottle 200/250 ml with dosage syringe.

Advantage confirmed by in vitro study!

The mucoadhesive properties of the Gastroesophageal Reflux Gel have been confirmed by in vitro study.

In vitro study confirms that the Gastroesophageal Reflux Gel demonstrates **exceptional mucoadhesive properties** – essential for both efficacy and patient comfort.

Proven advantage over the market leader

+72%

greater adhesive strength to the gelatin membrane*

+91%

greater work of adhesion to the gelatin membrane*

x2

faster adhesion to the esophageal mucosa*

vs. the competitor's product

Greater comfort of use thanks to rapid and long-lasting mucoadhesion – the Gel adheres quickly and durably to the esophageal mucosa, providing the patient with prolonged relief.

Effective adhesion to the mucosa

- **Acts very quickly** – the product adheres to the mucosa almost immediately (**after just 25 seconds it provided 90% coverage of the mucosa**).
- Immediately after application, **nearly three times more gel remains** compared to substances without adhesive properties (90% vs. 27%).

Longer residence time at the site of application

- The gel remains at the site of action for a long time and is not washed away by saliva – **even after 15 minutes, over 40% more of it remains** compared to products without this effect.

The in vitro study was conducted at the Department of Applied Pharmacy in Medical University of Białystok (2024–2025). The study was performed on Gofarm's product: Gastroesophageal Reflux Gel, as well as on the reference product – the market leader in the category of medical devices.

ONCOMED®

ONCOMED®

HAND-FOOT SYNDROME CREAM

Index: OM02

Status: Medical device, class IIa

Indications:

- Soothing of dermatological side effects of Hand Foot Syndrome.
- Support of main oncological therapy (chemotherapy).
- Moisturising and softening of irritated skin.
- Providing an appropriate microenvironment conducive to natural regenerative processes.
- Reducing the symptoms of itching, burning and skin tension.

Main ingredients:

- Urea in the form of hydroxyethyl urea absorbs and binds the water.
- Omega Plus is a complex of vegetable oils, which supports the regeneration and increases the skin barrier (protects against water loss), improves skin elasticity.
- Soybean oil cares for the skin.
- Shea Butter moisturises and oils the skin.
- SyriCalm™ CLR soothes and restores the skin's protective function.

Usage: Adults and children over 3 years of age, before and during oncological treatment.

Packaging: Plastic tube 100 ml.

POST – RADIOTHERAPY BURNS SPRAY

Index: OM01

POST – RADIOTHERAPY BURNS GEL

Index: SM03

Status: Medical device, class IIa

Indications:

- Intended for use on skin lesions resulting from irradiation (radiotherapy).
- Relieves feeling of tension and itching skin.
- Providing an appropriate microenvironment conducive to natural regenerative processes.

Main ingredients:

- Hyaluronic acid binds water, ensures proper environment for natural regeneration process.
- Prebiotic Biolin P provides the right balance of microbiological flora, supporting the skin's protective barrier prone to damage.
- SyriCalm™ protects against excessive transepidermal water loss and strengthens the skin's protective barrier.
- L-arginine is a natural amino acid that increases the epidermis hydration and strengthens the skin's protective barrier.

Usage: Adults, after radiation therapy.

Packaging: Plastic bottle with atomizer 50 ml (spray). Airless plastic bottle 50 ml (gel).

VAGINAL GEL

Index: WH01

Status: Medical device, class IIb

Indications:

- Vaginal dryness associated with hormonal changes in all periods of a woman's life, especially during menopause, postpartum, lactation and caused by chemio and radiotherapy.
- Abrasions or other factors related to superinfection.
- Restoration of natural physiological condition of vaginal mucosa after gynecological intervention.
- Symptoms of vaginal atrophy, i.e. itching, burning, swelling, redness, abnormal discharge, feeling of tension or discomfort during sexual intercourse.

Main ingredients:

- Hyaluronic acid is a natural component of the human body. Associated with moist secretions of vaginal mucosa, it forms a gel protective film on its surface.
- Lactic acid, by providing an acidic environment in the vagina, maintains the microbial balance and prevents the spread of pathogenic bacteria.

Usage: For women. For vaginal use.

Packaging: 5 disposable, plastic applicators 5 ml each. Plastic tube 50 ml, reusable applicator.
