Gyntima: A Natural Biological Solution for Intimate Health

Gyntima offers a full spectrum of natural, biologically active vaginal suppositories — designed to respond to specific needs at each stage of a woman's life:

- Maintains the natural balance of the vaginal environment
- Helps prevent and manage vaginal infections (bacterial and yeast)
- Soothes itching, burning, and excessive discharge
- Eases hormonal discomfort during menopause and postpartum
- Relieves vaginal dryness and promotes natural hydration
- Provides effective intimate hygiene and gentle daily care

GYNTIMA PROBIOTICA

Packaging: 10 suppositories
Classification: Medical device

Use:
In case of treatment it is recommended to apply 1 suppository a day. Duration of treatment - 10 days.

For prevention apply the suppositories twice a week, long-term, after the evening hygiene routine.

Natural microbiome support for intimate balance and comfort To prevent vaginal infections & discomfort

Supports the restoration and maintenance of the vaginal flora – especially after antibiotics, infections, or hormonal changes. Its formula is based on natural ingredients that are both gentle and effective.

Key Ingredients and Benefits

Biocompatible base - promotes an environment for healthy bacterial growth

Sage extract - anti-mycotic, anti-inflammatory, antiseptic, and moisturizing

No hormones & fragrances

Well tolerated, suitable for long-term use

Recommended In Cases Of

After antibiotics or use of strong disinfectants

Milder cases of bacterial vaginosis, discharge, or discomfort

After sexual intercourse or swimming

As part of a regular prevention routine

GYNTIMA PROBIOTICA FORTE

Packaging: 10 suppositories
Classification: Medical device

Use:

In case of treatment it is recommended to apply 1 suppository a day. Duration of treatment - 10 days.

For prevention apply the suppositories twice a week, long-term, after the evening hygiene routine.

Natural support for bacterial and fungal infections Treatment & Prevention

Well tolerated, suitable for long-term use Gyntima Probiotica Forte supports the natural regeneration of the vaginal microbiome by creating an optimal environment for healthy lactobacilli. Its formula combines plant-based antiseptics and a physiological base to gently relieve common symptoms while maintaining internal balance.

Key Ingredients and Benefits

Tea tree oil & sage - well-known natural antiseptics, effective against bacteria and fungi

Biocompatible base - supports the natural conditions for lactobacilli to thrive

Relieves itching, burning, discharge, and discomfort

No hormones & fragrances

Recommended In Cases Of

Vaginal discharge of unknown origin

Mild cases of vaginal thrush, bacterial vaginosis, discharge, discomfort

After antibiotics, swimming, or sexual intercourse

Women experiencing irritation linked to hormonal changes

GYNTIMA HYALURONIC

Packaging: 10 suppositories
Classification: Medical device

Use:

In case of treatment it is recommended to apply 1 suppository a day. Duration of treatment - 10 days.

For prevention apply the suppositories twice a week, long-term, after the evening hygiene routine.

Deep hydration and regeneration for dry, sensitive vaginal mucosa

Gyntima Hyaluronic provides intensive moisture and supports natural regeneration of the vaginal mucosa. It is especially beneficial in cases of **hormonal imbalance, vaginal atrophy**, and **postpartum or post-infection sensitivity**.

Key Ingredients and Benefits

Hyaluronic acid - provides deep hydration, supports tissue regeneration, improves elasticity

Biocompatible base - supports the natural conditions for lactobacilli to thrive

Well-tolerated base - supports natural conditions for healing and microbiome balance

Hormone-free, fragrance-free, suitable for long-term and preventive use

Recommended In Cases Of

Vaginal dryness and atrophy due to:

Menopause, breastfeeding, hormonal contraception

Pregnancy and postpartum recovery

Chemotherapy or medication-induced mucosal damage

Discomfort after infections or treatment

Pain during intercourse or irritation from internal dryness

GYNTIMA MENOPAUSA

Packaging: 10 suppositories
Classification: Medical device

Use:

In case of treatment it is recommended to apply 1 suppository a day. Duration of treatment - 10 days.

For prevention apply the suppositories twice a week, long-term, after the evening hygiene routine.

Plant-based support for menopausal dryness and discomfort

Targeted vaginal care during menopause & perimenopause

Gyntima Menopausa vaginal suppositories combine **soy extract, hyaluronic acid**, and **lactic acid** to restore moisture, relieve dryness, and support natural balance during hormonal transitions – without the use of synthetic hormones.

Key Ingredients and Benefits

Soy extract - provides plant-based estrogen-like compounds (isoflavones) that help restore vaginal moisture

Hyaluronic acid - deeply hydrates and helps regenerate thinning or atrophic tissue

Lactic acid - supports the natural vaginal pH and helps maintain microbial balance

Recommended In Cases Of

Prevention and treatment of menopausal and perimenopausal vaginal symptoms

Vaginal dryness, irritation, and atrophy

Pain during intimacy and **daily discomfort** in the intimate area

For women avoiding or unable to use hormonal creams

How Gyntima compares to similar products on the market and its unique selling points

Gentle. Targeted. Designed for long-term balance.

Gyntima products are developed to **support the body's natural defences** — not suppress them. Unlike harsh treatments that kill all bacteria (including the good ones), Gyntima creates the right conditions for the **natural flora to recover and thrive**.

What Sets Gyntima Apart

- **Does not disrupt the entire vaginal flora** like antifungal drugs (e.g. clotrimazole)
- Helps women break the cycle of **recurring thrush, irritation, and dryness**
- Based on **biologically active natural ingredients** (e.g. tea tree oil, lactic acid, hyaluronic acid)
- Free from **synthetic hormones, preservatives, fragrances, and harsh chemicals**
- Suitable for **sensitive users** — even during **pregnancy, breastfeeding**, and postpartum
- Offers both **relief and prevention**, restoring balance instead of masking symptoms
- Developed as **medical devices** – MDR certified class IIb device

Why Customers Will Care

- A growing number of women want **non-pharma, hormone-free** intimate care
- Especially relevant for those with **sensitive skin, hormonal shifts, or pregnancy-related issues**
- Gyntima helps them feel **safe, healed, and back in control** of their intimate health

**‘Wish I’d
found
it earlier’**

What customers said about our suppositories

‘These have changed my life, for years been trapped in a cycle of discomfort, irritation, self consciousness and endless purchasing of creams to try to feel better.. so glad I found them..using them has eased my symptoms massively. Wholeheartedly recommend!’

‘Wonderful product, helped me tremendously with that annoying middle age symptoms. Keep buying it as is working wonders. Already recommended it to my friends and I'm sure they'll enjoy it's benefits as well.’

‘Bought this product and was a bit sceptical at first, but they seem to do the trick. All symptoms of thrush have gone and comfort is resumed. Used all 10 at first now will use as preventive weekly.’

‘The best I’ve tried so far! I can’t recommend enough this product. I made a subscription as I don't want the painful dry feeling back’
